for fire safety in the design, management and use of buildings. What is BS 9999? BS 9999 gives recommendations and guidance on the design, management and use of buildings to achieve reasonable standards of fire safety for all people in and around them. BS 9999:2017 - Tracked Changes Fire safety in the design ... BS 9999 was revised in 2017 to align the standard with current good practice, new technology, and consistency with other fire recently revised safety standards, namely BS 9990 and BS 9991 . The main changes in BS 9999 over the standard it replaces are: BS 9999: Code of practice for fire safety in the design ... The concept behind the development of BS 9999 and BS 7974 is that technical guidance on fire safety is provided at three different levels. This permits a design approach to be adopted that corresponds to the complexity of the building and to the degree of flexibility required. The three levels are as follows: a) General approach. This level is applicable to a majority of building work undertaken within the UK. Revisions To British Standard BS 9999:2017 | Vulcan Fire ... Standard for fire safety in commercial buildings revised BSI, the business standards company, has revised BS 9999:2017 Fire safety in the design, management and use of buildings – Code of practice. The revised standard is intended to provide good practice to safeguard the lives of building occupants and fire-fighters. Standard for fire safety in commercial buildings revised | BSI ROUTINE FIRE DOOR INSPECTIONS AND MAINTENANCE BS 9999:2017 Annex I Routine inspection and maintenance of fire safety installations Six-monthly: Fire doors All fire doors should be inspected every six months. In particular, it should be ensured that: a) heat-activated seals and smoke seals are undamaged; Inspection & maintenance

guide to Fire Doors By taking a more holistic view to fire safety, BS 9999 allows compensatory measures to offset, e.g. travel distances and/ or total escape door width. In a worked example for a supermarket, by following ADB, maximum travel distances of 18 m for egress in a single direction and 45 m for escape in two directions, and a minimum aggregated exit width (after discounting the largest exit) of 7500 mm would need to be applied. Fire safety - Approved Document B vs BS 9999 | NBS BS 9999:2017 Fire safety in the design, management and use of buildings – Code of practice has been updated. The revised standard is intended to provide good practice to safeguard the lives of building occupants and fire-fighters. Standard for fire safety in commercial buildings revised British Standard 9999. BS 9999 : 2017 Code of practice for fire safety in the design, management and use of buildings and is the standard which uses risk profiles instead of prescribed methods as used in ADB.
