Find numerous Science experiments, cool facts, activities, and quizzes for the children to enjoy learning.

Spectrum Science, Grade 7 Carson-Dellosa Publishing

Explore the world with students in grades 7–8 using Discovering the World of Geography. This 128-page book helps students use geographical knowledge and skills to interpret and analyze data. This text covers topics including population, political landscapes, climate, understanding developed and underdeveloped countries, and regions of conflict. The book presents information through activities such as maps, charts, diagrams, and graphs that support National Geography Standards. It also includes assessments and answer keys.

History Digs Hippocrene Books

Supplement your social studies curriculum with 180 days of daily practice! This essential classroom resource provides teachers with weekly social studies units that build students' content-area literacy, and are easy to incorporate into the classroom. Students will analyze primary sources, answer text-dependent questions, and improve their grade-level social studies knowledge. Each week covers a particular topic within one of the four social studies disciplines: history, economics, civics, and geography. Aligned to the National Council for the Social Studies (NCSS) and state standards, this social studies workbook includes digital materials.

Medieval and Early Modern Times Collins

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Can You Count in Greek? Pearson Scott Foresman

Reading Comprehension for grade 8 is designed to aid in the review and practice of reading comprehension skills. Grade 8 covers standards such as main topic and key details, identifying an author's purpose, summarizing, inferring, and vocabulary practice. The book includes engaging nonfiction and fiction passages and stories to appeal to all readers. The 100+ Series Reading Comprehension books span grades 1 to 8. The activities in each book reinforce essential reading comprehension skills by providing practice with sequencing, main idea, predicting, and inferring, as well as story elements, character, plot, and setting. The books include engaging grade-appropriate fiction and nonfiction passages and stories. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in reading comprehension. The series is correlated and aligned to the Common Core State Standards.

Practice, Assess, Diagnose Routledge

Provide your students with frequent, focused skills practice with this Reproducible Teacher's Edition. The reproducible format and additional teacher resources give you everything you need to help students master and retain basic skills.

Practice, Assess, Diagnose McGraw-Hill Education

Transform your classroom into a courtroom and get ready for students to take part in a great learning adventure. The six trial simulations in this book let students delve into criminal and civil law with motivating cases that mirror situations in fairy tales, nursery rhymes, literature, and history. In the roles of attorneys, members of the jury, defendants, witnesses, and courtroom personnel, students prepare and conduct cases. They will learn to use statements of fact and witness affidavits to determine guilt or innocence. The book is divided into three sections that: define the types of courts in the U.S. court system; explain how to carry out a mock trial; and give six ready-to-use court cases, including all necessary documents. The court cases allow students to understand both criminal and civil trials, with three types of each case. The cases allow you to stage trials involving Hansel and Gretel, John Wilkes Booth, Little Miss Muffet, Romeo and Juliet, Jack and Jill, and Little Red Riding Hood. Don't miss this opportunity to teach critical thinking and teach students how to weigh opposing points of view. The exciting results will motivate students to exercise their reasoning skills, polish their communication skills, and apply knowledge of the legal system. This will become one of your favorite classroom adventures. For more judicial activities, see Blind Justice and On Trial. Grades 5-8

Spectrum Algebra Carson-Dellosa Publishing

Bring the action and adventure of U.S. history into the classroom with U.S. History Maps for grades 5 and up! From the ice age to the admission of the 50th state, this fascinating 96-page book enhances the study of any era in U.S. history! The maps can be easily reproduced, projected, and scanned, and each map includes classroom activities and brief explanations of historical events. This book covers topics such as the discovery of America, Spanish conquistadors, the New England colonies, wars and conflicts, westward expansion, slavery, and transportation. The book includes answer keys.

[World History and Geography](#) Routledge

This series follows students who are learning to interpret historical sources from historians, museum curators, and other experts. While applying text prediction, purpose-driven research, and creative problem solving, readers learn how to ask historical questions about primary sources and events. Sidebars and back matter connect the historical event to contemporary times to show that history is alive and worthy of consideration. These books bring history to life; your students will be so captivated by the narratives, they will not realize how much they are learning!

This book offers a concise, but thorough, introduction to ancient number systems. Students won't just learn to count like the ancient Greeks; they'll learn about the number systems of the Mayans, Babylonians, Egyptians, Romans, and Hindu-Arabic cultures, and also about quinary and binary systems. Symbols and rules regarding the use of the symbols in each number system are introduced and demonstrated with examples. Activity pages provide problems for the students to apply their understanding of each system. Can You Count in Greek? is a great resource for math, as well as a supplement for social studies units on ancient civilizations. This valuable resource builds understanding of place value, number theory, and reasoning. It includes everything you need to easily incorporate these units in math or social studies classes. Whether you use all of the units or a selected few, your students will gain a better understanding and appreciation of our number system.

The Newest Rubric Enhancing the Links to the Common Core State Standards, with Clarity of Language for Ease of Use and Scoring Steck-Vaughn Company

This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK)
