**It Ends with Us** Simon and Schuster  
"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and

independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

In this first installment of the Renée Ballard series, #1 bestselling author Michael Connelly introduces a "complicated and driven" young detective fighting to prove herself on the LAPD's toughest beat (The New York Times). Renee Ballard works the midnight shift in Hollywood, beginning many investigations but finishing few, as each morning she turns everything over to the daytime units. It's a frustrating job for a once up-and-coming detective, but it's no accident. She's been given this beat as punishment after filing a sexual harassment complaint against a supervisor. But one night Ballard catches two assignments she doesn't want to part with. First, a prostitute is brutally beaten and left for dead in a parking lot. All signs point to a crime of premeditation, not passion, by someone with big evil on his mind. Then she sees a young waitress breathe her last after being caught up in a nightclub shooting. Though dubbed a peripheral victim, the waitress buys Ballard a way in, and this time she is determined not to give up at dawn. Against orders and her partner's wishes, she works both cases by day while maintaining her shift by night. As the investigations intertwine, Ballard is forced to face her own demons and confront a danger she could never have

imagined. To find justice for these victims who can't speak for themselves, she must put not only her career but her life on the line. Propulsive as a jolt of adrenaline and featuring a bold and defiant new heroine, *The Late Show* is yet more proof that Michael Connelly is "a master of the genre" (Washington Post).

Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 *New York Times* bestselling novel that's perfect for fans of John Green's *The Fault in Our Stars*, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from

anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?

Major New York Times bestseller Winner of the National Academy of Sciences Best Book Award in 2012 Selected by the New York Times Book Review as one of the ten best books of 2011 A Globe and Mail Best Books of the Year 2011 Title One of The Economist's 2011 Books of the Year One of The Wall Street Journal's Best Nonfiction Books of the Year 2011 2013 Presidential Medal of Freedom Recipient Kahneman's work with Amos Tversky is the subject of Michael Lewis's *The Undoing Project: A Friendship That Changed Our Minds* In his mega bestseller, *Thinking, Fast and Slow*, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more

deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic.

Digitaal lezen is sterk in opkomst. Maar hoe gaat het maken en verkopen van een ebook in zijn werk? Het creëren van een ebook in het ePub formaat, de standaard voor ebooks in Nederland, is niet zo eenvoudig als het lijkt; even een manuscript omzetten is er helaas niet bij. Wiebe de Jager beschrijft in deze praktijkgids hoe je een ebook maakt met het open source programma Sigil en hoe je het ebook vervolgens op de markt brengt. Deze gids is interessant voor zowel auteurs die hun ebook in eigen beheer willen uitgeven als uitgevers die aan de slag willen met digitale boeken. Behandeld wordt onder andere het importeren van een manuscript, het indelen in hoofdstukken, het toevoegen van structuur en opmaak, het invoegen van afbeeldingen en een omslag, het bewerken van metadata en het genereren en valideren van een ePub bestand dat gelezen kan worden op

uiteenlopende apparaten, zoals eReaders, pcs, smartphones en tablets. Tot slot wordt ingegaan op de mogelijkheden om ebooks te promoten, distribueren, beveiligen en verkopen. Wiebe de Jager is directeur van uitgeverij Eburon en medeoprichter van eReaders.nl. Hij schrijft veel over ebooks op zijn weblog en in vakbladen. Hij is daarnaast een veelgevraagd spreker op het gebied van digitaal uitgeven en de toekomst van het boek.

Dit boekje laat zien hoe een manuscript met het gratis programma Sigil omgezet kan worden tot een e-book. Mensen met een iPhone of een iPad kunnen digitale boeken kopen in de iBookstore, de boekwinkel van Apple. Wil je een e-book in die store aanbieden, dan gelden er strenge eisen. Het boek geeft het proces van manuscript naar elektronisch boek in grote lijnen weer. Voor het aanbieden van een boek aan de iBookstore heb je bijvoorbeeld wel een Mac-computer (Apple) nodig.

Here is a highly motivating book for grade-school students that will introduce them to many of the world's most popular (and historically significant) scientific experiments. They'll learn about gravity simply by following the acrobatic antics of an ordinary coin. By trying to blow an egg out of a cup, they'll discover the principles of air pressure. Dancing soap bubbles will help them understand the effects of static electricity, and by dropping quarters into a full glass of water without causing it to overflow, they'll study the effects of

surface tension. These and over 40 other experiments have been carefully selected by noted educators Eugene and Asterie Baker Provenzo to familiarize children with classic science experiments involving optics, inertia, air pressure, magnetism, sound, topology, light, density, vibration, prisms, elasticity, gases, vacuum, perspective, geometry, centrifugal force, buoyancy, color, and much more. Some experiments, such as the optical "Newton's Rings" are hundreds of years old. Still others, like the straw lever test, are based on Greek experiments with leverage and the center of gravity — first carried out thousands of years ago. Easy-to-follow instructions and illustrations show youngsters how to perform each experiment, most of which are prefaced with historical background, a list of necessary materials and an explanation of key terms. Almost all experiments can be carried out with common household items (tissue paper, scissors, tapes, rubber balloons, pens, pencils, etc.) and can be worked at home or in the classroom to demonstrate specific scientific principles or to supplement a science-curriculum unit. Sources for all historical illustrations given in the text are listed at the end of the book.

#### Five Feet Apart Simon and Schuster

In the year 1990, when the rest of the world was fast asleep, oblivious to the dangers of Islam, and figures like Geert Wilders and Marie le Pen were still ungerminated seeds, a Dutch Muslim immigrant had already written a book, under the pseudonym Mohamed Rasoel, warning Europeans about the dangers that come with the open-door immigration policy. Immediately upon its publication, the book created a firestorm, making it the most discussed

issue in the country (TV, newspapers and magazines), as reprints of the book sold out within days, until the left-wing government panicked and banned the book. The author went into hiding under police protection, but was taken to court by the Anne Frank Foundation, charged with discrimination, and fined 4000 dollars. Many years later, in 2003, a language professor, T.A. van Dijk, who did a thorough research into the book, wrote a 250 pages book, arguing that the book had not been written by Rasoel, but by a highly respected writer Gerrit Komrij, who in return wrote a 40 pages book, denying the accusations and taking van Dijk to court. The book gained further popularity when, in 2007, the Dutch right-wing party leader Geert Wilders proposed to the parliament that the book be distributed in all secondary schools. Since then, many other authors have also referred to its contents, in books such as *Western Europe and its Islam*, *Defeating Eurabia*, and *Difference Diffidence Threat*. About the contents: with almost every prediction in the book having come true, the author warns that immigrants arrive carrying the same mentality that created the situations they fled from in the first place, only to recreate the same situations in Europe. Furthermore, the book proposes that the outcome of the volatile situation in Europe can either be a civil war, or the sacrificing of parts of Europe and bestowing them to the Muslims. Although the book refers mainly to the Netherlands, it applies to other European countries as well, of course. It is amazing though how everything being said today about Islam had already been said three decades ago, along with many other amazing arguments that people haven't yet considered. This book was translated from Dutch to English, without the

authorization of the author, whose whereabouts and true identity are still a mystery.
