Becoming a World-Class University

Springer

This book contains 35 papers from the Tourism Outlook Conference held in Lombok, Indonesia in July 2015. The book presents comprehensive discussions on sustainability in the tourism industry. It includes research on various constituents of the tourism sector and analyses of each of them from a sustainability standpoint. Case

studies that are global in nature are presented to show how sustainable applications can be used and how concerns can be addressed. The book is a response to rapid change in contemporary tourism trends brought about by global economic and social forces such as development pressures, population growth, major resource extraction, industrial fishing, global climate change and steadily rising sea levels. *Balancing Development and Sustainability in Tourism Destinations* serves as a platform for students and educators, government agency

employees, hospitality and tourism industry practitioners, public and private land managers, community development workers, and others interested in identifying practical solutions, charting new directions, and creating opportunities for sustainable tourism development.

Aquaponics Food Production Systems

Crime And Behaviour: An Introduction To Criminal And Forensic Psychology McGraw Hill Professional

Crime and Behaviour: An Introduction to Criminal and Forensic Psychology is the first textbook to provide a detailed overview of criminal psychology in Singapore. The textbook puts together ideas relating to crime, crime prevention, and criminal psychology, as it occurs in the Singaporean context. While leveraging on psychology as an anchor, the book adopts a multidisciplinary perspective and examines the forensic sciences angle, legal issues, and the investigative

perspectives of crimes. The chapters cover criminal justice agencies in Singapore, theories of crime, deception and lying behaviors, sex crimes, violent crimes, crime prevention, terrorism, and psychology applied in legal settings. Each chapter contains case studies of actual cases and ends with questions for discussion and research, making this a valuable text for courses in university and in law enforcement settings. This textbook has several unique features, such as:

Indigenous knowledge for climate change assessment and adaptation
Amsterdam University Press

This open access book addresses a wide variety of events and technologies concerning the sago palm, ranging from its botanical characteristics, culture and

use to social conditions in the places where it is grown, in order to provide a record of research findings and to benefit society. It discusses various subjects, including the sago palm and related species; differentiation of species of starch-producing palm; habitat, morphological, physiological and growth characteristics; culture and management; productivity of carbon dioxide; starch extraction and manufacture; characteristics and utilization of starch; and cultural anthropological and folkloristic aspects. Problems such as food shortages due to increasing populations, global warming and climate change, and decreasing reserves of oil and other underground resources, have become more pressing in recent years. In the context of these

problems, the book examines the role of the sago palm in sustainable food production, in the manufacture of other foodstuffs, as a raw material for ethanol and in the manufacture of biodegradable plastics. In addition to academics, this book will be useful to researchers and government officials working for international agencies, national governments, municipalities, and other research organizations; technicians, researchers, managers, entrepreneurs, and others working in industries such as agriculture, plant production, food production, manufacturing, chemical engineering, energy production, and distribution.

Theology for Ministry is for beginning

ministry students, seasoned lay leaders, and anyone in between who wants to learn more about the faith that feeds their call to serve. Six easy-to-read chapters introduce the main areas of theology that every lay minister ought to know: the notion of vocation, the doctrine of God, Jesus Christ, the Holy Spirit, church, and ministry. By sharing personal stories and simple examples, Edward Hahnenberg brings the Bible to life and dusts off ancient church doctrines—revealing the many ways our tradition can inspire the work of lay ministers today.

Introducing Language Typology
Elsevier Health Sciences

This volume establishes a clear link between good nutrition and high productivity. It demonstrates that

ensuring that workers have access to nutritious, safe and affordable food, an adequate meal break and decent conditions for eating is not only socially important and economically viable but a profitable business practice too. Through case studies from a variety of enterprises in 28 industrialized and developing countries, the book offers valuable and practical food solutions which can be adapted to workplaces of different sizes and with different budgets. It also addresses an often-overlooked issue in nutrition: access to clean drinking water. Relevant laws, regulations and guides pertaining to meal breaks and workplace nutrition are also highlighted in this volume, and an extensive section containing checklists and other useful resources for unions,

employers and governments is included. *Atomic Force Microscopy* Springer
This edited volume addresses the impacts of climate change on Pacific islands, and presents databases and indexes for assessing and adapting to island vulnerabilities. By analyzing susceptibility variables, developing comprehensive vulnerability indexes, and applying GIS techniques, the book's authors demonstrate the particular issues presented by climate change in the islands of the Pacific region, and how these issues may be managed to preserve and improve biodiversity and human livelihoods. The book first introduces the issues specific to island communities, such as high emissions impacts, and discusses the importance of the lithological traits of Pacific islands

and how these physical factors relate to climate change impacts. From here, the book aims to analyze the various vulnerabilities of different island sectors, and to formulate a susceptibility index from these variables to be used by government and planning agencies for relief prioritization. Such variables include tropical cyclones, built infrastructures, proximity to coastal areas, agriculture, fisheries and marine resources, groundwater availability, biodiversity, and economic impacts on industries such as tourism. Through the categorization and indexing of these variables, human and physical adaptation measures are proposed, and support solutions are offered to aid the inhabitants of affected island countries. This book is intended for policy makers,

academics, and climate change researchers, particularly those dealing with climate change impacts on small islands.

John Nash, Game Theory, and the Modern Quest for a Code of Nature

Springer

Health and Wellness Tourism takes an innovative look at this rapidly growing sector of today's thriving tourism industry. This book examines the range of motivations that drive this diverse sector of tourists, the products that are being developed to meet their needs and the management implications of these developments. A wide range of international case studies illustrate the multiple aspects of the industry and new and emerging trends including spas, medical wellness, life-coaching,

meditation, festivals, pilgrimage and yoga retreats. The authors also evaluate marketing and promotional strategies and assess operational and management issues in the context of health and wellness tourism. This text includes a number of features to reinforce theory for advanced students of hospitality, leisure and tourism and related disciplines.

Masters' Essays Rowman & Littlefield

Since the second edition of Pediatric Chest Imaging was published in 2007, there have been further significant advances in our understanding of chest diseases and continued development of new imaging technology and techniques. The third, revised edition of this highly respected reference publication has been thoroughly updated to reflect this

progress. Due attention is paid to the increased role of hybrid imaging, and entirely new chapters cover topics such as interventional radiology, lung MRI, functional MRI, diffuse/interstitial lung disease, and cystic fibrosis. As in previous editions, the focus is on technical aspects of modern imaging modalities, their indications in pediatric chest disease, and the diagnostic information that they supply. Pediatric Chest Imaging will be an essential asset for pediatricians, neonatologists, cardiologists, radiologists, and pediatric radiologists everywhere.

The Broadcast Announcing Worktext provides you with the skills, techniques, and procedures necessary to enter this

highly competitive field of broadcast performance. In addition to the principles of good performance, this book addresses the importance of audience and how to communicate effectively to various groups. Television and radio studio environments, announcer specializations and responsibilities, and developing a broadcast delivery style are just a few of the many topics covered. Factual information is presented in brief, easy-to-digest modules and is enhanced with self-study questions and projects. The self-study provides an immediate check on what you learn, and the projects allow for a practical hands-on application of key concepts in the material. The worktext format, with many real-life examples, combines both traditional

teaching and practical experience. A companion CD illustrates techniques and concepts in each chapter with audio and visual examples. This third edition will give you knowledge of other non-traditional forms of announcing, such as online radio announcing, podcast announcing, and other forms of online announcing, such as online shows, clips, and news. * New coverage of internet radio announcing techniques and other forms of distribution gives the readers a broader view of broadcast outlets * Presented in brief, easy-to-digest modules with self-study questions and projects that encourage active participation * CD with samples of broadcast and radio performances for enhanced learning
IGI Global

Catholic ecclesiology stands at the threshold of a new moment in the reception of the Second Vatican Council. The election of Pope Francis—coinciding with the fiftieth anniversary of the council—has inspired a fresh consideration of its teaching in such diverse areas as ecumenism, inculturation, missiology, and ministry. The chapters in this volume have their origin in a special symposium that called together over forty of the leading Catholic scholars from throughout North America in order to discuss the future of theological reflection on the church. The nine essays in this volume guided that conversation and offer an entry into some of the most pressing issues in ecclesiology today.

Sago Palm UNESCO Publishing

This book covers a significant number of R&D projects, performed mostly after 2000, devoted to the understanding and prevention of performance degradation processes in polymer electrolyte fuel cells (PEFCs). The extent and severity of performance degradation processes in PEFCs were recognized rather gradually. Indeed, the recognition overlapped with a significant number of industrial demonstrations of fuel cell powered vehicles, which would suggest a degree of technology maturity beyond the resolution of fundamental failure mechanisms. An intriguing question, therefore, is why has there been this apparent delay in addressing fundamental performance stability requirements. The apparent answer is that testing of the power system under fully realistic

operation conditions was one prerequisite for revealing the nature and extent of some key modes of PEFC stack failure. Such modes of failure were not exposed to a similar degree, or not at all, in earlier tests of PEFC stacks which were not performed under fully relevant conditions, particularly such tests which did not include multiple on-off and/or high power-low power cycles typical for transportation and mobile power applications of PEFCs. Long-term testing of PEFCs reported in the early 1990s by both Los Alamos National Laboratory and Ballard Power was performed under conditions of constant cell voltage, typically near the maximum power point of the PEFC.

Climate Change and Impacts in the Pacific UNESCO

Talley and O'Connor's *Clinical Examination Essentials 5e* provides an introduction to the skills required to successfully pass your clinical exams. It offers tips on how to impress your examiners and highlights key steps in taking a history and conducting a physical examination. With practice these will become second nature, even under the stress of exam conditions. We hope that Talley and O'Connor's *Clinical Examination Essentials* inspires you to master your clinical skills and embark on a successful medical career. If you are looking to further develop your history taking and examination techniques, Talley and O'Connor's *Clinical Examination: A Systematic Guide to Physical Diagnosis* provides greater detail (and more jokes). Talley &

O'Connor exam hints present handy information which assists students and junior doctors in correctly diagnosing patients OSCE hints panel at the end of each chapter provides practice OSCE-style scenarios and answers to test all skills required for the OSCEs Question Boxes provide a checklist of questions which students as examiners should pose to patients to enable them to correctly identify the presenting symptoms required for an accurate diagnosis Includes an Enhanced eBook version with purchase. The enhanced eBook allows the end user to access all of the text, figures, and references from the book on a variety of devices. New introductory chapter on how to pass your clinical exams and the objective structured clinical examination (OSCE)

Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.
