Teaching Technical  
Communication in the  
Twenty-First Century  
University Press of  
Colorado

The purpose of this book is to move our field's discussion beyond issues of diversity in the practice of technical communication, which is certainly important, to include discussions of how race and ethnicity inform the production and distribution of technical communication in the United States. Equally important, this book is an attempt to uncover those communicative practices used to adversely affect historically marginalized groups and identify new practices that can be used to encourage cultural competence within institutions and communities. This book, like our field, is an interdisciplinary effort. While all authors have taught or practiced technical communication, their backgrounds include studies in technical communication, rhetoric and composition, creative writing, and higher education. For the sake of

clarity, the book is organized into five sections: historical representations of race and ethnicity in health and science communication; social justice and activism in technical communication; considerations of race and ethnicity in social media; users' right to their own language; and communicating identity across borders, cultures, and disciplines.

The History of Technical Communication Routledge Teaching Professional and Technical Communication guides new instructors in teaching professional and technical communication (PTC). The essays in this volume provide theoretical and applied discussions about the teaching of this diverse subject, including relevant pedagogical approaches, how to apply practical aspects of PTC theory, and how to design assignments. This practicum features chapters by prominent PTC scholars and teachers on rhetoric, style, ethics, design, usability, genre, and other central concerns of PTC programs. Each chapter includes a scenario or personal narrative of teaching a particular topic, provides a

theoretical basis for interpreting the narrative, illustrates the practical aspects of the approach, describes relevant assignments, and presents a list of questions to prompt pedagogical discussions. Teaching Professional and Technical Communication is not a compendium of best practices but instead offers a practical collection of rich, detailed narratives that show inexperienced PTC instructors how to work most effectively in the classroom. Contributors: Pam Estes Brewer, Eva Brumberger, Dave Clark, Paul Dombrowski, James M. Dubinsky, Peter S. England, David K. Farkas, Brent Henze, Tharon W. Howard, Dan Jones, Karla Saari Kitalong, Traci Nathans-Kelly, Christine G. Nicometo, Kirk St.Amant

**Three Keys to the Past**  
Pearson College Division  
Rhetoric in the Flesh is the first book-length ethnographic study of the gross anatomy lab to explain how rhetorical discourses, multimodal displays, and embodied practices facilitate learning and technical expertise and how they shape participants' perceptions of the human body. By investigating the

role that discourses, displays, and human bodies play in the training and socialization of medical students, T. Kenny Fountain contributes to our theoretical and practical understanding of the social factors that make rhetoric possible and material in technical domains. Thus, the book also explains how these displays, discourses, and practices lead to the trained perspective necessary for expertise. This trained vision is constructed over time through what Fountain terms embodied rhetorical action, an intertwining of body-object-environment that undergirds all scientific, medical, and technical work. This book will be valuable for graduate and advanced undergraduate courses in technical and professional communication (technical communication theory and practice, visual or multimodal communication, medical technical communication) and rhetorical studies, including visual rhetoric, rhetoric of science, medical rhetoric, material rhetoric and embodiment, and ethnographic approaches to rhetoric. Technical Communication in the Twenty-first

Century Routledge Preparing students of technical communication in the twenty-first century means training them to rhetorically utilize a wide variety of online tools. Technical communicators are now required to employ social media applications on a daily basis to communicate with clients, consumers, colleagues, and other organizations. These online modes have also opened the door to global communication wider and continue to present opportunities and challenges to technical communicators worldwide. Using Japan as a model, this dissertation sought to demonstrate a rhetorical exigency for teaching intercultural social media communication strategies to future technical communicators in the United States. The goal of this dissertation was to ultimately answer the research question: How can American technical communication programs prepare students to act as social media experts in Japanese contexts? To do this, I first conducted a thematic analysis of American technical communication syllabi and found that few engage intercultural social

media in a meaningful way in the classroom. This was followed by a content analysis of the online social media presence of Japanese businesses, which demonstrated that evidence exists for the rhetorical exigency of intercultural social media communication in Japan. Calling on these analyses, this dissertation contributes a blended online service-learning curriculum for teaching intercultural social media in the technical communication classroom. The program described in this project can provide students with the opportunity to interact with Japanese professionals by building a social media presence for a foreign organization, receiving professional feedback on their performance, and adapting their skills as technical communicators for intercultural situations. **A Practicum in a Book** Routledge Annotation An engineer with experience in the automotive and chemical process industries, Budinski has compiled material he used to train new engineers and technicians in an attempt to get his co-workers to document their work in a reasonable manner. He

does not focus on the mechanics of the English language, but on the types of documents that an average technical person will encounter in business, government, or industry. He also thinks that students with no technical background should be able to benefit from the tutorial. c. Book News Inc

*Negotiating Cultural Encounters* Wiley-IEEE Press

Technical Communication in the Twenty-First Century (TCTC) prepares readers to be successful writers and readers of technical communication, regardless of their career path. Featuring a wealth of examples and cases, it emphasizes problem-solving, collaboration, visual rhetoric and usability. Its approach analyzes why something worked or did not work, as well as how to produce the appropriate communication. Now available with the MyTechCommLab online learning tool, this edition features more focus on transnational communication, forty-five new case studies, and new information on the relationship between technology and communication.

A Concise Guide to

Technical Communication University Press of Colorado

Drawing on social justice methodologies and cultural studies scholarship, *Key Theoretical Frameworks* offers new curricular and pedagogical approaches to teaching technical communication. Including original essays by emerging and established scholars, the volume educates students, teachers, and practitioners on identifying and assessing issues of social justice and globalization. The collection provides a valuable resource for teachers new to translating social justice theories to the classroom by presenting concrete examples related to technical communication. Each contribution adopts a particular theoretical approach, explains the theory, situates it within disciplinary scholarship, contextualizes the approach from the author's experience, and offers additional teaching applications. The first volume of its kind, *Key Theoretical Frameworks* links the theoretical with the pedagogical in order to articulate, use, and assess social justice frameworks for designing

and teaching courses in technical communication. Contributors: Godwin Y. Agboka, Matthew Cox, Marcos Del Hierro, Jessica Edwards, Erin A. Frost, Elise Verzosa Hurley, Natasha N. Jones, Cruz Medina, Marie E. Moeller, Kristen R. Moore, Donnie Johnson Sackey, Gerald Savage, J. Blake Scott, Barbi Smyser-Fauble, Kenneth Walker, Rebecca Walton

A Dialogic Approach to Technical Content in the 21st Century Macmillan

This book provides the impetus for a change in the pedagogical approach to metaphor as a rhetorical tool in science. Using as an example the controversy over cloning, the author establishes how scientists should use metaphor to explain science to the public and should be aware of how metaphor can be useful to their research.

Narrating Intercultural Engineering and Technical Communication

Greenwood Publishing Group

*Heroic Technical Writing*, provides the sort of advice young people need to pursue a career in technical writing. It's a set of lessons that they don't teach in colleges and universities, including: Enhancing careers by

managing business relationships responsibly. *Working effectively in any work environment.* Maximizing career opportunities with an English or liberal arts degree. *Managing the business of a freelance technical writer.*

*Innovative Approaches to Teaching Technical Communication* SUNY Press

Author's credits taken from front cover and p. ix.

**Writing a Professional Life** FT Press

This text divides the history of American technical communication into three themes: the importance of visual communication (1791-1887); the power of genre (1791-1980); and the role of technical communicators as innovators within constraints (1948-1954).

**Technical Communication** St. Martin's Press

Tells how to get started as a technical writer, describes technical service agencies, and covers taxes, contracts, finding prospects, sales, business incorporation, and working online.

*Stories of Technical Communicators on and Off the Job* Routledge

Provides a collection of critical essays on the

history of technical communication designed to help guide future research.

Broadview Press  
Digital Literacy for Technical Communication helps technical communicators make better sense of technology's impact on their work, so they can identify new ways to adapt, adjust, and evolve, fulfilling their own professional potential.

This collection is comprised of three sections, each designed to explore answers to these questions: How has technical communication work changed in response to the current (digital) writing environment? What is important, foundational knowledge in our field that all technical communicators need to learn? How can we revise past theories or develop new ones to better understand how technology has transformed our work?

Bringing together highly-regarded specialists in digital literacy, this anthology will serve as an indispensable resource for scholars, students, and practitioners. It illuminates technology's impact on their work and prepares them to respond to the constant changes

and challenges in the new digital universe.

*The Tech Writer's Survival Guide* Pearson

Equipping Technical Communicators for Social Justice Work provides action-focused resources and tools—heuristics, methodologies, and theories—for scholars to enact social justice. These resources support the work of scholars and practitioners in conducting research and teaching classes in socially just ways. Each chapter identifies a tool, highlights its relevance to technical communication, and explains how and why it can prepare technical communication scholars for socially just work. For the field of technical and professional communication to maintain its commitment to this work, how social justice intersects with inclusivity through UX, technological, civic, and legal literacies, as well as through community engagement, must be acknowledged. Equipping Technical Communicators for Social Justice Work will be of significance to established scholar-teachers and graduate students, as well as to newcomers to the field. Contributors: Kehinde Alonge, Alison Cardinal,

Erin Brock Carlson, Oriana Gilson, Laura Gonzales, Keith Grant-Davie, Angela Haas, Mark Hannah, Kimberly Harper, Sarah Beth Hopton, Natasha Jones, Isidore Kafui Dorpenyo, Liz Lane, Emily Legg, Nicole Lowman, Kristen Moore, Emma Rose, Fernando Sanchez, Jennifer Sano-Franchini, Adam Strantz, Cana Uluak Itchuaqiyaq, Josephine Walwema, Miriam Williams, Han Yu

Laying the conceptual groundwork. Oppression -- Justice -- Rearticulating the 3Ps. Positionality -- Privilege -- Power -- Building coalitions. Coalitional action -- Critiques and responses -- Afterword.

Teaching Professional and Technical Communication

Oxford University Press, USA

"This is an English textbook for students taking courses in technical communication"--

*Heroic Technical Writing*

Oxford University Press, USA

The field of technical communication is rapidly expanding in both the academic world and the private sector, yet a problematic divide remains between theory and practice. Here Stuart A. Selber and Johndan Johnson-Eilola, both respected scholars and teachers of technical communication, effectively bridge that gap. *Solving Problems in Technical Communication* collects the latest research and theory in the field and applies it to real-world problems faced by practitioners—problems involving ethics, intercultural communication, new media, and other areas that determine the boundaries of the discipline. The book is structured in four parts, offering an overview of the field, situating it historically and culturally, reviewing various theoretical approaches to technical communication, and examining how the field can be advanced by drawing on diverse perspectives. Timely, informed, and practical, *Solving Problems in Technical Communication* will be an essential tool for undergraduates and

graduate students as they begin the transition from classroom to career.

**Spurious Coin** Infobase Publishing

Plain Language and Ethical Action examines and evaluates principles and practices of plain language that technical content producers can apply to meet their audiences' needs in an ethical way. Applying the BUROC framework (Bureaucratic, Unfamiliar, Rights-Oriented, and Critical) to identify situations in which audiences will benefit from plain language, this work offers in-depth profiles show how six organizations produce effective plain-language content. The profiles show plain-language projects done by organizations ranging from grassroots volunteers on a shoe-string budget, to small nonprofits, to consultants completing significant federal contacts. End-of-chapter questions and exercises provide tools for students and practitioners to reflect on and apply insights from the book. Reflecting global commitments to plain language, this volume includes a case study of a European group based in Sweden along with results from interviews with

plain-language experts around the world, including Canada, England, South Africa, Portugal, Australia, and New Zealand. This work is intended for use in courses in information

design, technical and professional communication, health communication, and other areas producing plain language communication. It is also a crucial

resource for practitioners developing plain-language technical content and content strategists in a variety of fields, including health literacy, technical communication, and information design.
