Completely Revised and Expanded McGraw Hill Professional

The first in a series of
 highly practical, hands on,
 step-by-step photographic
 manuals, Replacing Your
 Boat's Engine fills a gap in
 the market for the DIY
 boat builder and repairer.
 It is a subject covered
 only in piecemeal fashion
 by the yachting press,
 which, like general boat
 repair manuals, can't go
 into the level of detail
 Mike Westin does. This is
 a visual, hand-holding
 guide, dwelling on the
 practical details of
 replacing a boat's engine
 and related systems as it
 explains each procedure
 rather than focussing on
 the theory (which is
 relegated to an appendix,
 for those who wish to go
 further). Anyone who
 wishes to upgrade their
 boat's engine or replace
 an ailing or broken engine
 will find this step-by-step
 illustrated book a hand-
 holding godsend.

BOATBUILDING WITH PLYWOOD. This is the third edition of the most complete text on plywood boatbuilding, especially written with the amateur builder in mind. This book has become the recognized standard on a subject usually covered in other books by a chapter at best. It has been widely used as a reference text in college level boatbuilding classes. The latest edition expands into stitch-&-glue plywood construction. Numerous drawings & photos help put this building method in perspective & illustrate how almost anyone can build a plywood boat, simply & quickly. The revised text also covers the use of epoxies as

adhesives, for encapsulating, & fiberglassing over plywood. A simplified scarfing method is illustrated for joining plywood. GLEN-L specializes in books for the home boatbuilder. All are written by boat designers in down to earth language specifically for the amateur. Three of these books are used as text books in college classes around the country. See the following other boatbuilder titles for the do-it-yourselfer: HOW TO FIBERGLASS BOATS, Illustrates fiberglassing methods using polyester & epoxy resins.
