Burns joins Abood for this edition of a law textbook for teaching the facts of pharmacy law, the background underpinning those facts, and critical thinking in the field. They have revised it to account for changes in law and practice and to incorporate suggestions from instructors who have used previous editions. Their topics are the law and the legal system; federal regulation of medications: development, production, and marketing; federal regulation of medications: dispensing; the closed system of controlled substance distribution; dispensing controlled substances; federal regulation of pharmacy practice; state regulation of pharmacy

practice; and pharmacist malpractice and liability and risk management strategies.

### **Pharmaceutical Practice E-Book**

Legare Street Press  
Suitable for both students and practicing pharmacists, the latest edition of this classic textbook provides comprehensive coverage of an essential component of the U.K. pharmacy curriculum: pharmacy law and ethics. Completely rewritten since the last edition to reflect the rapid pace at which this field moves, it offers a clear, readable and non-technical guide on balancing the needs of patients with the letter of the law. It explains what happens and why in a reader-friendly format, taking a problem solving approach, and even provides an introduction to pharmacy issues for

solicitors and legal personnel. Any pharmacist, student, or regulatory authority will find it appropriate for either a serious study or for answering questions which occur in practice. \* Adopts a unique approach discussing topics thematically rather than statute based \* Unlike competitor's, the style of the book is clear, accurate and succinct, avoiding long complex sentences which are so common in legal textbooks. The law is logically presented, even when it is complex or difficult, reasons for existence of law are discussed, and lack of clarity in the law is indicated where necessary. \* Includes the new and updated NHS pharmacy contract and discusses

changes in many areas of relevant law \* Updated chapters on employment law, human rights, informed consent, confidentiality, and changes in the NHS structure \* Applicable for day-to-day use by community pharmacists and pharmacy students

*Pharmaceutical Dispensing and Compounding*  
Pharmaceutical Press

This book contains essential knowledge on the preparation, control, logistics, dispensing and use of medicines. It features chapters written by experienced pharmacists working in hospitals and academia throughout Europe, complete with practical examples as well as information on current EU-legislation. From prescription to production, from usage instructions to procurement and the impact of medicines on the environment, the book provides step-by-step coverage that will help a wide range of readers. It offers product knowledge for all pharmacists working directly with patients and it will enable them to make the appropriate medicine available, to

store medicines properly, to adapt medicines if necessary and to dispense medicines with the appropriate information to inform patients and caregivers about product care and how to maintain their quality. This basic knowledge will also be of help to industrial pharmacists to remind and focus them on the application of the medicines manufactured. The basic and practical knowledge on the design, preparation and quality management of medicines can directly be applied by the pharmacists whose main duty is production in community and hospital pharmacies and industries. Undergraduate as well

as graduate pharmacy students will find knowledge and backgrounds in a fully coherent way and fully supported with examples.
