English for Academic Purposes provides a comprehensive overview of the field of English for

Academic Purposes (EAP) for teachers. It not only looks at study skills, but also at other central concerns of EAP, such as needs analysis, syllabus and course design, methodology and materials, learning styles, tests and exams, and academic style and genre analysis. In addition to general EAP, the author also considers subject-specific language and the production of teaching materials. Throughout, the author adopts a user-friendly approach in which theoretical considerations

are balanced with practical experience. Issues are discussed and illustrated, but readers are also encouraged to form their own opinions by means of stimulating introspect and discuss sections at the end of each chapter.

Part of the popular LPN Threads series, this

market-leading text features an easy-to-follow writing style and organization to teach you the concepts and skills you need to know to practice nursing in a variety of care settings. This new edition offers in-depth discussion of QSEN competencies, rationales for the NCLEX-PN review questions, and new icons to point out the most current evidence-based information. Standard LPN Threads features include helpful characteristics such as full-color design, key terms, numbered

objectives, key points, critical thinking questions, critical thinking activities, glossary, and references. Easy-to-follow reading level and text organization presents information from simple to most complex. Think Critically boxes help you synthesize information and apply concepts beyond the scope of the chapter. Cultural Considerations related to biocultural variations as well as health promotion for specific ethnic groups demonstrate how to provide culturally

competent care. Elder Care Points highlight changes that occur with aging and how they affect nursing care. Home Care boxes highlight the necessary adaptations of nursing skills and techniques for the patient in the home care setting. NEW! Rationales for NCLEX review questions at the end of each chapter help you understand why your choices were correct or incorrect. NEW! Full text reviews by experts in the field offer consistency and ease understanding as you progress through

the book. NEW! Evolve margin icons denote supplemental material for students on Evolve. NEW! Evidence Based Practice margin icons point out the most current and evidence based information. NEW! In depth discussion of the Quality and Safety Education for Nurses (QSEN) within the text provides the knowledge, skills and attitudes necessary to continuously improve the quality and safety of the healthcare systems.

This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-

sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from

all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book

addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.
