**Praxis II Elementary Education Exam Practice Questions**

**and Dumps** Oswaal Books and Learning Private Limited  
It's been four hundred years in the making, but the story of  
Mother Ignacia del Espiritu Santo and her daughters, the  
Religious of the Virgin Mary, is finally about to be told. These  
wonderful sisters' contributions have long been over- looked. Not

only were they the first, oldest, and the largest Filipino female religious order in the Philippines, but the sheer amount of work that they have done for both Catholics and the community deserves to be recognized. Yet, for some reason, the Religious of the Virgin Mary has long remained unnoticed and passed over when it comes to Catholic religious orders. Despite their dedication in the fields of education, health care, social ministry, retreats, evangelization, and more, these sisters have been tragically hidden in the shadows by the church. Thus, the purpose of this book is to thank the sisters for their contributions, both in the Philippines and worldwide, and to recognize their work. I think it's time the public knows what they have done, the care they've taken of the poor and sick, the dedication to the call of duty by their country, the transformation they've been able to make in the lives of those who might not have had any other access to education, the missions that they have taken on in the name of Christ, the trailblazing they have done for other women religious, as well as the laity in access to spiritual formation, direction, and guidance. That is what this book aims to do, to bring this good work to light. Of course I cannot talk about the Religious of the Virgin Mary without spending a considerable amount of time on their foundress, the legendary Venerable Mother Ignacia del Espiritu Santo. It is from her own courage, spirit, and determination that the sisters find their guide today and the vivacity they seek to emulate. This book, thus, also examines the life of this incredible woman, what encouraged her to begin this order despite the numerous boundaries that stood in her way, as well as some of the ideals she held and how they relate to today's society centuries later--the equality of all, the importance of

femininity in the church, and even pro-life issues.

*Proceedings of the First Workshop on African Languages in Basic Education* UPSC PORTAL

The education of young people is context bound. This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education. There is not a single context across this broad geographical expanse, rather different religions, different political systems and different values exert influences that create distinctive programmes that characterise different countries. Yet there are also commonalities such as the post-colonial nature of most of the countries portrayed in this book, determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities. There are also voices of resistance in these chapters, recognising the realities of local contexts but also recognising the need for change. Social studies education in these contexts may well be descended from its origins in North America, but in South and South Asian contexts, it has taken on new purposes, new forms and new values. Education researchers, policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them.

Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeschooled graduates.

Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond.

This volume provides an in-depth, comparative examination of how primary mathematics education is influenced by national education reform, policy, local resources, and culture in three different countries. By drawing on first-hand observations and interviews, as well as analysis of policy documents and learning

resources, the book considers the viability of transferring best practices in primary mathematics education across global contexts. Three diverse countries – Ghana, the US, and Singapore – are explored. Similarities and differences are highlighted, and the influence of national and regional initiatives related to pedagogical strategies, teacher education, and cultural expectations are considered, to offer an insightful examination of how best practices might be shared across borders. This book will benefit researchers, academics, and postgraduate scholars with an interest in international and comparative education, mathematics, and educational policy. Those with a specialization in primary mathematics education, including pedagogy and teacher preparation, will also benefit from this book.
