 A Companion to Forensic Anthropology presents the most comprehensive assessment of the philosophy, goals, and practice of forensic anthropology currently available, with chapters by renowned international scholars and experts. Highlights the latest advances in forensic anthropology research, as well as the most effective practices and techniques used by professional forensic anthropologists in the field Illustrates the development of skeletal biological profiles and offers important new evidence on statistical validation of these analytical methods. Evaluates the goals and methods of forensic archaeology, including the preservation of context at surface-scattered remains, buried bodies and fatal

fire scenes, and recovery and identification issues related to large-scale mass disaster scenes and mass grave excavation.

Tools and Techniques of Field Work for Archaeologists John Wiley & Sons
 Features articles written by archaeology scholars on such topics as bog bodies, underwater archaeology, the Pyramids of Giza, and the Valley of the Kings
The Oxford Companion to Archaeology Routledge

The Companion to Social Archaeology is the first scholarly work to explore the encounter of social theory and archaeology over the past two decades. Grouped into four sections - Knowledges, Identities, Places, and Politics - each of which is prefaced with a review essay that

contextualizes the history and developments in social archaeology and related fields. Draws together newer trends that are challenging established ways of understanding the past. Includes contributions by leading scholars who instigated major theoretical trends.

Ancient Cities A Companion to the Archaeology of the Ancient Near East Provides a broad view of the history and current state of scholarship on the art of the ancient Near East This book covers the aesthetic traditions of Mesopotamia, Iran, Anatolia, and the Levant, from Neolithic times to the end of the Achaemenid Persian Empire around 330 BCE. It describes and examines the field from a variety of critical perspectives: across approaches and interpretive frameworks, key explanatory concepts, materials and selected media and formats, and zones of interaction. This important work also addresses both traditional and emerging categories of material, intellectual perspectives, and research priorities. The book covers geography and chronology, context and setting, medium and scale, while acknowledging the diversity of regional and cultural traditions and the uneven survival of evidence. Part One of the book considers the methodologies and approaches that the field has drawn on and refined. Part Two addresses terms and concepts critical to understanding the subjects and formal characteristics of the Near Eastern material record, including the intellectual frameworks within which monuments have been approached and interpreted. Part Three surveys the field's most distinctive and characteristic genres, with special reference to Mesopotamian art and architecture. Part Four considers involvement with artistic traditions across a broader reach, examining connections with Egypt, the Aegean, and the Mediterranean. And finally, Part Five addresses intersections with the closely allied discipline of archaeology and the institutional stewardship of cultural heritage in the modern Middle East. Told from multiple perspectives, *A Companion to Ancient Near Eastern Art* is an enlightening, must-have book for advanced undergraduate and graduate students of ancient Near East art and Near East history as well as those interested in history and art history.

A Companion to Gender Prehistory John Wiley & Sons

Well illustrated with nearly 300 line drawings, maps and photographs, *Ancient Cities* surveys the cities of the ancient Near East, Egypt, and the Greek and Roman worlds from an archaeological perspective, and in their cultural and

historical contexts. Covering a huge area geographically and chronologically, it brings to life the physical world of ancient city dwellers by concentrating on evidence recovered by archaeological excavations from the Mediterranean basin and south-west Asia Examining both pre-Classical and Classical periods, this is an excellent introductory textbook for students of classical studies and archaeology alike.

A Companion to the Archaeology of the Roman Republic John Wiley & Sons

Within archaeological studies, land tenure has been mainly studied from the viewpoint of ownership. A host of studies has argued about land ownership on the basis of the simple co-existence of artefacts on the landscape; other studies have tended to extrapolate land ownership from more indirect means. Particularly noteworthy is the tendency to portray land ownership as the driving force behind the emergence of social complexity, a primordial ingredient in the processes that led to the political and economic expansion of prehistoric societies. The association between people and land in all of these interpretive schemata is however less easy to detect analytically. Although various rubrics have been employed to identify such a connection – most notable among them the concepts of ‘cultures,’ ‘regions,’ or even ‘households’ – they take the links between land and people as a given and not as something that needs to be conceptually defined and empirically substantiated. *An Archaeology of Land Ownership* demonstrates that the relationship between people and land in the past is first and foremost an analytical issue, and one that calls for clarification not only at the level of definition, but also methodological applicability. Bringing together an international roster of specialists, the essays in this volume call attention to the processes by which links to land are established, the various forms that such links take and how they can change through time, as well as their importance in helping to forge or dilute an understanding of community at various circumstances.

A Companion to the Archaeology of Religion in the Ancient World John Wiley & Sons

The Cambridge Companion to Historical Archaeology John Wiley & Sons

This book is a comprehensive introduction to ancient Athens, its topography, monuments, inhabitants, cultural institutions, religious rituals, and politics. Drawing from the newest scholarship on the city, this volume examines how the city was planned, how it functioned, and how it was transformed from a democratic polis into a Roman urbs.

A Companion to the Archaeology of Early Greece and the Mediterranean, 2 Volume Set Oxford University Press, USA

A Companion to the Archaeology of Early Greece and the Mediterranean offers an original and inclusive review of two key periods of Greek archaeology, which are typically treated separately—the Late Bronze Age and the Early Iron Age. It presents an in-depth exploration of the society and material culture of Greece and the Mediterranean, from the 14th to the early 7th centuries BC. The two-volume companion sets Aegean developments within their broader geographic and cultural context, and presents the wide-ranging interactions with the

Mediterranean. The companion bridges the gap that typically exists between Prehistoric and Classical Archaeology and examines material culture and social practice across Greece and the Mediterranean. A number of specialists examine the environment and demography, and analyze a range of textual and archaeological evidence to shed light on socio-political and cultural developments. The companion also emphasizes regionalism in the archaeology of early Greece and examines the responses of different regions to major phenomena such as state formation, literacy, migration and colonization. Comprehensive in scope, this important companion: Outlines major developments in the two key phases of early Greece, the Late Bronze Age and the Early Iron Age Includes studies of the geography, chronology and demography of early Greece Explores the development of early Greek state and society and examines economy, religion, art and material culture Sets Aegean developments within their Mediterranean context Written for students, and scholars interested in the material culture of the era, A Companion to the Archaeology of Early Greece and the Mediterranean offers a comprehensive and authoritative guide that bridges the gap between the Late Bronze Age and the Early Iron Age.

The Archaeology Coursebook New Leaf Publishing Group

The Cambridge Companion to Historical Archaeology provides an overview of the international field of historical archaeology (c.AD 1500 to the present) through seventeen specially-commissioned essays from leading researchers in the field. The volume explores key themes in historical archaeology including documentary archaeology, the writing of historical archaeology, colonialism, capitalism, industrial archaeology, maritime archaeology, cultural resource management and urban archaeology. Three special sections explore the distinctive contributions of material culture studies, landscape archaeology and the archaeology of buildings and the household. Drawing on case studies from North America, Europe, Australasia, Africa and around the world, the volume captures the breadth and diversity of contemporary historical archaeology, considers archaeology's relationship with history, cultural anthropology and other periods of archaeological study, and provides clear introductions to alternative conceptions of the field. This book is essential reading for anyone studying or researching the material remains of the

recent past.

The Archaeology of Urban Life in the Ancient Near East and Egypt, Greece and Rome Cambridge University Press

This comprehensive, fully illustrated Companion answers the need for an in-depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field. The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes. In twenty-six authoritative and clearly-written essays, this Companion explores the origins, aims, methods and problems of archaeology. Each essay is written by a scholar of international standing and illustrations complement the text.

A Companion to Cultural Resource Management John Wiley & Sons

A Companion to Archaeology features essays from 27 of the world's leading authorities on different types of archaeology that aim to define the field and describe what it means to be an archaeologist. Shows that contemporary archaeology is an astonishingly broad activity, with many contrasting specializations and ways of approaching the material record of past societies. Includes essays by experts in reading the past through art, linguistics, or the built environment, and by professionals who present the past through heritage management and museums. Introduces the reader to a range of archaeologists: those who devote themselves to the philosophy of archaeology, those who see archaeology as politics or anthropology, and those who contend that the essence of the discipline is a hard science.

A Complete Manual of Field Archaeology Prentice Hall

This unique guide provides an artistic and archaeological journey deep into human history, exploring the petroglyphic and pictographic forms of rock art produced by the earliest humans to contemporary peoples around the world. and tourism, as well as technological and methodological advances in rock art analyses

Archaeology John Wiley & Sons

A Companion to Roman Architecture presents a comprehensive review of the critical issues and approaches that have transformed scholarly understanding in recent decades in one easy-to-reference volume. Offers a cross-disciplinary approach to Roman architecture, spanning technology, history, art, politics, and archaeology Brings together contributions by leading scholars in architectural history An essential guide to recent scholarship, covering new archaeological discoveries, lesser known buildings, new technologies and space and construction Includes extensive, up-to-date bibliography and glossary of key Roman architectural terms

The Oxford Companion to Indian Archaeology Routledge

"Past, present and future "The archaeological materials recovered from the Anyang excavations ... in the period between 1928 and 1937...have laid a new foundation for the study of ancient China (Li, C. 1977: ix)." When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928, the historicity of the Shang dynasty was confirmed beyond dispute for the first time (Li, C. 1977: ix-xi). This excavation thus marked the beginning of a modern Chinese archaeology endowed with great potential to reveal much of China's ancient history.. Half a century later, Chinese archaeology had made many unprecedented discoveries which surprised the world, leading Glyn Daniel to believe that "a new awareness of the importance of China will be a key development in archaeology in the decades ahead (Daniel 1981: 211). This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that "the Golden Age of Chinese archaeology is arriving (Su, B. 1994: 139--140)". In recent decades, archaeology has continuously prospered, becoming one of the most rapidly developing fields in social science in China"--

Brill's Companion to Ancient Macedon Routledge

A Companion to the Archaeology of Religion in the Ancient World presents a comprehensive overview of a wide range of topics relating to the practices, expressions, and interactions of religion in antiquity, primarily in the Greco-Roman world. • Features readings that focus on religious experience and expression in the ancient world rather than solely on religious belief • Places a strong emphasis

on domestic and individual religious practice • Represents the first time that the concept of “lived religion” is applied to the ancient history of religion and archaeology of religion • Includes cutting-edge data taken from top contemporary researchers and theorists in the field • Examines a large variety of themes and religious traditions across a wide geographical area and chronological span • Written to appeal equally to archaeologists and historians of religion

A Companion to the Archaeology of the Ancient Near East Cambridge University Press

Drawing on the latest archaeology, epigraphy and historical interpretation, this major volume presents a survey of ancient Macedon, important parts of which are published by their excavators for the

first time, including the palace of King Philip II. Archaeologists and historians of the ancient Greek worlds will welcome this milestone in the study of this rapidly changing field, packed with new information, interpretations and essential bibliography.

The Science of the Human Past Routledge
This new brief edition pairs two of archaeology's most recognized names -- David Hurst Thomas of the American Museum of Natural History and Robert L. Kelly of the University of Wyoming. Their well-chosen examples show how archaeologists have worked through actual problems in the field and in the lab. After using this book, readers will be better able to ask questions, solve problems, and discern truth from fiction. They will learn about the nature of archaeological data and how

archaeologists do such things as archaeological survey and excavation. They also will develop their sense of scientific logic and gain a better understanding of career opportunities available to archaeologists. This edition's enhanced full-color design improves the visual presentation and enables users to more clearly see the key points of an image. A rich array of supplemental resources includes a new companion website, as well as the option to use the *Doing Fieldwork: Archaeological Demonstrations* CD-ROM, Version 2.0, also developed by the authors.
