### BOONE BROOKLYN

**Supporting Rural Water Supply** University of Massachusetts, Center for International Education  
 This book examines the present state of harmonization of unfair competition law in Europe. It discusses the particular approach to unfair competition law in the 10 new Member States and the possible impact on the future development of European unfair competition law. The book presents new insight in the importance of unfair competition law, especially in countries with a developing market economy.

Safely guide your library into the new millennium! Like so much else in the information professions, leadership styles are being forced to change to meet the demands of technological innovation. *Leadership in the Library and Information Science Professions* is among the first books to focus on this increasingly important job qualification. It offers practical advice for developing strong, flexible, and creative leadership skills in yourself and your staff. This fascinating volume stresses the leadership needed to manage change. The essential skills taught here will help you update library services at a reasonable pace while preserving valuable low-tech alternatives. As one chapter recommends, "Every librarian at every level should have ready an answer-multiple answers-to the ubiquitous questions: Why do we still need libraries when everything is on the Web? How can you justify an expanding budget in the Internet Age?" *Leadership in the Library and Information Science Professions* offers fresh ideas for developing and using leadership skills, including: recruiting tips for identifying potential leaders staff training and development restructuring the organization to encourage full staff participation budget strategies for successful

leaders issues of gender and ethnic diversity evaluating and assessing leadership *Leadership in the Library and Information Science Professions* is an essential resource for library administrators and staff. By developing your leadership skills and those of your staff, you can confidently face the hectic pace of change in the information sciences.

**Twelve Years a Slave** Springer

Fully revised and updated content matching the Cambridge International AS & A Level Biology syllabus (9700). Endorsed by Cambridge International Examinations, the Fourth edition of the AS/A Level Biology Coursebook comprehensively covers all the knowledge and skills students need during the Biology 9700 course (first examination 2016). Written by renowned experts in Biology teaching, the text is written in an accessible style with international learners in mind. The Coursebook is easy to navigate with colour-coded sections to differentiate between AS and A Level content. Self-assessment questions allow learners to track their progression and exam-style questions help learners to prepare thoroughly for their examinations. Contemporary contexts are discussed throughout enhancing the relevance and interest for learners.

**Edexcel Igcse Human Biology. Student Book** Holmes & Meier Pub

This book is an intellectual journey into epistemology, pedagogy, physics, architecture, medicine and metallurgy. The focus is on various dimensions of African Indigenous Knowledge (AIK) with an emphasis on the sciences, an area that has been neglected in AIK discourse. The authors provide diverse views and perspectives on African indigenous scientific and technological knowledge that can benefit a wide spectrum of academics, scholars, students, development agents, and policy makers, in both governmental and non-governmental organizations, and enable critical and alternative analyses and possibilities for understanding science and technology in an African historical and contemporary context.

**Managing Rural Development** Courier Corporation

Recent decades have seen unprecedented growth in the number of students travelling abroad for the purpose of short-term academic study. As such, attention is turning to the role that education abroad can have in enhancing student learning and producing global-ready graduates. This volume provides a succinct and accessible analysis of the existing research and scholarship around the world on a range of important areas related to contemporary education abroad, providing practitioners with important implications for programming and practice. Focusing on fourteen key topics relating to education abroad, this accessible desktop compendium not only synthesizes what is already known, but also indicates which topics need further research and how the existing literature can be applied to daily programming and practice. Extending beyond student learning outcomes to look at essential topics such as institutional outcomes, program models, and host community outcomes, this volume covers major trends in contemporary research as well as an assessment of the methodological and design challenges that are common to education abroad research. The fourteen distinct topics address the broad themes of participation, programming, student outcomes, institutional outcomes and societal outcomes, and include chapters from a broad range of widely acknowledged and respected international experts. Bridging the gap between scholarship and practice, this accessible guide is essential reading for anyone working in higher education today and involved in shaping and managing education abroad programs. It is useful for all who want to understand and leverage existing research to inform education abroad programming and practice.

**Global Virology III: Virology in the 21st Century** Cambridge University Press

Topics include work-integrated learning (internships), student well-being, and students with disabilities. Also, it explores the impact on assessments and academic integrity and what analysis of online systems tells us. Preface

.....	ix	Section I:
Introduction .....	1	Chapter 1: COVID-19 Emergency Education Policy and Learning Loss: A Comparative Study
.....	3	Athena Vongalis-Macrow, Denise De Souza, Clare Littleton, Anna Sekhar
.....	27	Chapter 2: Classrooms Going Digital – Evaluating Online Presence Through Students’ Perception Using Community of Inquiry Framework .....
.....	29	Hiep Cong Pham, Phuong Ai Hoang, Duy Khanh Pham, Nguyen Hoang Thuan, Minh Nhat Nguyen
.....	51	Chapter 3: A Study of Music Education, Singing, and Social Distancing during the COVID-19 Pandemic: Perspectives of Music Teachers and Their Students in Hong Kong, China
.....	75	Chapter 4: The Architectural Design Studio During a Pandemic: A Hybrid Pedagogy of Virtual and Experiential Learning .....
.....	97	Chapter 5: Enhancing Online Education with Intelligent Discussion Tools .....
.....	115	Chapter 6: Australian Higher Education Student Perspectives on Emergency Remote Teaching During the COVID-19 Pandemic
.....	117	Chapter 7: Online Learning and Engagement with the Business Practices During Pandemic .....
.....	151	Chapter 8: Effects of an Emergency Transition to Online Learning in Higher Education in Mexico .....
.....	165	Chapter 9: Factors Affecting the Quality of E-Learning During the COVID-19 Pandemic From the Perspective of Higher Education Students .....
.....	189	Chapter 10: Learning and Working Online During the COVID-19 Pandemic: A Wellbeing Literacy Perspective on Work Integrated Learning Students .....

.....	213	Chapter 10: Learning and Working Online During the COVID-19 Pandemic: A Wellbeing Literacy Perspective on Work Integrated Learning Students .....
.....	215	Chapter 11: Hands-on Learning in a Hands-off World: Project-Based Learning as a Method of Student Engagement and Support During the COVID-19 Crisis ..
.....	245	Chapter 12: Positive and Contemplative Pedagogies: A Holistic Educational Approach to Student Learning and Well-being .....
.....	265	Chapter 13: Taking Advantage of New Opportunities Afforded by the COVID-19 Pandemic: A Case Study in Responsive and Dynamic Library and Information Science Work Integrated Learning .....
.....	297	Chapter 14: Online Learning for Students with Disabilities During COVID-19 Lockdown .....
.....	313	Section V: Teacher Practice .....
.....	331	Chapter 15: From Impossibility to Necessity: Reflections on Moving to Emergency Remote University Teaching During COVID-19 .....
.....	333	Chapter 16: Business (Teaching) as Usual Amid the COVID-19 Pandemic: A Case Study of Online Teaching Practice in Hong Kong .....
.....	355	Chapter 17: Secondary School Language Teachers’ Online Learning Engagement during the COVID-19 Pandemic in Indonesia .....
.....	385	Chapter 18: Riding the COVID-19 Wave: Online Learning Activities for a Field-based Marine Science Unit .....
.....	415	Section VI: Assessment and Academic Integrity .....
.....	429	Chapter 19: Student Academic Integrity in Online Learning in Higher Education in the Era of COVID-19 .....
.....	431	Chapter 20: Assessing Mathematics During COVID-19 Times .....
.....	447	Chapter 21: Preparedness of Institutions of Higher Education for Assessment in Virtual Learning Environments During the COVID-19 Lockdown: Evidence of Bona Fide Challenges and Pragmatic Solutions .....
.....	465	Section VII: Social Media, Analytics, and Systems .....
.....	487	Chapter 22: Learning Disrupted: A Comparison of Two Consecutive Student Cohorts .....
.....	489	Chapter 23: What Twitter Tells Us about Online Education During the COVID-19 Pandemic .....
.....	503	.....
.....		<i>African Indigenous Knowledge and the Sciences</i> Springer
.....		Providing complete coverage of the 2009 Edexcel IGCSE human biology specification, this book helps students perform to their best in the exam.
.....		<b>IB WORLD SCHOOLS YEARBOOK 2019</b> Springer Science & Business Media
.....		Global Virology, Volume III: Virology in the 21st Century examines work that has been undertaken, or is planned, in several fields of virology, in an effort to promote current and future work, research, and health. Fields and methods addressed include virology, immunology, space research, astrovirology/astrobiology, plasmids, swarm intelligence, bioinformatics, data-mining, machine learning, neural networks, critical equations, and advances in biohazard biocontainment. Novel and forward-looking methods, techniques, and approaches in research and development are presented by experts in the field.
.....		<b>More Food: Road to Survival</b> Hodder Education
.....		Building on the success of its popular predecessor, the second edition of <i>Ecotoxicology of Amphibians and Reptiles</i> presents newly available findings on the species that are important environmental indicators. This new edition covers nearly twice as many topics as the first, including recent developments in the ecotoxicology of amphibians and reptiles, the current status of these animals, and intrinsic factors that affect their susceptibility to contaminants. The book also provides the latest information on specific groups of contaminants and their effects and body burdens in herpetofauna. After a review of how contaminants interact with other ecological factors, the text explores concerns for the future. New in the second edition: New research on the effects of pesticides, heavy metals, endocrine disrupting chemicals, and UVB Increased focus on the effects of contaminants rather than merely reporting residue information A synthesis of information on atrazine and its effects on gonads at low concentrations Coverage of the potentially

alarming new cadre of chemicals that have recently or are about to come on the market for which there is very little or no information Important advances in surveying and monitoring One of the major factors behind the writing of the first edition was the worldwide phenomenon of declining amphibian populations. Although this decline has not abated, the breadth of research into its causes has expanded significantly. With chapter contributors carefully selected by the team of editors as leaders in their fields, this book provides an authoritative compendium of the most recent information on effects and residues coupled with a syntheses of what these numbers mean to science and policy.

**Bowser the Hound** Routledge

This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

**Literacy and Gender** Prentice Hall

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, *Radio Frequency and Microwave Electronics Illustrated* is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. *Radio Frequency and Microwave Electronics Illustrated* includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

**Modern Biology for Secondary Schools** HarperCollins UK

Patronage systems in the public service are universally reviled as undemocratic and corrupt. Yet patronage was the prevailing method of staffing government for centuries, and in some countries it still is. In *Jobs for the Boys*, Merilee Grindle considers why patronage has been so ubiquitous in history and explores the political processes through which it is replaced by merit-based civil

service systems. Such reforms are consistently resisted, she finds, because patronage systems, though capricious, offer political executives flexibility to achieve a wide variety of objectives. Grindle looks at the histories of public sector reform in six developed countries and compares them with contemporary struggles for reform in four Latin American countries. A historical, case-based approach allows her to take into account contextual differences between countries as well as to identify cycles that govern reform across the board. As a rule, she finds, transition to merit-based systems involves years and sometimes decades of conflict and compromise with supporters of patronage, as new systems of public service are politically constructed. Becoming aware of the

limitations of public sector reform, Grindle hopes, will temper expectations for institutional change now being undertaken.

**African Indigenous Knowledge and the Disciplines** Springer

Non-formal educational strategy for rural development in Niger and Senegal.

**Animation RURALE** Bentham Science Publishers

More Food: Road to Survival is a comprehensive analysis of agricultural improvements which can be achieved through scientific methods. This reference book gives information about strategies for increasing plant productivity, comparisons of agricultural models, the role of epigenetic events on crop production, yield enhancing physiological events (photosynthesis, germination, seedling

emergence, seed properties, etc.), tools enabling efficient exploration of genetic variability, domestication of new species, the detection or induction of drought resistance and apomixes and plant breeding enhancement (through molecularly assisted breeding, genetic engineering, genome editing and next generation sequencing). The book concludes with a case study for the improvement of small grain cereals. Readers will gain an understanding of the biotechnological tools and concepts central to sustainable agriculture More Food: Road to Survival is, therefore, an ideal reference for agriculture students and researchers as well as professionals involved sustainability studies.
