In July 1943 Benito Mussolini, Italy's warlord and the father of fascism fell from power in a hastily arranged plot, the details of which even today remain controversial. A cabal of generals took the nation's reins and bungled their way toward an accommodation with the Allies. When General Eisenhower announced an armistice with Italy on the evening of 8 September he believed he had struck a deal that included Italian military cooperation against the Germans. In fact, the generals had promised more than they could deliver and Germany's terrible, swift reprisal shattered Italy's confused air force and army. The armistice likewise caught the navy by surprise, with its battleships raising steam to attack the Allied fleet landing at Salerno. Nonetheless, the Regia Marina obeyed its government's orders and honored the pact the generals had negotiated. Rather than evaporating like Italy's other services, however, it proceeded to fight a three-week campaign against Germany, without Allied support, and in the process retained complete control of its ships, regardless of the ports necessity forced them to seek refuge in. This is the story of the Regia Marina and the Italian armistice of September 1943. It is a deeply-researched and highly readable exploration of this confusing and fascinating corner of history. It refutes the conventional notion that Italy's fleet abjectly surrendered to Allied power. It shows how the navy paved Italy's path from enemy to co-belligerent with the blood and unconquered spirit of its men. Despite German and Allied intentions to secure Italy's fleet for their own uses, it remained Italian to the end: a dark navy - not victorious, but undefeated. Vincent P. O'Hara and Enrico Cernuschi have collaborated for publications including "Warship, World War II Magazine, World War II Quarterly, " and the new "Seaforth Naval Review." Mr. O'Hara has written several books including "Struggle for the Middle Sea: the Great Navies at War in the Mediterranean 1939-1945" (Annapolis, 2009). Mr. Cernuschi is a regular contributor to Rivista Marittima and Storia Militare. He has published a dozen books including "Le navi da guerra italiane 1940-1945" (Parma, 2003) and "Domenico Cavagnari: Storia di un Ammiraglio" (Rome, 2001) About DARK NAVY The huge tragedy suffered by the Italian navy and nation has been reduced, until today, to a brief mention in the very few books available abroad about the Regia Marina's war between 1940 and 1945. It is thus quite important that a new essay directed toward English speaking readers is dedicated, at last, to these events, allowing them to sortie beyond the confines of Italian naval historiography--which has long debated these themes--and beyond the scanty circulation abroad of the Italian language.--Erminio Bagnasco, editor of STORIA Militare DARK NAVY is a masterful account of the Regia Marina's role in the Armistice of September 1943. The authors are to be commended for overturning the propagandist mythology which has often marred English-language histories of this difficult period in Italian history. A riveting story.--John Jordan, editor of WARSHIP DARK NAVY gives an excellent overview of the naval, air, and land impact on the Italian military at the time of the 8 September 1943 Armistice. It clearly shows the hesitancy of various leaders, on both sides, as they

grappled with "what to do?" in this radically changed wartime environment and gives solid detail on the actions that resulted.--Jack Greene, author (with Alessandro Massigiani) of NAVAL WAR IN THE MEDITERRANEAN 1940-1943.

MOTOCOURSE 2020-2021 celebrates its 45th year of publication - and despite the World pandemic throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-barred assessment of all the aspects of a compelling season's action. MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinanini, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas, Ai Ogura and John McPhee hotly disputed the Moto3 title. In World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alavaro Bautista, Chaz Davies and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'.

The Art of BMW: 90 Years of Motorcycle Excellence presents stunning studio portraiture of the rolling sculpture that BMW has been creating for the past 90 years. Each bike portrait is accompanied by a concise, authoritative profile of the machine. All the classic bikes are here--pre-World War II BMWs

like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the R75M that accompanied Rommel's Panzers in North Africa; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; the K1 "flying brick"; and the GS (Gelände Sport) series that launched a dual-sport revolution. All the bike families are covered—the side-valve machines from the early years, the early overhead-valve performance bikes, the postwar Airheads and Oilheads, the four-cylinder and six-cylinder touring bikes, the early pushrod singles, the modern overhead-cam singles, the latest parallel twins, and inline-four cylinder sport bikes. From the first model, the R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) model, the World Super Bike dominating S1000RR, this book captures nearly a century of motorcycling excellence.

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

This heavily illustrated book describes for the first time the technical development of the Maserati A6G 2000. In 1950, Maserati replaced its first production car, the two-door A6 1500, with a second series: the A6G 2000. Customers could choose from several designs: a bulky design by Pininfarina, a muscular one from Allemano, the glamorous Coupès and Spyder versions by Frua, and the eccentric Coupé by Vignale. All of these versions were slightly different and were among the rarest and most expensive cars of their time. This heavily illustrated book describes for the first time the technical development of the A6G 2000, while also telling the individual histories of each of the versions, chassis by chassis.

An invaluable account of one of the most overlooked sea battles of World War II. By mid-1942 the Allies were losing the Mediterranean war: Malta was isolated and its civilian population faced starvation. In June 1942 the British Royal Navy made a stupendous effort to break the Axis stranglehold. The British dispatched armed convoys from Gibraltar and Egypt toward Malta. In a complex battle lasting more than a week, Italian and German forces defeated Operation Vigorous, the larger eastern effort, and ravaged the western convoy, Operation Harpoon, in a series of air, submarine, and surface attacks culminating in the Battle of Pantelleria. Just two of seventeen merchant ships that set out for Malta reached their destination. In Passage Perilous presents a detailed description of the operations and assesses the actual impact Malta had on the fight to deny supplies to Rommel's army in North Africa. The book's discussion of the battle's operational aspects highlights the complex relationships between air and naval power and the influence of geography on littoral operations. "An important and highly recommended addition to the literature on World War II in the Mediterranean." —IPP Naval Maritime History

One of the greatest graphic designers of the twentieth century—called by Picasso "the Leonardo of our time"—Italian artist and designer Bruno Munari (1907–1998) considered the book the best medium to communicate his visual ideas, showcase his art, and convey his creative spirit. Primarily produced in large quantities for the general public, his more-than-sixty publications—from design manuals and manifestos to visionary tactile children's books—displayed all the beauty and technical ingenuity of works of art. Munari's Books, the first English-language monograph to focus on his remarkable achievements in publishing, examines in detail his seventy-year legacy in print, from his pioneering work as a graphic designer and collaborations with major publishers to his experimental visual projects and innovative contributions to the fields of painting, sculpture, design, photography, and teaching. Featuring critical essays and a wealth of color illustrations, this long-overdue monograph is a visually rich introduction to Munari's remarkably multifaceted career.

Fascist Ideology is a comparative study of the expansionist foreign policies of fascist Italy and Nazi Germany from 1922-1945. Fascist Ideology provides a comparative investigation of fascist expansionism by focusing on the close relations between ideology and action under Mussolini and Hitler. With an overview of the ideological motivations behind fascist expansionism and their impact on fascist policies, this book explores the two main issues which have dominated the historiographical debates on the nature of fascist expansionism: whether Italy's and Germany's particular expansionist tendencies can be attributed to a set of generic fascist values, or were shaped by the long term, uniquely national ambitions and developments since unification; whether the pursuit of expansion was opportunistic or followed a grand design in each case.

Over the past two decades, scholarship in architectural history has transformed, moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender, race, the environment, and more recently global history, connecting to revisionist trends in other fields. With examples across space and time—from medieval European coin trials and eighteenth-century Haitian revolutionary buildings to Weimar German construction firms and present-day African refugee camps—Writing Architectural History considers the impact of these shifting institutional landscapes and disciplinary positionings for architectural history. Contributors reveal how new methodological approaches have developed interdisciplinary research beyond the traditional boundaries of art history departments and architecture schools, and explore the challenges and opportunities presented by conventional and unorthodox forms of evidence and narrative, the tools used to write history.

This official history of the FIM Grand Prix motor cycle racing World Championship, since its formation in 1949, records the action from a sport that has seen massive changes during the last 50 years with Japanese manufacturers eclipsing their European rivals, purpose-built race circuits replacing true road courses and a reduction in the number of Grand Prix classes. In other respects it has enjoyed remarkable continuity, as motor cycle racing has remained the domain of the major manufacturers anxious to promote the awareness of their road machines. Contemporary Grand Prix designs are clearly descended from the bikes raced in the 1950s. This book traces the major trends and developments during the last 50 years and it profiles the legendary riders, teams and innovators that have dominated the sport during this period. Concluding the history is a comprehensive and detailed results section which provides an invaluable source of reference for any motor cycle enthusiast.
