Cambridge International AS and A Level Business Workbook
Hodder Education

This revised set of resources for Cambridge International AS and A Level Business syllabus (9609) is thoroughly updated for the latest version of the curriculum. Written by experienced authors, the Coursebook provides comprehensive coverage of the syllabus. Accessible language combined with the clear, visually-stimulating layout makes this an ideal resource for the course. Questions and explanation of key terms reinforce knowledge; different kinds of activities build application, analytical and evaluation skills; and case studies contextualise the content making it relevant to international learners. It provides thorough examination support for all papers with exam-style questions with each chapter and an extensive Paper 3 style case study with each unit. The student CD-ROM contains revision aids, further questions and activities. A Teacher's CD-ROM is also available.

The proliferation of open banking and open finance regimes across the globe demonstrates an ever-increasing interest of policymakers in empowering customers to take control of their data through innovative data sharing frameworks. These frameworks mostly operate within a single (e.g., financial services) sector but are poised to extend to other parts of the economy in the future – and eventually apply economy-wide. This book articulates the concept of economy-wide customer data sharing (CDS) frameworks, analyses in detail the main challenges associated with the development of such frameworks and is informed by the lessons learned from Australia's world-first cross-sectoral Consumer Data Right regime. It develops a first comprehensive taxonomy of CDS frameworks and offers valuable insights on crucial issues of customer trust, information security, consumer protection and participant regulation. This study, apart from its scholarly importance, has clear practical value. It formulates twelve lessons that will assist governmental officials and other policymakers engaged in establishing and revising data sharing frameworks across the globe. It is essential reading for anyone interested or involved in the law and policy related to the sharing of a most precious resource in the modern economy – customer data.
