ECONOMICS. Global

economics have never
been more
newsworthy. This book
helps you understand
all the nuances of the
world of finance from
the International
Monetary Fund to

company pensions. It answers all the questions you're too afraid to ask, such as how inflation affects interest rates, or how national debt is accrued and paid. It has clear illustrations explaining some of the most complex theories and throughout there are fascinating stories, facts and profiles of key figures. The Book of Money will demystify and explain economics to help you understand the modern financial world.

What to Expect, How to Prepare and How to Get Through It

Harbour Publishing
Company

Twenty-four stories starring one of the most unique pulp detectives of all time. In a hot, cramped office not far from the Pasig River, an ingenious investigator waits for clients. Younger than he appears, with gray hair

and squinting eyes, he is Jo Gar, the half-Filipino Island Detective whose intuition makes him one of the sharpest sleuths in either hemisphere. From the back alleys of Manila to the docks of San Francisco, he tracks killers, unmasks liars, and outwits thieves. Although he appears harmless, this tropical PI is not afraid to pull a knife or squeeze the trigger on his army-issue Colt .45. Based on Raoul Whitfield's childhood experiences in the Philippines, Jo Gar is a rarity of his era: an Asian sleuth who defies the stereotypes of Fu Manchu and Charlie Chan. Gar is one of the most brilliant creations ever to step from the pages of Black Mask.

The most fun you'll ever have learning about antiques, from the man the Philadelphia Daily News has called "the godfather of Cape May County antiquing," can be found in The

Antique Story Book: Finding the Real Value of Old Things. From his columns, lectures, and classes on antiques, author Arthur Schwerdt, a certified appraiser and dealer for nearly a quarter of a century, shares some of his favorite stories—the ones that make antiques so fascinating to so many people. In "Love and Sex-Victorian Style," Schwerdt tells how he learns about intimacy in that era and wonders what future antique hunters will learn about our sexuality. "The Mysterious Creator(s) of Nancy Drew" discusses the identity of the man who conceptualized Nancy Drew and her character's influence on future literature. Most importantly,

Schwerdt divulges the most enjoyable, valuable, and meaningful aspect of antiquing—the stories behind each treasure. Long ago, every item in today's antique shops existed as a product of its time. The Antique Story Book makes these items come alive again, making astute antique-lovers of us all.

Harlequin / SB Creative
Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she

didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain

community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--

and the roots--she so desperately craves.

Without Magic, It's Just Marketing Ever wonder why among 35,000 masterworks in the Louvre, just one comparatively unremarkable, 30-by-21-inch painting is perpetually surrounded by tourists, all jostling to take a selfie and share their experience? In Big Little Legends, you'll discover timeless secrets such as the Mona Lisa Effect--an invisible force that flips the dynamics for

certain brands, attracting the customer to them.

Magically, they become irresistible. But here's the secret: it's not magic. In a wild, rollicking journey through brands in many sectors, brand strategist and history maven Gair Maxwell explores real-life stories of otherwise ordinary, everyday leaders who accomplished extraordinary results--and reveals how they did it. You'll learn how successful brands focus their marketing efforts on creating an organic pull instead of a manufactured push, ditching the frustration of pitching and advertising and ensconcing their brands as a "Category of One" for decades to come. You'll learn how

to become a word-of-mouth juggernaut and make people become willing accomplices in marketing your brand. From a "Huggable" car dealership on Canada's east coast to slap-happy fishmongers in Seattle, an Ontario burger stand to a Vegas pawn shop and more, *Big Little Legends* is jam-packed with reasons why every brand should discover, tell and believe in their own story.

Armada Commercial Truck Success
In *Fossil Forensics*, acclaimed Christian author and scientist Jerry Bergman examines the many claims about evolution in the fossil record and shows why they don't stand up to the evidence. The book includes photographs, diagrams, illustrations,

and in-depth descriptions showing why the fossils give better evidence to creation instead of evolution.

[Big Little Legends: How Everyday Leaders Build Irresistible Brands](#)

Andrews McMeel Publishing

"Emily Kane shows clearly that most parents understand children's personality to be some combination of nature and nurture, and many wish they could help nurture their children to escape gender traps. Yet these parents are themselves trapped by the gender structure itself, especially the accountability they feel to other people's expectations, and the fear that if their boys are free to explore activities usually

associated with girls they will be punished by the world around them. The author shows clearly that to help parents navigate childrearing, we have to change the world around them. A good read, perfect for the undergraduate classroom, and clear enough even to give to those new parents in your family or the neighborhood."--Cover.

A Novel by the Author of Ready Player One

John Wiley & Sons

A proliferation of lawsuits involving sport utility vehicles, defective tires, medical devices and drugs, and

asbestos abounds.

Public attention to products liability cases is at an all-time high, and awards routinely run into the millions of dollars. When developing a strategy in this high stakes world, attorneys can't afford to have anything other than the best information and insight into this evolving area of law. Lawyers need practical tools to assess a products liability case's potential and build their approach, and Shapo on the Law of Products Liability provides the tools to give you the winning edge. Through a holistic analysis of the law and its principal developments as witnessed in hundreds of cases, this treatise gives litigators a wide variety of perspectives on

potential strategies, and the tools to support those strategies with persuasive arguments. This authoritative two-volume work will enable you to: Assess products liability case potential and build sound litigation strategies Dig deep into products liability law to build creative approaches to litigation Craft a winning case and reap the greatest reward for your clients Find the tools and information to support strategies with persuasive arguments Both federal and state courts contribute a rich mix of decisions to products liability law, which covers both consumer products and occupational hazards. This indispensable resource for the products liability

practitioner helps you prepare your case. Is the product defective? Who is liable? What is the manufacturer's responsibility? Who can be sued? What kind of awards may be realized? How might this be defended? Shapo on the Law of Products Liability also includes coverage of: Asbestos litigation Chinese drywall Food and drug Medical devices Design/manufacturing defects claims Punitive damages Discovery rule Up to date analysis and commentary History and background on products liability law Damages Advertising material Packaging Marshall S. Shapo, the Frederic P. Vose Professor at Northwestern University School of

Law, is a nationally recognized authority on torts and products liability law.

Everything You Need to Know about how World Finances Work

Createspace

Independent Publishing Platform

The second edition of *Sustainable Business* prepares future business leaders to tackle the most crucial social and environmental issues of our time. This engaging textbook provides students with a comprehensive, balanced introduction to integrating sustainable business policies into all core business functions and processes. The text employs a qualitative-based learning process to help students understand how leadership, finance,

accounting, risk management, marketing, supply chain management, and operations can be adapted to meet the sustainability goals of the 21st century.

Looking at sustainable business from the managerial viewpoint, the fully-updated new edition explains how and why business is evolving due to increased consumer and regulatory pressure for sustainable performance. Business topics are first introduced in the same manner as traditional MBA programs, and then examined through the lens of sustainability. The text incorporates real-life examples of social and environmental leadership to demonstrate the

efficacy of good sustainable business decisions, and illustrates the negative ramifications of outdated, purely economic-driven managerial decision-making. Influential concepts based on interdisciplinary research in sustainability are discussed in detail, and practical insights address how to turn policy into practice in the workplace.

Mills & Boon Comics

Springer Nature
This book covers the various advanced reciprocating combustion engine technologies that utilize natural gas and alternative fuels for transportation and power generation applications. It is divided into three major sections

consisting of both fundamental and applied technologies to identify (but not limited to) clean, high-efficiency opportunities with natural gas fueling that have been developed through experimental protocols, numerical and high-performance computational simulations, and zero-dimensional, multizone combustion simulations. Particular emphasis is placed on statutes to monitor fine particulate emissions from tailpipe of engines operating on natural gas and alternative fuels.

Black Americans Who Shook Up the World

Elektor International Media

Upcoming starlet Missy Klein is getting married to Ian Lawson, founder of the SpinTrax

recording label, and From This Moment, Nashville's hottest wedding planners, have gotten the contract to arrange the wedding. There's only one problem? cofounder and photographer Briana Harper had a college romance with Ian, and they're now stuck in a snowed-in cabin! With the relationship warming up faster than the weather outside, Briana and Ian start to reconnect...but Ian's abandonment of his own music career to pursue the business side of things has always irked Briana. She begins to ask herself if she could get together with Ian again, but how is that possible when he's getting married to the mother of his unborn

child?

Maggie for Hire White Wolf Pub

Getting cancer is like a bomb going off in your life. Having chemotherapy can feel like another bomb. If you're getting ready for chemotherapy, you probably have many questions-but searching for answers on the internet can be overwhelming and the pamphlets from your oncologist don't begin to tell you all you need to know. You may be scared, confused or exhausted. You'll want to know what to expect and how to prepare for chemotherapy - and so will your loved ones who are supporting you. In her concise and easy-to-read guidebook, Braving Chemo, Harvard-educated physician and breast cancer

survivor Beverly A. Zavaleta MD cuts through the confusion to provide you with clear answers to your most urgent chemotherapy questions. ¿Can I keep my hair from falling out? ¿What should I eat? ¿How can I keep my spirits up when I'm worried about dying?Combining her medical expertise with a survivor's experience and insight, Dr. Zavaleta provides practical advice on topics such as where to find reliable information about your treatment regimen, what you should take to your chemo session, and how to keep up your strength. Braving Chemo also confronts the challenges of cancer recovery and coping with fear of death. Whether you

are a chemotherapy patient or a cancer caregiver, Braving Chemo is a valuable resource about what to expect during chemo, how to minimize the side effects, and how to live life as normally as possible when life itself is on the line.

A Novel NYU Press

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller

programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines

and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.
