The volume contains ten new essays on Russian literature and thought of the classical age (roughly 1820-1880). The essays are based on papers delivered at the Fourth World Congress for Soviet and East European Studies held at Harrogate in July 1990. It strikes a balance between fresh work on major authors (Pushkin, Lermontov, Turgenev and Dostoevsky), important work on hitherto neglected minor authors (Marlinsky, Pisemsky and Boborykin), and studies that relate to thinkers of the period (Chaadaev, Herzen and Bakunin).

The History of the English Literature was an epoch-changing book of its time, as it invested in presenting a scientific analysis and a complete structure overview of this subject. The book starts with the prehistorical notes on the conditions of the British Isles that favored the early development of literary art. A reader gets a

systematic account of the Saxon and Norman literature, the Renaissance developments, the life and influence of Shakespeare. The second volume gives an insight into the literature of the early protestant era, featuring such personalities as John Bunyan and Milton. Further, a reader finds an account of the Classic age with Dryden, Sir William Temple, Sir John Denham, Addison, Swift, and numerous novel writers William Hogarth, Samuel Richardson, and others. The third volume deals with the representatives of what was later called the beginning of the Golden Age of British Literature. The author analyzes the works of Byron, Thackeray, Macaulay, and Carlyle. The study of the work of Geoffrey Chaucer - still regarded as a literary genius more than 600 years after his death - centres on the problems of detailed readings of his poetry (including in some

cases the textual authority for these readings) and the historical context that gives them meaning. In some ways, the modern understanding of the shaping historical context was undermined in the second half of the twentieth century by the dogmatism of Robertsonian Augustinianism, as a basis for the interpretation of medieval literature in general and of Chaucer's poetry in particular, and at the same time by the reactions of determined opposition provoked by this approach. Undeniably, medieval views often fail to coincide with modern ones and they are frequently uncomfortable for modern readers. Nevertheless, Chaucer's brilliance as an observer of the human scene coexists with and irradiates these unfamiliar medieval ideas. The essays in this volume explore in detail the historical context of Chaucer's poetry, in which orthodox Catholic ideas rather than revolutionary Wycliffite ones occupy the central position. At the same time,

they offer detailed readings of his poetry and that of his famous contemporaries in an attempt to do justice to the independent and original work of these poetic masters, writing in the great royal households of England in the period 1360-1400.
