JIRA Fundamentals | Pluralsight Jira Fundamentals Pluralsight JIRA is a world leading tracker used by large and small teams for planning, building and releasing great software. In this course you will learn how to setup and maintain a JIRA-installation, as well as configuring it for the needs of your organization by using proven best practices. JIRA Fundamentals | Pluralsight JIRA is a world-leading tracker used by large and small teams for planning, building, and releasing great software. In this course, JIRA Fundamentals, we are going to focus on the fundamentals of JIRA. The course is suited both for those who will be using the JIRA cloud platform as well as for those of you who will host it. JIRA Fundamentals | Pluralsight Jira is a very widely used project planning and tracking tool, but it has so many features, options, and customization points that getting started can be challenging. In this course, Jira: Getting Started, you'll focus on getting up to speed and ready to use the tool on a daily basis on your own projects... Jira: Getting Started | Pluralsight JIRA Fundamentals | Pluralsight English | Size: 261.81 MB Genre: eLearning. JIRA is a world leading tracker used by large and small teams for planning, building and releasing great software. JIRA is a world leading tracker used by large and small teams for planning, building and releasing great software. JIRA Fundamentals | Pluralsight - LEARNING FOR LIFE Course Description. JIRA is a world leading tracker used by large and small teams for planning, building and releasing great software. In this course you will learn how to setup and maintain a JIRA-installation, as well as configuring it for the needs of your organization by using proven best

practices. Pluralsight - JIRA Fundamentals - student reviews | CourseTalk JIRA is a world leading tracker used by large and small teams for planning, building and releasing great software. In this course you will learn how to setup and maintain a JIRA-installation, as well as configuring it for the needs of your organization by using proven best practices. JIRA Fundamentals | Pluralsight - DDLValley.cool Jira is a very common planning and tracking tool in the software industry, and a team status tracker is often their most critical information hub. Integrating Jira with other tools the team uses can gain significant benefits to efficiency. Jira Integrations | Pluralsight JIRA is a world-leading tracker used by large and small teams for planning, building, and releasing great software. In this course, JIRA Fundamentals, we are going to focus on the fundamentals of JIRA. The course is suited both for those who will be using the JIRA cloud platform as well as for those of you who will host it. Planning, Tracking, and Releasing Software with Jira ... Jira is a tool with a wealth of customization points, so many that things can sometimes be a little confusing when trying to tailor Jira to your needs. This course, Jira Project Customization, is part of the Planning, Tracking, and Releasing Software with Jira skill path here at Pluralsight, and it will cover how to perform a wide range of Jira customizations to support the practical needs of a team. Jira Project Customization | Pluralsight This Jira training covers the following PMBOK® Process Groups: Planning, Executing, Monitoring and Controlling. Sign up and start your free trial today! Scrum Development with Jira & JIRA Agile | Pluralsight Step 3: Once you have located the user, click on any of their work (commit or ticket) to view in Jira or Bitbucket. You will then be able to identify which user actually authored the commit or ticket. Atlassian cloud changes: What that means | Pluralsight Overview Below is

a guide on how to connect your Rally (CA Agile Central) account to Flow. Rally integrations work with the Work Log report to simultaneously display commit, PR and Rally ticket data. Ticket integrations | Pluralsight The Users page will show you the following information: . User Name - This is the display name that the user will be referred to as in the platform. User's email address - This is the email that will be displayed when referencing this user in the platform.
