HINTON ROWAN

Bulletin Rodale Books

How Victorian male doctors used false science to argue that women were unfit for anything but motherhood—and the brilliant doctor who defied them After Elizabeth Blackwell became the first woman to graduate from medical school, more women demanded a chance to study medicine. Barred entrance to universities like Harvard, women built their own first-rate medical schools and hospitals. Their success spurred a chilling backlash from elite, white male physicians who were obsessed with eugenics and the propagation of the white race. Distorting Darwin's evolution theory, these haughty physicians proclaimed in bestselling books that women should never be allowed to attend college or enter a profession because their menstrual cycles made them perpetually sick. Motherhood was their constitution and duty. Into the midst of this turmoil marched tiny, dynamic Mary Putnam Jacobi, daughter of New York publisher George Palmer Putnam and the first woman to be accepted into the world-renowned Sorbonne medical school in Paris. As one of the best-educated doctors in the world, she returned to New York for the fight of her life. Aided by other prominent women physicians and suffragists, Jacobi conducted the first-ever data-backed, scientific research on women's reproductive biology. The results of her studies shook the foundations of medical science and higher education. Full of larger than life characters and cinematically written, *The Cure for Women* documents the birth of a sexist science still haunting us today as the fight for control of women's bodies and lives continues.

Drug Safety St. Martin's Press

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

La doctora Cole Routledge

El retrato de una valiente mujer dispuesta a seguir sus sueños. Una inesperada nueva vida y un destino al que no puede escapar. Tras el éxito clamoroso de *El médico y Chamán*, Noah Gordon pone punto final, con *La doctora Cole*, a la historia de una familia inolvidable. Norteamérica, siglo XX. Roberta Jeanne d'Arc Cole está muy cerca de cumplir su sueño. A punto de ser nombrada subdirectora de medicina en un hospital de Boston, casada con un cirujano y dueña de una residencia en la histórica calle Brattle en Cambridge y una casa de verano en las colinas de Berkshire, no se espera que, de golpe y porrazo, todo se desmorone. Su

género y su trabajo en una clínica de abortos le cuestan el nombramiento en el hospital y su matrimonio. Tratando de recuperarse, decide dejar su apartamento en Boston para volver al campo y trabajar como médico rural. Será allí, en las colinas de Massachussets, donde redescubrirá ese don de adivinación que ha caracterizado a su familia y seguirá luchando por el derecho de cada mujer a elegir sobre su cuerpo, al mismo tiempo que reconoce su propio deseo de maternidad.

Denver Medical Times Open Road Media

Includes a list of the names of steamboats that have navigated the upper Mississippi above St. Louis from 1823 to the close of navigation in 1896; and the dates of opening and closing of navigation from 1856, when such a record was begun, to 1896.

African Proverbs for All Ages Penguin

It has been said that a proverb is a short sentence based on long experience. Whether you're young or old, proverbs can open your mind to new ways of seeing the world. We underestimate children, assuming they are incapable of understanding metaphor and deeper meaning. Children learn in multiple ways, but for each method by which they learn, they need engaged imagination and ignited visual sensibilities. And as adults, we underestimate ourselves when we allow our lives to be about practical matters only. Proverbs can stir our soul and spark our imagination. In *African Proverbs for All Ages*, noted anthropologist and educator Dr. Johnetta Betsch Cole and award-winning illustrator Nelda La Teef invite children and adults to explore and reflect on complex notions about relationships, identity, society, and the human condition.

Hearings Punto de Lectura

From the international bestselling author of *Ketotarian* comes a revolutionary new plan to discover the foods your unique body loves, hates, and needs to feel great. In *Dr. Will Cole's game-changing new book*, readers will discover how inflammation is at the core of most common health woes. What's more, it exists on a continuum: from mild symptoms such as weight gain and fatigue on one end, to hormone imbalance and autoimmune conditions on the other. How you feel is being influenced by every meal. Every food you eat is either feeding inflammation or fighting it. Because no one else is you, the foods that work well for someone else may not be right for your body. At heart, *The Inflammation Spectrum* is about learning to love your body enough to nourish it with delicious, healing foods. You'll find insightful quizzes and empowering advice to put you on a path toward food freedom and overall healing, once and for all.

1683-1694 ROCA EDITORIAL

After a divorce, a woman physician forgoes a career in a prestigious hospital for a private practice in a small town in New

England. Hoping for a simpler and richer life, she finds herself facing the same pressing issues she had hoped to leave behind in Boston.

New York Medical Journal

This collection examines education in the light of a politics of becoming. It takes a non-hierarchical transdisciplinary approach, challenging the macropolitics of pre-established governmental and economic agendas for education. Drawing on the philosophy of Gilles Deleuze and Felix Guattari, the contributors consider questions such as how education might engage a politics of becoming, and how education and becoming function in a society of control. Since Deleuze and Guattari contend that a society is defined by its becomings, its transformations, this collection asks how education, itself a process in becoming, may contribute "collective creations" to a society in continual flux. The chapters bring theory and praxis together, deploying power, affect, cartography, space, relationality, assemblage and multiple literacies in order to experiment with music, art, language, teacher education, curriculum and policy studies. This collection is an innovative resource, creating an encounter with the macropolitics of education, and altering teaching, learning, evaluation and curriculum. This book was originally published as a special issue of *Discourse: Studies in the Cultural Politics of Education*.

The Luyceumite and Talent

NEW YORK TIMES BESTSELLER • "Dr. Will Cole clearly cares about his patients' health, and he addresses the widespread misconceptions about intermittent fasting while giving readers a tailored week-by-week plan to get back in touch with what their body truly needs."—Mark Hyman, MD, director, the Cleveland Clinic Center for Functional Medicine and author of *Food* "Intuitive Fasting makes both the science and user-friendly application of this exciting approach to human nutrition available for everyone."—David Perlmutter, MD, FACN, author of *Grain Brain* and *Brain Wash* The most effective and achievable guide to intermittent fasting, outlining a unique plan that merges the science behind fasting with a holistic approach to eating, from the bestselling author of *Ketotarian* and *The Inflammation Spectrum* For some, the idea of fasting by eating only one or two meals a day sounds like an extreme and overly restrictive dieting tactic. But the truth is, our daily eating schedule—three meals a day, plus snacks—does not necessarily reflect our bodies' natural cycles. In fact, eating three meals every day can cause metabolic inflexibility, which can lead to inflammation, fatigue, and chronic health problems. For millions of years, our bodies have actually functioned best with periodic times of fasting. With his fresh new approach to fasting, bestselling author and functional medicine

expert Dr. Will Cole gives you the ability to take control of your hunger and make intermittent fasting intuitive. You'll get in touch with your instinctive eating patterns and become healthier and more mindful about how and when you eat. Intuitive Fasting will show you how to find metabolic flexibility—and once you've reached it, you can trust your body to function at optimal capacity, whether you've eaten six minutes ago or six hours ago. During his 4-Week Flexible Fasting Plan, Dr. Cole will guide you through varying intermittent fasting windows, with each week of the plan tailored to focus on a different aspect of your health. He illustrates the most effective ways to fast and eat to amplify the health benefits of intermittent fasting, balancing rest and repair with clean, nutrient-dense, delicious foods. By the end of the four weeks, you will have all the tools necessary to:

- Reset your body
- Recharge your metabolism
- Renew your cells
- Rebalance your hormones

Along with more than 65 recipes, you'll also find a maintenance plan, so you can adapt fasting and feeding windows to work sustainably with your lifestyle.

An orphan leaves Dark Ages London to study medicine in Persia in this "rich" and "vivid" historical novel from a New York Times–bestselling author (The New York Times). A child holds the hand of his dying mother and is terrified, aware something is taking her. Orphaned and given to an itinerant barber-surgeon, Rob Cole becomes a fast-talking swindler, peddling a worthless medicine. But as he matures, his strange gift—an acute sensitivity to impending death—never leaves him, and he yearns to become a healer. Arab madrassas are the only authentic medical schools, and he makes his perilous way to Persia. Christians are barred from Muslim schools, but claiming he is a Jew, he studies under the world's most renowned physician, Avicenna. How the woman who is his great love struggles against her only rival—medicine—makes a riveting modern classic. The Physician is the first book in New York Times–bestselling author Noah Gordon's Dr. Robert Cole trilogy, which continues with Shaman and concludes with Matters of Choice.
