This study, first published in 1990, presents a comprehensive description of the comparative constructions of Spanish and French, and shows that the apparently numerous differences in their syntactic realisations can be accounted for by general constraints on the expression of comparison. There is also a discussion of parallel constructions in other Romance languages, showing that these languages display a range of constructions equally compatible with the suggested pattern of possibilities resulting from the general constraints proposed. This title will be of interest to students of language and linguistics.

The French pursued victory and colonisation amid a Roman landscape little affected down the centuries by local inhabitants. In the space of two generations they destroyed much of it, re-using its materials to create security and a modern prosperity.

Neuf dieux gouvernaient jadis le monde, jusqu'à ce qu'une ultime trahison ne les mène à leur perte. Depuis, le monde se meurt et seul le retour des Dieux disparus pourra le sauver. Les habitants de Pozhar craignent le retour de Zhar Ptitsa, le Dieu des Âmes et de la Résurrection qui, pris d'une colère terrible, a bien failli tous les détruire il y a neuf cents ans. Pour l'empêcher de renaître, le peuple pourchasse et sacrifie les Réceptacles, ceux-là mêmes qui depuis leur naissance possèdent en eux un fragment de l'âme de Zhar Ptitsa. Les Écrits sacrés proclament que mille d'entre eux seront mis au monde et que tous doivent être sacrifiés afin de détruire Zhar Ptitsa une fois pour toute.

De nos jours, seuls restent deux fragments, enfouis dans le corps de voleurs bien décidés à ne pas se laisser jeter aux Flammes sans combattre.

In *The Fatimids and the Sea (909-1171)*, David Bramoullé shows how in medieval times an Ismaili dynasty of Caliphs used the sea to develop and justify its claims of control over the Muslim world. Dans *les Fatimides et la mer (909-1171)*, David Bramoullé montre comment à l'époque médiévale une dynastie musulmane de rite ismaélien utilisa la mer pour se développer et justifier ses prétentions à contrôler le monde musulman.

The Oxford Handbook of Montaigne

This volume presents 16 original studies of variation in languages representing the three main European language families, as well as in varieties of Greek and Hungarian. The studies concern variation in or across dialects or dialect groups, in standard varieties or in emerging regional varieties of the standard. Several studies investigate a specific linguistic element or structure, while others focus on areas of tension between variation and prescriptive standard norms, on regional standard

varieties and regiolects, on problems of linguistic classification (from folk linguistic or dialect geographical perspectives) and the classification of speakers. Language acquisition plays a main role in three studies. The studies in this volume represent a range of methods, including ethnographic and 'interpretative' approaches, conversation analysis, analyses of the internal and geographical distribution of dialect features, the classification and quantitative analyses of socio-demographic speaker background data, quantitative analyses of both diachronic and synchronic language data, phonetic measurements, as well as (quasi-)experimental perception studies. The volume thus offers a microcosmic reflection of the macrocosmos of worldwide research on variability in (originally) European languages at the beginning of the 21st century and the linguistic expression of cultural diversity.

In 1580, Michel de Montaigne (1533-1592) published a book unique by its title and its content: *Essays*. A literary genre was born. At first sight, the *Essays* resemble a patchwork of personal reflections, but they engage with questions that animate the human mind, and tend toward a single goal: to live better in the present and to prepare for death. For this reason, Montaigne's thought and writings have been a subject of enduring interest across disciplines. This Handbook brings together essays by prominent scholars that examine Montaigne's literary, philosophical, and political contributions, and assess his legacy and relevance today in a global perspective. The chapters of this Handbook offer a sweeping study of Montaigne across

different disciplines and in a global perspective. One section covers the historical Montaigne, situating his thought in his own time and space, notably the Wars of Religion in France. The political, historical and religious context of Montaigne's *Essays* requires a rigorous presentation to inform the modern reader of the issues and problems that confronted Montaigne and his contemporaries in his own time. In addition to this contextual approach to Montaigne, the Handbook also establishes a connection between Montaigne's writings and issues and problems directly relevant to our modern times, that is to say, our age of global ideology. Montaigne's considerations, or essays, offer a point of departure for the modern reader's own assessments. The *Essays* analyze what can be broadly defined as human nature, the endless process by which the individual tries to impose opinions upon others through the production of laws, policies or philosophies. Montaigne's motto -- "What do I know?" -- is a simple question yet one of perennial significance. One could argue that reading Montaigne today teaches us that the angle defines the world we see, or, as Montaigne wrote: "What matters is not merely that we see the thing, but how we see it."

[In verse.]* John Benjamins Publishing This book presents an introduction to

structural equation modeling (SEM) and facilitates the access of students and researchers in various scientific fields to this powerful statistical tool. It offers a didactic initiation to SEM as well as to the open-source software, lavaan, and the rich and comprehensive technical features it offers. Structural Equation Modeling with lavaan thus helps the reader to gain autonomy in the use of SEM to test path models and dyadic models, perform confirmatory factor analyses and estimate more complex models such as general structural models with latent variables and latent growth models. SEM is approached both from the point of view of its process (i.e. the different stages of its use) and from the point of view of its product (i.e. the results it generates and their reading).
