*New Issues in Islamic
Finance and Economics*

John Wiley & Sons

This volume highlights a vital developmental stage of Islamic Banking and Finance, focusing on regulatory aspects, regional case studies and International Financial Crisis impacts. It aims to help decision makers identify key factors for the real, sustained development of the Islamic Banking System, nationally, regionally and internationally.

Global Report on Islamic
Finance 2016 Cambridge
Scholars Publishing

Islamic finance is a growing part of the global financial sector. The risks faced by Islamic banks are real, and how well they mitigate them will determine their future. This book answers questions regarding how Islamic Financial Institutions should focus on their risk management practices and the necessary solutions and policy implementation tactics. It also analyses the risk mitigation

techniques Islamic institutions are putting to use, looking at different Islamic banks from across the world to investigate their strategies and solutions. Among the topics discussed here are the implementation and outcomes of Basel III, practical enterprise risk management practices, liquidity risk management, and the success story of the global takaful industry.

Serviceology for Designing the Future

Edinburgh University
Press

This paper provides a conceptual overview of key aspects of the design and implementation of solvency stress testing of Islamic banks. Based on existing regulatory standards and prudential practice, the paper explains how Islamic finance principles and their impact on various risk drivers affect the capital assessment of asset-oriented financial intermediation under stress. The formal specification of these risk factors helps operationalize and integrate the stress testing of Islamic banks within established

frameworks for financial stability analysis.

A Guide for Small and Medium-sized

Enterprises Edward
Elgar Publishing

Alexander von Pock develops a holistic conceptual framework for identifying and testing key success factors of Islamic financial institutions. The framework integrates insights into the current practices of Islamic finance, a variety of theories – namely the market-based view, the resource-based view, and, to some extent, New Institutional Economics approaches – as well as previous research from the fields of strategic management and economics. The author is testing the theoretical framework empirically in a survey of 36 major Islamic financial institutions based in the Gulf Cooperation Council area and in Malaysia.

*A COMPARATIVE STUDY
BETWEEN THE GCC AND
THE U.K.* United Nations
Publications

A second edition of Islamic Finance in the Global Economy, substantially revised and updated to take into

account the recent developments in the field.

Risk Management for Islamic Banks

Cambridge Scholars Publishing

This book provides a useful overall guide to the state of the art in theory and practice of services. It can also serve as a reference book for researchers in various fields, including engineering, marketing, economics, and other disciplines. Advanced works presented here were selected from the proceedings of the Second International Conference on Serviceology (ICServ2014), held September 14–16, 2014.

This book helps readers to understand serviceology, which tackles with a broad range of services, the globalization of the economy and also enhances the quality of life of local residents.

The Growth of Islamic Banking in Indonesia

Probus Professional Pub
Examines the resilience of Islamic banking during the global financial crisis and lessons for risk management. Do Islamic financial institutions perform better than their conventional counterparts during periods of financial stress? To what extent do

systems for managing risk have to be adapted for Islamic financial institutions, given the unique characteristics of their assets and liabilities and the need for shari'ah compliance? These issues have come to prominence since the global financial crisis of 2007-8 and the subsequent recession, and are addressed in this book. The challenges for Islamic financial institutions are explored in an international post Basel II system where banks are required to have more capital and liquidity. Governance issues are also examined, given their influence on client and investor perceptions and their ultimate implications for institutional stability and sustainability. Offers an in-depth assessment of how Islamic banks weathered the financial crisis and what lessons can be learnt. Asks whether Islamic banks are inherently more stable than conventional banks during periods of economic stress. Examines how Islamic banks manage risk, focusing on liquidity risk and the use of forward contracts to mitigate currency risk. Appraises the work of internal shari'ah audit units and

the use of shari'ah reports to reduce non-compliance risks. Features case studies from the Gulf, Malaysia, the UK, Pakistan, Turkey and GCC countries.

Enhancing Financial Inclusion through Islamic Finance, Volume II John Wiley & Sons

This is the third book of the series of Notes on Islamic Economics. It studies the Islamic finance and banking part of Islamic economics in eighteen chapters. chapter 1 foundation of islamic finance chapter 2 principles of islamic finance chapter 3 introduction to islamic finance contracts chapter 4 overview of islamic finance contracts chapter 5 characteristics of islamic finance chapter 6 maqasid al shari'ah in the prohibition of riba chapter 7 islamic financial intermediation chapter 8 comparison of islamic finance with conventional finance chapter 9 islamic banking and development chapter 10 success factors of islamic banks chapter 11 the rise of a power alliance of wealth and shari'ah scholarship chapter 12 strategic trends in islamic banking and finance chapter 13 risk management in

islamic banking chapter 14
 innovation in liquidity management instruments chapter 15
 sukuk: islamic alternative to bonds chapter 16
 service sukuk for financing public utilities chapter 17
 cooperative micro finance: an islamic approach chapter 18
 ethical values in conventional and islamic finance

New Perspectives on Monetary and Financial Issues Springer Nature

In *Understanding Islamic Finance* Muhammad Ayub introduces all the essential elements of this growing market by providing an in-depth background to the subject and clear descriptions of all the major products and processes associated with Islamic finance. Key features include:

- Discussion of the principles of Islamic finance;
- Introduction to the key products and procedures that International Financial Institutions are using or may adopt to fund a variety of clients ensuring Sharī'ah compliance;
- Discussion of the role Islamic finance can play in the development of the financial system and of economies;
- Practical and operational examples that cover deposit and fund

management by banks involving financing of various sectors of the economy, risk management, accounting treatment, and working of Islamic financial markets and instruments. This book is not only an important text for all banks and financial institutions entering this particular market with a commitment to building Islamic financial solutions, but is also essential reading for undergraduate and postgraduate students of Islamic finance.

The Developing Role of Islamic Banking and Finance International Monetary Fund

As an emerging global phenomenon, Islamic economics and the financial system has expanded exponentially in recent decades. Many components of the industry are still unknown, but hopefully, the lack of awareness will soon be stilled. The *Handbook of Research on Theory and Practice of Global Islamic Finance* provides emerging research on the latest global Islamic economic practices. The content within this publication examines risk management, economic justice, and stock market analysis. It is designed for

financiers, banking professionals, economists, policymakers, researchers, academicians, and students interested in ideas centered on the development and practice of Islamic finance.

A Catalyst for Shared Prosperity? Springer Nature

This book is a study of the objectives of Islamic Finance in the modern banking space and offers insight into the effects of changes and developments occurring in Islamic banking products and services. *Risk Management Implementation and Solutions for Islamic Banking and Finance* Edinburgh University Press

Indonesia is the most populous Muslim country in the world. Taking into account also its endowment and potential economic resources, the Islamic banking industry in Indonesia was expected to take on an important role in facilitating more financial resources and to contribute to the internationalization of the Islamic mode of financing particularly in the Asia-Pacific region. However, the reality is far from the expectation. This book aims to clarify the causes

and fundamental constraints leading to the extraordinarily low level of Indonesia's Islamic financial deepening. The authors draw on the traditions of Institutional Economics which are concerned with the rules or mechanisms of creating the 'incentive' and 'threat' for economic players because the rules (institutions) would matter as the determinant for economic development and economic efficiency. This book offers a fairly new analytical lens by hypothesizing that Islamic banks must earn additional profit- the authors coined as 'Islamic bank rent' - to maintain their franchise value as prudent Shari'ah-compliant lenders when compared to conventional banks. The authors argued that insufficient provision of the Islamic bank rent opportunity may have caused the Indonesia's Islamic banks the opportunity to learn and improve their skill and capacity for the credit risk management. The book also offers evidence in support of implementing economic and affirmative policy necessary for incubating and developing the Islamic banking industry in Indonesia and making

Indonesia an international Islamic financial hub in the Asia-Pacific region. This book will be a useful resource for policy makers and researchers interested in Islamic banking in Indonesia.

Islamic Finance in the Global Economy GRIN Verlag

The quest for Critical Success Factors "CSF" in project management in every industry is the aim of company and project manager around the world. This is primarily because of the cost attached to such large-scale projects, especially those financed by governmental entities, municipalities and provinces. Large-scale construction projects in particular have a critical impact on governmental budgets, economic growth, and ecology. As such, determining what critical success factors that directly contribute to cost reduction, timely delivery, improvements in quality of construction and positive impact on the environment can being mutually beneficial to all participants and stakeholders. The state of Oman like other GCC countries has a particular interest in determining such CSF in the post financial crises, where

numerous landmark projects has been frozen due to financial constraints. Therefore, avoiding pitfalls in project management related factors could significantly impact the future role of British and Western construction companies in the Gulf and other parts of the world in post-Brexit U.K. The pressure on British companies is equally higher today than ever before to maximize the effectiveness in implementation of construction related projects internationally, to compete with other European and Chinese construction firms. Innovation and cultural forces are found to play a significant role in cross-cultural project success. Such forces then can be viewed in relation to CSF will ultimately affect all participants and beneficiaries, stakeholders and the environment. Therefore, the attempt to explore varying CSF is more important to governments in developing economies, and private sectors involved in future construction projects, as much as it is important to Western firms attempting to compete and expand their market base in such critical part of the world

and uncertain outlooks for the U.K. economy particularly.

Wiley & Sons

New Issues in Islamic

Finance & Economics:

Progress and Challenges

provides a review of the

main issues and

challenges facing Islamic

finance. The application of

Islamic finance is

currently limited to

banking. This book starts

with an overview of the

factors and motives

behind the development

of Islamic finance. A

critical review of issues

facing the industry is

provided followed by a

detailed analysis of areas

where further attention is

required. The book offers

some original thinking on

issues pertaining to

governance, institutions,

public finance and

economic development

within an Islamic financial

system.

Islamic Fintech IJBMR

Financial Technology

(Fintech) has

revolutionized the

financial world as one of

the fastest-growing

segments in both the

technology and financial

sectors. With the usage of

underlying principles of

Blockchain technology,

Fintech is bringing the

financial community

together and making

financial services

accessible to everyone.

Fintech has far-reaching

implications for Islamic

finance such as banking,

investment, insurance

(takaful) and wealth

management, which are

benefitting from this

usage. This book provides

a comprehensive review

of how Fintech is shaping

the Islamic finance

industry through three

key aspects:

Digitalization,

Development and

Disruption. The book will

provide insight on the

Shariahtech (Fintech in

line with Shariah

principle) and its

application in the Islamic

finance industry. The book

also gives an overview of

Blockchain and Fintech

evolution and how they

act as the building blocks

of the digital financial

landscape. Readers of the

book will also get a

detailed discernment on

the Islamic viewpoint on

cryptocurrency as well as

the application of the

smart contract in different

Islamic financial services.

The book provides

students, academics and

researchers with a

detailed description of the

Blockchain and Fintech

application in Islamic

finance.

Islamic Banking

Springer Science &

Business Media

A comprehensive

overview of key

developments in Islamic

banking In Islamic

Banking in Indonesia,

renowned economist Dr.

Rifki Ismal explores

current issues in Islamic

banking and financial

products with a particular

focus on the danger of

liquidity risk in Indonesia.

It approaches liquidity risk

from the conventional

perspective of

international banking

standards, as well as from

the Islamic banking

perspective. Dr. Ismal also

covers the issues of asset-

liability balancing,

liquidity risk index,

organizational structures

for managing liquidity,

industrial analysis,

withdrawal risk,

bankruptcy risk, moral

hazard risk, and market

risk. Compiling all the

latest academic research

on liquidity risk and other

risks in Islamic banking,

the book provides a

theoretical foundation for

managing risk that will be

highly useful for

researchers on Islamic

banking and practitioners

and academics. Written

by a renowned expert on

Islamic banking who

works on monetary policy

at the central bank of

Indonesia Covers the

latest developments in Islamic banking, particularly liquidity risk, for a rapidly expanding market. Ideal for European and American readers, in addition to Asian readers, who need a fuller understanding of Islamic banking institutions, markets, and products. With the latest academic research and the expertise of a leading practitioner in Islamic banking, this book offers in-depth coverage of the most pressing issues in the field.

The Complete Guide to Selling Mutual Funds, Annuities, and Other Fee-based Investment Products Springer Nature
Islamic finance has started to grow in international finance across the globe, with some concentration in few countries. Nearly 20 percent annual growth of Islamic finance in recent years seems to point to its resilience and broad appeal, partly owing to principles that govern Islamic financial activities, including equity, participation, and ownership. In theory, Islamic finance is resilient to shocks because of its emphasis on risk sharing, limits on excessive risk taking, and strong link to real activities. Empirical

evidence on the stability of Islamic banks, however, is so far mixed. While these banks face similar risks as conventional banks do, they are also exposed to idiosyncratic risks, necessitating a tailoring of current risk management practices. The macroeconomic policy implications of the rapid expansion of Islamic finance are far reaching and need careful considerations.

Handbook of Islamic Banking Edinburgh University Press

This guide is part of the International Trade Centre's (ITC) Trade Finance programme, which provides assistance to help small firms in developing countries develop their capacities to link to global markets through exports. It is intended primarily for trade support institutions of developing countries, and owners or finance managers of small firms. The aim is to help these firms decide whether Islamic banking options are feasible for them, and how to use them. This guide intends to help the non-specialist reader understand and use Islamic finance. Part I - Understanding Islamic Finance - covers the key principles and

perspectives of Islamic banking relevant to small firms. Part II - Using Islamic Finance - consists of a 'how to' guide to use Islamic banking instruments for specific transactions.

The Nature of Islamic Banking and Solvency

Stress Testing -

Conceptual

Considerations John Wiley & Sons

This paper investigates the determinants of the pattern of Islamic bank diffusion around the world using country-level data for 1992 - 2006. The analysis illustrates that income per capita, share of Muslims in the population and status as an oil producer are linked to the development of Islamic banking, as are economic integration with Middle Eastern countries and proximity to Islamic financial centers. Interest rates have a negative impact on Islamic banking, reflecting the implicit benchmark for Islamic banks. The quality of institutions does not matter, probably because the often higher hurdle set by Shariah law trumps the quality of local institutions in most countries. The 9/11 attacks were not important to the diffusion of Islamic banking; but

they coincided with rising oil prices, which are a significant factor in the diffusion of Islamic banking. Islamic banks also appear to be complements to, rather than substitutes for, conventional banks. From Local to Global Perspectives LAP Lambert Academic Publishing

The radical development in the banking sector of Malaysia has created a stiff competition among various banks. These banks need to satisfy the customers to the best for their sustainability. For this purpose, a strong relationship with customers is required. However, for strong relationship organizations are required to identify those factors which can be crowned responsible for it. This issue have raised a critical research agenda that requires attention to identify and test those factors which are crucial for the success of customer relationship. The present study, therefore, has set its objective in identifying and testing these critical factors for successful implementation of customer relationship management (CRM) in banking industry and investigating their impact on customer satisfaction.

To accomplish this goal, the present research has explained related concepts and reviewed literature extensively on the topic. A research framework was developed based on a strong theoretical background. Accordingly, the empirical study was conducted in Klang valley in Malaysia, which is considered the hub of all banking activities. The target population of this study was employees of different banks. Further, data was also collected from selected customers for the purpose of measurement invariance only. Through selfadministered questionnaire 349 usable responses were acquired from employees and 161 usable responses from customers. Analysis of data was conducted using descriptive, exploratory and confirmatory factor analysis. After the satisfactory results of confirmatory factor analysis for all constructs, measurement invariance tests were conducted for customer satisfaction. Subsequently, structural equation modelling (SEM) was then employed to test the hypothesised relationships among the constructs, as postulated in the model. A total of

twelve hypotheses were designed based on the review of the literature, out of which, nine were supported. The findings of this research revealed that technology related critical success factors (CSFs) significantly impact business process CSFs, privacy, trust, and customer satisfaction. It was also exposed that human related CSFs have a positive effect on business process CSFs. Further, it was revealed that privacy partially mediates the relationship between technology CSFs and trust. Similarly, the relationship between technology CSFs and customer satisfaction was also partially mediated by trust. Interestingly the findings also revealed that privacy has a direct positive effect on trust, whereas, trust has a direct positive effect on customer satisfaction. The findings of this research are valuable asset for the banking industry in Malaysia, especially those who are struggling to implement CRM successfully and also wish to enhance customer satisfaction. Academicians, practitioners, researchers, and policy-makers can also benefit from this research and its findings.
