 'Wonderful...concise, witty, effortlessly learned.' Sunday Times How does Magwitch swim to shore with a great iron on his leg? Where does Fanny Hill keep her contraceptives? Whose side is Hawkeye on? And how does Clarissa Dalloway get home so quickly? In this new edition sequel to the enormously successful *Is Heathcliff a Murderer?*, John Sutherland plays literary detective and investigates 32 literary conundrums, ranging from Daniel Defoe to Virginia Woolf. As in its universally loved predecessor, the questions and answers are ingenious and convincing, and return the reader with new respect to the great novels that inspire them.

Critical Thinking to Improve Problem-Solving and Decision-Making Skills

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?*

The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time.

*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science

prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

NEW YORK TIMES BESTSELLER "Freaky pleasure...it scratches a nostalgic itch for those who grew up on Saturday morning Scooby-Doo cartoons and sugar-bombed breakfast cereal" --USA Today

"Deliriously wild, funny and imaginative. Cantero is an original voice." --Charles Yu, author of *How to Live in a Science Fictional Universe* With raucous humor and brilliantly orchestrated mayhem, *Meddling Kids* subverts teen detective archetypes like the Hardy Boys, the Famous Five, and Scooby-Doo, and delivers an exuberant and wickedly entertaining celebration of horror, love, friendship, and many-tentacled, interdimensional demon spawn.

SUMMER 1977. The Blyton Summer Detective Club (of Blyton Hills, a small mining town in Oregon's Zoinx River Valley) solved their final mystery and unmasked the elusive Sleepy Lake monster—another low-life fortune hunter trying to get his dirty hands on the legendary riches hidden in Deboën Mansion. And he would have gotten away with it too, if it weren't for those meddling kids. 1990. The former detectives have grown up and apart, each haunted by disturbing memories of their final night in the old haunted house. There are too many strange, half-remembered encounters and events that cannot be dismissed or explained away by a guy in a mask. And Andy, the once intrepid tomboy now wanted in two states, is tired of running from her demons. She needs answers. To find them she will need Kerri, the one-time kid genius and budding biologist, now drinking her ghosts away in New York with Tim, an excitable Weimaraner descended from the original canine member of the club. They will also have

to get Nate, the horror nerd currently residing in an asylum in Arkham, Massachusetts. Luckily Nate has not lost contact with Peter, the handsome jock turned movie star who was once their team leader . . . which is remarkable, considering Peter has been dead for years. The time has come to get the team back together, face their fears, and find out what actually happened all those years ago at Sleepy Lake. It's their only chance to end the nightmares and, perhaps, save the world. A nostalgic and subversive trip rife with sly nods to H. P. Lovecraft and pop culture, Edgar Cantero's *Meddling Kids* is a strikingly original and dazzling reminder of the fun and adventure we can discover at the heart of our favorite stories, no matter how old we get.

[Making It all Work](#) Macmillan

Virgil Flowers will have to watch his back--and his mouth--as he investigates a college culture war turned deadly in another one of Sandford's "madly entertaining Virgil Flowers mysteries" (The New York Times Book Review). At the local state university, two feuding departments have faced off on the battleground of science and medicine. Each carries their views to extremes that may seem absurd, but highly educated people of sound mind and good intentions can reasonably disagree, right? Then a renowned and confrontational scholar winds up dead, and Virgil Flowers is brought in to investigate . . . and as he probes the recent ideological unrest, he soon comes to realize he's dealing with people who, on this one particular issue, are functionally crazy. Among this group of wildly impassioned, diametrically opposed zealots lurks a killer, and it will be up to Virgil to sort the murderer from the mere maniacs.

The Sequel to Catch-22 Berrett-Koehler Publishers

From the winner of the Nobel Prize in Literature and author of the Booker Prize-winning novel *The Remains of the Day* In the face of the misery in his homeland, the artist Masuji Ono was unwilling to devote his art solely to the celebration of physical beauty. Instead, he put his work in the service of the imperialist movement that led Japan into World War II. Now, as the mature Ono struggles through the aftermath of that war, his memories of his youth and of the "floating world"—the nocturnal world of pleasure, entertainment, and drink—offer him both escape and redemption, even as they punish him for betraying his early promise. Indicted by society for its defeat and reviled for his past aesthetics, he relives the passage through his personal history that makes him both a hero and a coward but, above all, a human being.

The Art and Science of Prediction

Bethany House

A darkly comic and ambitious sequel to the American classic *Catch-22*. In *Closing Time*, Joseph Heller returns to the characters of *Catch-22*, now coming to the end of their lives and the century, as is the entire generation that fought in World War II: Yossarian and Milo Minderbinder, the chaplain, and such newcomers as little Sammy Singer and giant Lew, all linked, in an uneasy peace and old age, fighting not the Germans this time, but The End. *Closing Time* deftly satirizes the realities and the myths of America in the half century since WWII: the absurdity of our politics, the decline of our society and our great cities, the greed and hypocrisy of our business and culture -- with the same ferocious humor as *Catch-22*. *Closing Time* is outrageously funny and totally serious, and as brilliant and successful as *Catch-22* itself, a fun-house mirror that captures, at once grotesquely and accurately, the truth about ourselves. LONGLISTED FOR THE NATIONAL BOOK AWARD • One of today's most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • ONE OF THE BEST BOOKS OF THE YEAR: Time, The Washington Post, St. Louis Post-Dispatch, Ms. magazine, BookRiot, Library Journal • LONGLISTED FOR THE ANDREW CARNEGIE MEDAL • “This is the book I’ve been waiting for.”—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Heather McGhee’s specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis of 2008 to rising student debt to collapsing public infrastructure, she found a root problem: racism in our politics and policymaking. But not just in the most obvious indignities for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this

country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world’s advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can’t do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game.
