The Great African Land Grab? John Wiley & Sons
Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Backpacker Routledge

Israeli Hebrew is a spoken language, 'reinvented' over the last century. It has responded to the new social and technological demands of globalization with a vigorously developing multisourced lexicon, enriched by foreign language contact. In this detailed and rigorous study, the author provides a principled classification of neologisms, their semantic fields and the roles of source languages, along with a sociolinguistic study of the attitudes of 'purists' and ordinary native speakers in the tension between linguistic creativity and the preservation of a distinct language identity.

Toxicological Chemistry and Biochemistry, Third Edition Free Press

Wastewater treatment works have the potential to generate

unpleasant odours, which can result in annoyance and consequently have a detrimental effect on a local population. As a result 'odour control and prevention' has become an important consideration both in the management of existing facilities and in the design and gaining of planning consent for new works. *Odours in Wastewater Treatment* provides readers with a detailed discussion on the basic principles involved in the formation of volatile compounds in wastewater treatment. Accounts are given of recent developments in the sampling and measurement of odours, practical examples in the prediction and dispersion of odorous emissions are offered and an overview of the technologies currently used to contain and treat odorous compounds presented. Contents Introduction Odours associated with wastewater treatment Odour sampling and measurement Assessment and prediction of nuisance odours Odour control and treatment

The History of Sudbury, Massachusetts. 1638-1889 Verso Books

Offering a unique perspective summarizing research on this timely important topic around the globe, this book provides comprehensive coverage of how molecular biomass can be transformed into sustainable polymers. It critically discusses and compares a few classes of biomass - oxygen-rich, hydrocarbon-rich, hydrocarbon and non-hydrocarbon (including carbon dioxide) as well as natural polymers - and equally includes products that are already commercialized. A must-have for both newcomers to the field as well as established researchers in both academia and industry.

A History of the Anderson Family, 1706-1955 IWA Publishing

The final section offers ideas for policy responses, including capital controls and securities transaction taxes."--BOOK JACKET. **National Science Foundation** School for Advanced Research Press

In recent years, the IMF has released a growing number of reports and other documents covering economic and financial developments and trends in member countries. Each report, prepared by a staff team after discussions with government officials, is published at the option of the member country.

What Drives the Global Land Rush? Рипол Классик

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Language Contact and Lexical Enrichment in Israeli Hebrew Boydell & Brewer

This unique book bridges the gap between toxicology and chemistry at a level understandable by a wide spectrum of readers with various interests and a broad range of backgrounds in chemistry, biochemistry, and toxicology. The third edition has been thoroughly updated and expanded to reflect recent advances in important areas of research, including toxicogenetics and toxic effects on various body systems. *Toxicological Chemistry and Biochemistry, Third Edition* begins by outlining the basic concepts of general chemistry, organic chemistry, and biochemistry needed to understand the topics in the book. The author then presents an overview of environmental chemistry so

that you can understand the remainder of the material covered within that framework. He also discusses biodegradation, bioaccumulation, and biochemical processes that occur in water and soil. The new chapter on toxic effects considers toxicities to the endocrine and reproductive systems, and the section on xenobiotics analysis deals with the determination of toxicants and their metabolites in blood and other biological materials. The chapter on the genetic aspects of toxicology discusses the ways in which chemical damage to DNA can cause mutations, cancer, and other toxic effects on specific body systems, and it considers the role of genetics in determining individual susceptibilities to various toxicants. *Toxicological Chemistry and Biochemistry, Third Edition* retains the basic information and structure that made the first two editions popular with students and industry professionals, while enhancing the usefulness of the book and modernizing it in important areas. Review questions and supplementary references at the end of each chapter round out the third edition of this bestselling work.

The Archaeology of Colonial Encounters International Monetary Fund

This engaging volume celebrates the life and work of Theodor Holm “Ted” Nelson, a pioneer and legendary figure from the history of early computing. Presenting contributions from world-renowned computer scientists and figures from the media industry, the book delves into hypertext, the docuverse, Xanadu and other products of Ted Nelson’s unique mind. Features: includes a cartoon and a sequence of poems created in Nelson’s honor, reflecting his wide-ranging and interdisciplinary intellect; presents peer histories, providing a sense of the milieu that

resulted from Nelson’s ideas; contains personal accounts revealing what it is like to collaborate directly with Nelson; describes Nelson’s legacy from the perspective of his contemporaries from the computing world; provides a contribution from Ted Nelson himself. With a broad appeal spanning computer scientists, science historians and the general reader, this inspiring collection reveals the continuing influence of the original visionary of the World Wide Web.

A Comprehensive Dictionary Springer

Developments in the sophistication of global real estate markets mean that global real estate investment is now being executed professionally. Thanks to academic enquiry, professional analysis and entrepreneurial activity, backed by the globalisation of all investment activity, there is now an available body of material which forms the basis of this scholarly but practical summary of the new state of this art. The measurement, benchmarking, forecasting and quantitative management techniques applied to property investments are now compatible with those used in other asset classes, and advances in property research have at last put the ongoing debate about the role of real estate onto a footing of solid evidence. The truly global scope and authorship of this book is unique, and both authors here are singularly well qualified to summarise the impact and likely future of global innovations in property research and fund management. Between them, they have experienced three real estate crashes, and have observed at first hand the creation of the real estate debt and equity instruments that led to the global crisis of 2008-9. *Global Property Investment: strategies, structure, decisions* offers a unique perspective of the international real estate investment

industry with: a close focus on solutions to real life investment problems no excessive theoretical padding a target of both students and professionals highly qualified dual-nationality authorship With many cases, problems and solutions presented throughout the book, and a companion website used for deeper analysis and slides presentations (see below), this is a key text for higher-level real estate students on BSc, MSc, MPhil and MBA courses worldwide as well as for practising property professionals worldwide in fund management, investment and asset management, banking and real estate advisory firms.

American Hereford Journal Zed Books Ltd.

Interrogates the narratives of land grabbing and agricultural investment through detailed local studies that illuminate how these are experienced on the ground and the implications for Africa's land and agricultural economy.

Nigeria CRC Press

Colonialism and its legacies have emerged as one of the most important research topics in anthropology. Indeed, we now understand that colonialism gave rise to and shaped the discipline. However, the understanding of colonization in anthropology, history, and other fields derives largely from studies of European expansion. In this volume, ten archaeologists analyze the assumptions that have constrained previous studies of colonialism and demonstrate that colonization was common in early Old and New World state societies--an important strategy by which people gained access to critical resources.

Compliance Status of Major Air Pollution Facilities Edward Elgar Publishing

Rural societies around the world are changing in fundamental

ways, both at their own initiative and in response to external forces. The Routledge International Handbook of Rural Studies examines the organisation and transformation of rural society in more developed regions of the world, taking an interdisciplinary and problem-focused approach. Written by leading social scientists from many countries, it addresses emerging issues and challenges in innovative and provocative ways to inform future policy. This volume is organised around eight emerging social, economic and environmental challenges: Demographic change. Economic transformations. Food systems and land. Environment and resources. Changing configurations of gender and rural society. Social and economic equality. Social dynamics and institutional capacity. Power and governance. Cross-cutting these challenges are the growing interdependence of rural and urban; the rise in inequality within and between places; the impact of fiscal crisis on rural societies; neoliberalism, power and agency; and rural areas as potential sites of resistance. The Routledge International Handbook of Rural Studies is required reading for anyone concerned with the future of rural areas.

Genetics and Exploitation of Heterosis in Crops John Wiley & Sons
How public land has been stolen from us. Much has been written about Britain's trailblazing post-1970s privatization program, but the biggest privatization of them all has until now escaped scrutiny: the privatization of land. Since Margaret Thatcher took power in 1979, and hidden from the public eye, about 10 per cent of the entire British land mass, including some of its most valuable real estate, has passed from public to private hands. Forest land, defence land, health service land and above all else local authority land- for farming and school sports, for recreation

and housing - has been sold off en masse. Why? How? And with what social, economic and political consequences? The New Enclosure provides the first ever study of this profoundly significant phenomenon, situating it as a centrepiece of neoliberalism in Britain and as a successor programme to the original eighteenth-century enclosures. With more public land still slated for disposal, the book identifies the stakes and asks what, if anything, can and should be done.

Scars, Marks & Tattoos Tredition Classics

Over the past few years, large-scale land acquisitions in Africa have stoked controversy, making headlines in media reports across the world. Land that only a short time ago seemed of little outside interest is now being sought by international investors to the tune of hundreds of thousands of hectares. Private-sector expectations of higher world food and commodity prices and government concerns about longer-term national food and energy security have both made land a more attractive asset. Dubbed 'land grabs' in the media, large-scale land acquisitions have become one of the most talked about and contentious topics amongst those studying, working in or writing about Africa. Some commentators have welcomed this trend as a bearer of new livelihood opportunities. Others have countered by pointing to negative social impacts, including loss of local land rights, threats to local food security and the risk that large-scale investments may marginalize family farming. Lorenzo Cotula, a leading expert in the field, casts a critical eye over the most reliable evidence on this hotly contested topic, examining the implications of land deals in Africa both for its people and for world agriculture and food security.

Sustainable Polymers from Biomass

Robert and Yolanda Murphy spent years studying the Shoshone and Bannock Indians during the 1950s. They were hired by the Department of Justice to conduct research on Native American

tribes who had lost territory due to the advancing frontier. Their research led to the writing of this book, 'Shoshone-Bannock Subsistence and Society' which focuses on the groups' social structure, political identity, and seasonal activity. The book also examines the impact of ecology on the tribes' social structures and documents the Shoshone and Bannock territories in Idaho, Nevada, Utah, and Wyoming. The authors' extensive research, including ethnographic and historical research, is presented in a detailed, insightful manner that provides a comprehensive understanding of these tribes' way of life.

This paper studies the determinants of foreign land acquisition for large-scale agriculture. To do so, gravity models are estimated using data on bilateral investment relationships, together with newly constructed indicators of agro-ecological suitability in areas with low population density as well as indicators of land rights security. Results confirm the central role of agro-ecological potential as a pull factor. In contrast to the literature on foreign investment in general, the quality of the business climate is insignificant whereas weak land governance and tenure security for current users make countries more attractive for investors. Implications for policy are discussed.
