Building a corporate intranet requires integrating two very different technologies; web development tools and enterprise-wide legacy systems. Few people possess enough experience in both areas to successfully make these technologies work together. The authors, leading consultants at BSG, explain the tools and techniques necessary for building an Intranet system. This book will show how to plan, design and build a corporate intranet system, including how to arrange and manage the project team and what tools for building a system are available, including HTML, Java, and Shockwave.

THE MOST COMPREHENSIVE COLLECTION OF PROBLEM-SOLVING TOOLS, GAMES AND TECHNIQUES USED BY BRAINSTORMERS, GAMECHANGERS AND TRAILBLAZERS. As working life becomes more complex, we are increasingly faced with problems which may at first seem insoluble. The Smart Solution Book is your guide to solving these problems, whatever their size. The Smart Solution Book explains each tool in detail – what it is, when and how to use it, its strengths and its limitations. The tools range from quick fixes, which can be used by someone working alone, to large scale solutions which can be used by groups of 100 and more. You can also use the tools separately or in combination with each other. • Frame problems so they can be solved • Find a solution to even the most intractable problem • Enjoy the process of problem solving, whether alone or in collaboration with others • Become more creative in your thinking so that, over time, solutions begin to present themselves The Smart Solution Book will change your way of thinking about business problems: apply the techniques and see the solutions unfold. “The essential guide for any problem solving situation. Effective, practical and very accessible. Highly recommended.” Chris Garthwaite, CEO CGA Consulting “There isn't a single individual or organisation that could fail to benefit from the many practical approaches to problem-solving in this book. Everyone should read it!” Andrew Hilton, Managing Director, Corporate Training Partnerships Ltd “F. Durrenmatt says 'What concerns everyone, can only be solved by everyone' - and David's book is the practical guide to getting everyone fully engaged with a creative technique to solve any of your challenges.” Peter Schwanh” ußer, Partner, papilio ag, Zurich

World-class organizations, those with the most effective investor relations, provide the financial community with information that is candid, open, specific, timely, and future oriented. Higgins selects the best of these companies and finds that the benefits of open disclosure include lower cost of capital, improved liquidity, a larger and better informed analyst following, and more "patient" investors. His contributing authors, all in high places at topflight organizations, provide state-of-the-art approaches to strategic financial communication and give first hand-pooofs that open disclosure truly works.

Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities. Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.
