Master the role and skills of the medical-surgical nurse in Canada with the book that has it all! Lewis's Medical-Surgical Nursing in Canada: Assessment and Management of Clinical Problems, 5th Edition reflects the expertise of nurses from across Canada with evidence-informed guidelines, a focus on clinical trends, and a review of pathophysiology. Clear examples make it easy to understand every concept in nursing care — from health promotion to acute intervention to ambulatory care. An Evolve website includes new case studies to enhance your skills in clinical judgement and prepare you for the Next Generation NCLEX®, CPNRE®, and REx-PNTM. From Canadian educators Jane Tyerman and Shelley L. Cobbett, this comprehensive guide provides a solid foundation in perioperative care as well as nursing care of disorders by body system. Easy-to-understand content is written and reviewed by leading experts in the field, ensuring that information is comprehensive, current, and clinically accurate. More than 800 full-colour illustrations and photographs demonstrate disease processes and related anatomy and physiology. Focus on key areas includes the determinants of health, patient and caregiver teaching, age-related considerations, collaborative care, cultural considerations, nutrition, home care, evidence-informed practice, and patient safety. Nursing Assessment chapters focus on individual body systems and include a brief review of related anatomy and physiology, a discussion of health history and non-invasive physical assessment skills, and note common diagnostic studies, expected results, and related nursing responsibilities. Unfolding case studies in each assessment chapter help you apply important concepts and procedures to real-life patient care. UNIQUE! Levels of Care approach organizes nursing management into three levels: health promotion, acute intervention, and ambulatory and home care. Nursing Management chapters focus on the pathophysiology, clinical manifestations, laboratory and diagnostic study results, interprofessional care, and nursing management of various diseases and disorders, and are organized to follow the steps of the nursing process (assessment, nursing diagnoses, planning, implementation, and evaluation). Safety Alerts and Drug Alerts highlight important safety issues in patient care. Informatics boxes discuss the importance and use of technology with topics such as use of social media in the context of patient privacy, teaching patients to manage self-

care using smartphone apps, and using Smart infusion pumps. Cultural Competence and Health Equity in Nursing Care chapter discusses culture as a determinant of health, especially in regard to Indigenous populations; health equity and health equality issues as they relate to marginalized groups in Canada; and practical suggestions for developing cultural competence in nursing care. More than 60 comprehensive nursing care plans on the Evolve website include defining characteristics, expected outcomes, specific nursing interventions with rationales, evaluation criteria, and collaborative problems.

Promoting Population Health tables summarize government health care goals as they relate to specific disorders and identify important strategies for the prevention and early detection of diseases. Nutritional Therapy tables summarize nutritional interventions and strategies for promoting healthy lifestyles in patients with various conditions. Promoting Health Equity boxes and a dedicated chapter on health disparities and culturally competent care highlight risk factors and important issues

related to the nursing care of various ethnic groups. Complementary and Alternative Therapies boxes summarize what you need to know about the clinical uses, effects, and nursing implications of herbal remedies and complementary and alternative treatment options. Nursing interventions and nursing diagnoses are listed in order of priority. Nursing Management boxes highlight the nurse's role in working with members of the interprofessional team and also cover specific topics and skills related to delegation. Assessment Abnormalities tables alert the nurse to frequently encountered abnormalities and their possible etiologies. Core clinical content focuses on highlighting and incorporating QSEN competencies. Emergency Management tables outline the treatment of health problems most likely to create medical emergencies. Learning Outcomes and Key Terms help you identify the key content for that chapter. Health History tables present key questions to ask patients related to a specific disease or disorder. Patient and Caregiver teaching tables provide critical information to help you educate others who will be helping to

care for the patient. Gerontology and chronic illness included throughout the text under Gerontologic Considerations headings and in Gerontologic Assessment tables. Nursing Assessment tables summarize the key subjective and objective data related to common diseases. Gender Differences boxes discuss how women and men are affected differently by conditions such as pain and hypertension. Diagnostic Studies tables provide details of commonly used lab tests that help assess various body systems. Over 60 nursing care plans clearly shows the linkages among NIC, NOC, and nursing diagnoses, and applies them to nursing practice. Over 800 full-color illustrations and photographs clearly demonstrate disease processes and related anatomy and physiology. NEW! An increased focus on concepts throughout the text includes a new Concepts Table of Contents that lists the most common exemplars with page number references, a new Problems Related to Comfort and Coping section, and the most relevant concepts listed at the start of each chapter. NEW! Additional body map images added throughout text.
