Volume 2 of History of Construction Cultures contains papers presented at the 7ICCH – Seventh International Congress on Construction History, held at the Lisbon School of Architecture, Portugal, from 12 to 16 July, 2021. The conference has been organized by the Lisbon School of Architecture (FAUL), NOVA School of Social Sciences and Humanities, the Portuguese Society for Construction History Studies and the University of the Azores. The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis, following themes such as: - epistemological issues; - building actors; - building materials; - building machines, tools and equipment; - construction processes; - building services and techniques ; -structural theory and analysis ; - political, social and economic aspects; - knowledge transfer and cultural translation of construction cultures. Furthermore, papers presented at thematic sessions aim at covering important problematics, historical periods and different regions of the globe, opening new directions for Construction History research. We are what we build and how we build; thus, the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind. Therefore, History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures, from ancient times to our century and all over the world.

Freedom Rider Diary Oxford University Press
Arrested as a Freedom Rider in June of 1961, Carol Ruth Silver, a twenty-two-year-old recent college graduate originally from Massachusetts, spent the next forty days in Mississippi jail cells, including the Maximum Security Unit at the infamous Parchman Prison Farm. She chronicled the events and her experiences on

hidden scraps of paper which amazingly she was able to smuggle out. These raw written scraps she fashioned into a manuscript, which has waited, unread for more than fifty years. Freedom Rider Diary is that account. Freedom Riders were civil rights activists who rode interstate buses into the segregated southern United States in 1961 to test the U.S. Supreme Court rulings outlawing segregation in interstate bus and terminal facilities. Brutality and arrests inflicted on the Riders called national attention to the disregard for federal law and the local violence used to enforce segregation. Police arrested Riders for trespassing, unlawful assembly, and violating state and local Jim Crow laws, along with other alleged offenses, but they often allowed white mobs to attack the Riders without arrest or intervention. Though a number of books recount the Freedom Rides as part of the larger civil rights story, this book offers a heretofore unavailable detailed diary from a woman Freedom Rider along with an introduction by historian Raymond Arsenault, author of the definitive history of the Freedom Rides. In a personal essay detailing her life before and after the Freedom Rides, Silver explores what led her to join the movement and explains how, galvanized by her actions and those of her compatriots in 1961, she spent her life and career fighting for civil rights. Framing essays and personal and historical photographs make the diary an ideal book for the general public, scholars, and students of the movement that changed America.

Chitty on Contracts is the pre-eminent reference work on contract law in the common law world. It has been used for generations by lawyers as the leading guide to contracts, and is relied on to provide insight and aid in complex areas of the law. The work is in two volumes: Volume One covers the General Principles of contract law, while Volume Two offers guidance on Specific Contracts, namely contractual issues in specific industry sectors.

(Volume One of the work is available as a standalone for those who need coverage of the general principles of contract law only).

The History of an Exceptional Concept in American Foreign Relations Springer
'Anti-Americanism' is an unusual expression; although stereotypes and hostility exist toward every nation, we do not hear of 'anti-Italianism' or 'anti-Brazilianism'. Only Americans have elevated such sentiment to the level of a world view, an explanatory factor so significant as to merit a name - an 'ism' - usually reserved for comprehensive ideological systems or ingrained prejudice. This book challenges the scholarly consensus that blames criticism of the United States on foreigners' irrational resistance to democracy and modernity. Tracing 200 years of the concept of anti-Americanism, this book argues that it has constricted political discourse about social reform and US foreign policy, from the War of 1812 and the Mexican War to the Cold War, from Guatemala and Vietnam to Iraq. Research in nine countries in five languages, with attention to diplomacy, culture, migration and the circulation of ideas, shows that the myth of anti-Americanism has often damaged the national interest.

Danny can feel something sinister about his new home, Blackbriar, an old, abandoned cottage in the English countryside. The residents of a nearby town refuse to speak of the house and can barely look Danny in the eyes. Then Danny begins to have strange dreams of fires and witches, and awakes to shrieks of laughter that seem to come from another time and place. With help from his friend, Lark, Danny begins to unravel the mysteries of Blackbriar and its frightening past, through the discovery of an ancient doll and a chilling list of names and dates carved on the cellar door. But what might be most terrifying of all is the mystery that does not lie in the past but in the here and now. . . .

In this history of roads and what they have meant to the people who have driven them, one of Britain's favourite cultural historians reveals how a relatively simple road system turned into a maze-like pattern of roundabouts, flyovers, and spaghetti junctions. Using a unique blend of travel writing, anthropology, history and social observation, he explores how Britain's roads have their roots in unexpected places, from Napoleon's role in the numbering system to the surprising origin of sat-nav. Full of quirky nuggets of history, such as the day trips organised to see the construction of the M1 and the 2.5m Mills and Boons used to build the M6 Toll Road, *On Roads* also celebrates innovators whose work we take for granted, such as the designers of the road sign system. On subjects ranging from speed limits to driving on the left, and the 'non-places where we stop to the unwritten laws of traffic jams, these hidden stories have never been told together, until now.

Not since Pearl Harbor has an American president gone to Congress to request a declaration of war. Nevertheless, since then, one president after another, from Truman to Obama, has ordered American troops into wars all over the world. From Korea to Vietnam, Panama to Grenada, Lebanon to Bosnia, Afghanistan to Iraq—why have presidents sidestepped declarations of war? Marvin Kalb, former chief diplomatic correspondent for CBS and NBC News, explores this key question in his thirteenth book about the presidency and U.S. foreign policy. Instead of a declaration of war, presidents have justified their war-making powers by citing

"commitments," private and public, made by former presidents. Many of these commitments have been honored, but some betrayed. Surprisingly, given the tight U.S.-Israeli relationship, Israeli leaders feel that at times they have been betrayed by American presidents. Is it time for a negotiated defense treaty between the United States and Israel as a way of substituting for a string of secret presidential commitments? From Israel to Vietnam, presidential commitments have proven to be tricky and dangerous. For example, one president after another committed the United States to the defense of South Vietnam, often without explanation. Over the years, these commitments mushroomed into national policy, leading to a war costing 58,000 American lives. Few in Congress or the media chose to question the war's provenance or legitimacy, until it was too late. No president saw the need for a declaration of war, considering one to be old-fashioned. The word of a president can morph into a national commitment. It can become the functional equivalent of a declaration of war. Therefore, whenever a president "commits"the United States to a policy or course of action with, or increasingly without, congressional approval, watch out—the White House may be setting the nation on a road toward war. *The Road to War* was a 2013 Foreword Reviews honorable mention in the subject of War & Military.

Confronting Urban Legacy fills a critical lacuna in urban scholarship. As almost all of the literature focuses on global cities and megacities, smaller, secondary cities, which actually hold the majority of the world's population, are either critically misunderstood or unexamined in their entirety. This neglect not only biases scholars' understanding of social and spatial dynamics toward very large global cities but also maintains a void in students' learning. This book specifically explores the transformative relationship between globalization and urban transition in Hartford, Connecticut, while including crucial comparative chapters on other forgotten New England cities: Portland, Maine, along with Lawrence and Springfield, Massachusetts. Hartford's transformation carries a striking imprint of globalization that has been largely missed: from its 17th century roots as New England first inland colonial settlement, to its emergence as one of the world's most prosperous manufacturing and insurance metropolises, to its

present configuration as one of America's poorest post-industrial cities, which by still retaining a globally lucrative FIRE Sector is nevertheless surrounded by one of the nation's most prosperous metropolitan regions. The myriad of dilemmas confronting Hartford calls for this book to take an interdisciplinary approach. The editors' introduction places Hartford in a global comparative perspective; Part I provides rich historical delineations of the many rises and (not quite) falls of Hartford; Part II offers a broad contemporary treatment of Hartford by dissecting recent immigration and examining the demographic and educational dimensions of the city-suburban divide; and Part III unpacks Hartford's current social, economic, and political situation and discusses what the city could become. Using the lessons from this book on Hartford and other underappreciated secondary cities in New England, urban scholars, leaders, and residents alike can gain a number of essential insights—both theoretical and practical.

John Hervey Wheeler (1908--1978) was one of the civil rights movement's most influential leaders. In articulating a bold vision of regional prosperity grounded in full citizenship and economic power for African Americans, this banker, lawyer, and visionary would play a key role in the fight for racial and economic equality throughout North Carolina. Utilizing previously unexamined sources from the John Hervey Wheeler Collection at the Atlanta University Center Robert W. Woodruff Library, this biography explores the black freedom struggle through the life of North Carolina's most influential black power broker. After graduating from Morehouse College, Wheeler returned to Durham and began a decades-long career at Mechanics and Farmers (M&F) Bank. He started as a teller and rose to become bank president in 1952. In 1961, President Kennedy appointed Wheeler to the President's Committee on Equal Employment Opportunity, a position in which he championed equal rights for African Americans and worked with Vice President Johnson to draft civil rights legislation. One of the first blacks to attain a high position in the state's Democratic Party, Wheeler became the state party's treasurer in 1968, and then its financial director. Wheeler urged North Carolina's white financial advisors to steer the region toward the end of Jim Crow segregation for economic reasons. Straddling the line between

confrontation and negotiation, Wheeler pushed for increased economic opportunity for African Americans while reminding the white South that its future was linked to the plight of black southerners.

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

As with any business, economic, financial, and marketing management for sports organizations is critical for attracting, retaining, and engaging fans. Unlike typical businesses, the sports industry is inconsistent, highly emotional with a strong personal nature, and operates in various markets where organizations compete and cooperate at the same time. Thus, traditional management techniques are not always appropriate for these organizations. *Integrated Marketing Communications, Strategies, and Tactical Operations in Sports Organizations* provides expert insight into the latest trends, strategies, and tactics that can be used in the sports industry to build foundations for successful commercialization. The content within this publication covers city marketing, social media interactions, and atmospheric influence and is designed for managers, marketers, business and industry professionals, stakeholders, academicians, researchers, and

students.

This volume is written primarily for agricultural economists doing research on productivity. It includes discussions of the theoretical underpinnings of productivity measurement as well as the many practical considerations that go into translating this theory into actual measures of aggregated outputs and inputs. The unifying concept of agricultural productivity used across the chapters of this volume is aggregate total factor productivity (TFP) of the sector. The volume also contains detailed analysis of the underlying causes of agricultural productivity growth. Part I (chapters 2-6) examines agricultural productivity in high-income and transition countries. Part II (chapters 7-11) examines agricultural productivity growth and its driving forces in five important agricultural producers in Asia and Latin America. Part III (chapters 12-14) focuses on measuring and identifying constraints to agricultural productivity growth in sub-Saharan Africa. Part IV (chapters 15-16) gives a global perspective on agricultural productivity.

Rethinking Anti-Americanism PediaPress

Covers rebuilding the VW Type 1, 2, and 3 engines beginning in the year 1961, when a significant redesign improved the reliability, durability, and horsepower of the basic initial design. For more than 70 years, automotive enthusiasts and the public in general have embraced the VW air-cooled engine for its simplicity, its capacity to be modified, and its bulletproof reliability. Offering beautiful color photos and insightful step-by-step captions for expertly rebuilding Volkswagen air-cooled engines, this book will provide in-depth hands-on information for disassembly, inspection, machining, parts selection, preassembly, final assembly, installation, and tuning. Not only are the procedures for rebuilding covered in depth but engine model types, identification codes, specifications, and details are also covered in a manner that allows the user to source a good later-model candidate for rebuilding and helps retrofit the modern engine designs into earlier chassis. One of the most widely used and versatile internal combustion engines in the world, this engine has powered VW Beetles, Buses, Porsche 914s, off-road buggies and rails, formula race cars, and many other machines both on and off-road. If you have any interest in reviving your old

VW, or perhaps are researching purchasing one, this handy guide will cover all the bases in bringing that old air-cooled powerplant back to life.

Who are the Assyrians and what role did they play in shaping modern Iraq? Were they simply bystanders, victims of collateral damage who played a passive role in the history of Iraq? And how have they negotiated their position throughout various periods of Iraq's state-building processes? This book details the narrative and history of Iraq in the 20th century and reinserts the Assyrian experience as an integral part of Iraq's broader contemporary historiography. It is the first comprehensive account to contextualize this native people's experience alongside the developmental processes of the modern Iraqi state. Using primary and secondary data, this book offers a nuanced exploration of the dynamics that have affected and determined the trajectory of the Assyrians' experience in 20th century Iraq.
