year ethnographic research project on infrastructure development in South Asia. The project, funded by the European Research Council, will provide the first ethnographic account of the culture of 'road builders', their knowledge practices, interrelations and motivations. Roads and the politics of thought: Ethnographic approaches ...ANTHROPOLOGY OF INFRASTRUCTURE By Marco Di Nunzio Marco Di Nunzio, LSE Cities Research Officer, London School of Economics and Political Science. Until recently, anthropologists saw the study of infrastructure as unexciting and irrelevant. ANTHROPOLOGY OF INFRASTRUCTURE Here, infrastructure means a road that goes nowhere, a factory that isn't working, and cities that are empty. They are built, for example, to demonstrate the power and presence of the government. An anthropological approach to studying infrastructures is not confined to the Global South and might also be useful in uncovering local details and nuances in objects in the Global North. The Anthropology of Infrastructures – Living Infrastructures Infrastructures are the systems that enable circulation of goods, knowledge, meaning, people, and power. In [Splintering Urbanism](#) (2001), Stephen Graham and Simon Marvin argue that we can see the role of public infrastructures and new technologies in facilitating the mobility of people, goods, and utilities when old forms decay. Infrastructure | Cultural Anthropology Roads focuses on two main sites: the interoceanic highway currently under construction between Brazil and Peru, a major public/private collaboration that is being realized within new, internationally ratified regulatory standards; and a recently completed one-hundred-kilometer stretch of highway between Iquitos, the largest city in the Peruvian Amazon, and a small town called Nauta, one of the earliest colonial settlements in the Amazon. Roads focuses on two main sites: the interoceanic highway currently under construction between Brazil and Peru, a major public/private collaboration that is being realized within new, internationally ratified regulatory standards; and a recently completed one-hundred-kilometer stretch of highway between Iquitos, the largest city in the Peruvian Amazon, and a small town called Nauta, one of the earliest colonial settlements in the Amazon.

Roads An Anthropology Of Infrastructure

Here, infrastructure means a road that goes nowhere, a factory that isn't working, and cities that are empty. They are built, for example, to demonstrate the power and presence of the government. An anthropological approach to studying infrastructures is not confined to the Global South and might also be useful in uncovering local details and nuances in objects in the Global North.

Roads: An Anthropology of Infrastructure and Expertise ...

'Roads' is a five year ethnographic research project on infrastructure development in South Asia. The project, funded by the European Research Council, will provide the first ethnographic account of the culture of 'road builders', their knowledge practices, interrelations and motivations.

ANTHROPOLOGY OF INFRASTRUCTURE

Anthropological scholarship that concerns how and why things get built is undeniably in vogue, making Penny Harvey and Hannah Knox's *Roads: An Anthropology of Infrastructure and Expertise* a welcome and timely publication indeed. Harvey and Knox not only show why roads matter, but also vividly illustrate how roads come to matter: that is, the material processes that bring a road to form, and the ways in which they excite the imaginations of people whose worlds they trace through and ...
