Publication

These packs of test papers provide parental- or self-assessment that can be easily carried out at home. Each pack contains three sets of assessment test papers. The questions have been written by experienced teachers and are based on the programme of study for Key Stage 3.

The Times Index Letts and Lonsdale

Reflective practice is at the heart of effective teaching, and this book helps you develop into a reflective teacher of Science. Everything you need is here: guidance on

developing your analysis and self-evaluation skills, the knowledge of what you are trying to achieve and why, and examples of how experienced teachers deliver successful lessons. It includes advice about obtaining your first teaching post, and about continuing professional development. The book shows you how to plan creative lessons, how to make good use of resources and how to assess pupils' progress effectively. Each chapter contains points for reflection, which encourage you to break off from your reading and think about the challenging questions that you face as a new teacher. The book comes with access to a companion website, [www.sagepub.co.uk/secondary](http://www.sagepub.co.uk/secondary), where you will find: - Videos of real lessons so you can see the skills discussed in the text in action - Links to a range of sites that provide useful additional support - Extra planning and resource materials. If you are training to teach science this book will help you to improve your classroom performance, by providing you with practical advice, but also by helping you to think in depth about the key

issues. It also supplements guidance on undertaking a research project with examples of the research evidence that is needed in academic work at Masters level, essential for anyone undertaking an M-level PGCE.

**KS3 Science** Taylor & Francis

*Ks3 Success Workbook Science 3-6* Coordination Group Publication

This book contains everything you need to know to get started as an online tutor. It covers the essentials of tutoring, choosing your tech and

software, managing homework, and getting set up alongside detailed guidance focusing on each level of tuition. With techniques developed through research and first-hand experience, the author explains exactly how to turn existing subject knowledge into effective tutoring for students of all ages in a variety of subjects.

Divided into two parts, the first answers the logistical questions facing every new tutor such as: what equipment do I need? Where can I apply? How much should I charge?

The second half focuses on how to tutor different age groups effectively and subject-specific areas including English, Maths, and Science, as well as the author's tried-and-tested '5 step' process for choosing a subject, assessing a student, and planning their first lessons. There is also information on how to support students writing personal statements and applying to university, as well as teaching English as a Second Language. Alongside tailored, up-to-date information on available software, hardware, exam specifications, and the online tutoring marketplace, the book

contains a 10-week timetable of adaptable lesson plans so new tutors can get started immediately. Finally, there are two additional downloadable chapters which expand on less common subjects and another which includes a digital download of every resource from the book. With suggestions for resources, homework, and timings to support you at every stage, this is an essential read for anyone wanting to succeed as an online tutor.

#### **Improving Secondary Science Teaching** Letts and Lonsdale
