 face2face Second edition is the flexible, easy-to-teach, 6-level course (A1 to C1) for busy teachers who want to get their adult and young adult learners to communicate with confidence. face2face is informed by Cambridge English Corpus and the English Vocabulary Profile, meaning students learn the language they really need at each CEFR level. The Starter Workbook with Key is ideal for self-study, offering additional consolidation activities and a Reading and Writing Portfolio for extra skills practice. A list of 'Can do' statements helps students to track their own progress in reading and writing and the pull-out answer key gives added flexibility.
The Sociology of Childhood Simon and Schuster
 ""The Teacher's Book contains : a description of the face2face methodology ; a visual reference guide to the key features of the Student's Book ; photocopiable instructions for the free Student's Book CD-ROM/Audio CD. The 'Classware' brings together onto one DVD-ROM the text, images and audio from the Student's Book plus the video from the CD-ROM. This gives teachers a new way of presenting and using the 'Student's Book material in class. This software can be used with interactive whiteboards, portable whiteboards, or simply a computer and projector."--Publisher.

Anyone with a little persistence and the desire can learn to draw well - this is the starting point for The Fundamentals of Drawing, a practical and comprehensive course for students of all abilities. Opportunities for practice and improvement are offered across a wide spectrum of subjects - still life, plants, landscapes, animals, figure drawing and portraiture - and supported by demonstrations of a broad range of skills and techniques, including perspective and composition. The methods used in The Fundamentals of Drawing have been practised through the centuries by art students and professional artists. They are time-honoured and proven. Barrington Barber brings his invaluable expertise as a working artist and teacher to the task of showing you how to use them effectively to create successful drawings. No matter what your level of expertise, you will find his clear approach encouraging and his way of teaching inspirational.

Liberal Education in a Knowledge Society Penguin

More and more educational scenarios and learning landscapes are developed using blogs, wikis, podcasts and e-portfolios. Web 2.0 tools give learners more control, by allowing them to easily create, share or reuse their own learning materials, and these tools also enable social learning networks that bridge the border between formal and informal learning. However, practices of strategic innovation of universities, faculty development, assessment, evaluation and quality assurance have not fully accommodated these changes in technology and teaching. Ehlers and Schneckenberg present strategic approaches for innovation in universities. The contributions explore new models for developing and engaging faculty in technology-enhanced education, and they detail underlying reasons for why quality assessment and evaluation in new – and often informal – learning scenarios have to change. Their book is a practical guide for educators, aimed at answering these questions. It describes what E-learning 2.0 is, which basic elements of Web 2.0 it builds on, and how E-learning 2.0 differs from Learning 1.0. The book also details a number of quality methods and examples, such as self-assessment, peer-review, social recommendation, and peer-learning, using illustrative cases and giving practical recommendations. Overall, it offers a step-by-step guide for educators so that they can choose their own quality assurance or assessment methods, or develop their own evaluation methodology for specific learning scenarios. The book addresses everyone involved in higher education – university leaders, chief information officers, change and quality assurance managers, and faculty developers. Pedagogical advisers and consultants will find new insights and practices for the integration and management of novel learning technologies in higher education. The volume fosters in lecturers and teachers a sound understanding of the need and strategy for change, and it provides them with practical recommendations on competence and quality methodologies.

Six Walks in the Fictional Woods National Geographic Books

Born Liquid is the last work by the great sociologist and social theorist Zygmunt Bauman, whose brilliant analyses of liquid modernity changed the way we think about our world today. At the time of his death, Bauman was working on this short book, a conversation with the Italian journalist Thomas Leoncini, exactly sixty years his junior. In these exchanges with Leoncini, Bauman considers, for the first time, the world of those born after the early 1980s, the individuals who were 'born liquid' and feel at home in a society of constant flux. As always, taking his cue from contemporary issues and debates, Bauman examines this world by discussing what are often regarded as its most ephemeral features. The transformation of the body – tattoos, cosmetic surgery, hipsters – aggression, bullying, the Internet, online dating, gender transitions and changing sexual preferences are all analysed with characteristic brilliance in this concise and topical book, which will be of particular interest to young people, natives of the liquid modern world, as well as to Bauman's many readers of all generations.

THE WRONG DAUGHTER is the story of two sisters who have two different fathers. Their mother Shelley, is determined to see her younger daughter Britney become a television star. It is a twist of fate when the older daughter, Troy becomes famous. Troy is a sweet darling girl who looks exactly like the father who left her mother when Troy was just two months old. Shelley's obsessive love, and hate for him fuels her anger towards Troy. In a story that is set in the glamorous world of modeling and film, a mother's rage makes her do the unthinkable. THE WRONG DAUGHTER is a sad twisted tale of two children caught in their mother's obsessions, with an ending that is nothing short of shocking.

second edition, revised and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 2nd edition contains: scale plans, photos and drawings from Technical Manuals, superb color illustrations of camouflage and markings, and rare b/w archive photographs. Color photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodelers.

In *Six Walks in the Fictional Woods* Umberto Eco shares with us his Secret Life as a reader-his love for MAD magazine, for Scarlett O'Hara, for the nineteenth-century French novelist Nerval's Sylvie, for Little Red Riding Hood, Agatha Christie, Agent 007 and all his ladies. We see, hear, and feel Umberto Eco, the passionate reader who has gotten lost over and over again in the woods, loved it, and come back to tell the tale, *The Tale of Tales*. Eco tells us how fiction works, and he also tells us why we love fiction so much. This is no deconstructionist ripping the veil off the Wizard of Oz to reveal his paltry tricks, but the Wizard of Art himself inviting us to join him up at his level, the Sorcerer inviting us to become his apprentice.

Aus dem Buch: "Wir wollen zur Ehrenrettung unseres kleinen Hans ein Weiteres tun. Er benimmt sich eigentlich nicht schlechter als ein Philosoph der Wundtschen Schule. Für einen solchen ist das Bewußtsein der nie fehlende Charakter des Seelischen, wie für Hans der Wiwimacher das unentbehrliche Kennzeichen alles Lebenden. Stößt der Philosoph nun auf seelische Vorgänge, die man erschließen muß, an denen aber wirklich nichts von Bewußtsein wahrzunehmen ist - man weiß nämlich nichts von ihnen und kann doch nicht umhin, sie zu erschließen -, so sagt er nicht etwa, dies seien unbewußte seelische Vorgänge, sondern er heißt sie dunkelbewußte." Sigmund Freud (1856-1939) war ein österreichischer Neurologe, Tiefenpsychologe, Kulturtheoretiker und Religionskritiker. Er war der Begründer der Psychoanalyse und gilt als einer der einflussreichsten Denker des 20. Jahrhunderts. Seine Theorien und Methoden werden bis heute diskutiert und angewendet.

Long Story Short Good Press

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future.
