Elsevier  
This vintage book

contains a comprehensive guide to building, rigging, and cruising model sailing yachts. Written in clear,

simple language and full of helpful illustrations and detailed diagrams, this book is ideal for the novice model builder, and will be of considerable utility to those with a practical interest in building model boats. The chapters of this book include: "The Rating of Model Yachts", "Building a 36 In. Model Yacht by the Carved hull Method", "Building a Model Rater", "The Construction of "built-up" or Planked Yachts", "Spars and Fittings", "Steering Gears", "Racing Schooners", etcetera. Many antiquarian books such as this are increasingly hard to come by and expensive, and it is with this in mind that we are republishing this book now in an affordable, high quality edition. It comes complete with a specially commissioned introduction on model building.

Boating CRC Press

This work reviews the state of the art in SVM and perceptron classifiers. A Support Vector Machine (SVM) is easily the most popular tool for dealing with a variety of machine-learning tasks, including classification. SVMs are associated with maximizing the margin between two classes. The

concerned optimization problem is a convex optimization guaranteeing a globally optimal solution. The weight vector associated with SVM is obtained by a linear combination of some of the boundary and noisy vectors. Further, when the data are not linearly separable, tuning the coefficient of the regularization term becomes crucial. Even though SVMs have popularized the kernel trick, in most of the practical applications that are high-dimensional, linear SVMs are popularly used. The text examines applications to social and information networks. The work also discusses another popular linear classifier, the perceptron, and compares its performance with that of the SVM in different application areas.>

Power Boat News Blue Moon Rising

For nearly thirty years, Maine's premier boating magazine *Maine Boats, Homes & Harbors* has published a regular column called *Boatyard Dogs* about dogs and the nautical life. This delightful book gathers the best of the column into a single volume that makes a wonderful gift for anyone who loves dogs--

and boats.

Cruising in a Big Way Voyage Press

Have you ever seen a National Geographic article or television program on the whales, salmon, bears, or glaciers of the Pacific Northwest, and dreamed of seeing the beautiful coast of British Columbia and Alaska for yourself? How about up close and personal, in your very own boat? In this book, we'll describe how you could make that dream a reality, in a small (trailerable) boat.

Diesel Engine Springer

"An epic history of piracy .

. . . Goodall explores the role of these legendary rebels and describes the fine line between piracy and privateering." —WYPR

The story of Chesapeake pirates and patriots begins with a land dispute and ends with the untimely death of an oyster dredger at the hands of the Maryland Oyster Navy. From the golden age of piracy to Confederate privateers and oyster pirates, the maritime communities of the Chesapeake Bay are intimately tied to a fascinating history of intrigue, plunder and illicit commerce raiding. Author Jamie L.H. Goodall

introduces infamous men like Edward “Blackbeard” Teach and “Black Sam” Bellamy, as well as lesser-known local figures like Gus Price and Berkeley Muse, whose tales of piracy are legendary from the harbor of Baltimore to the shores of Cape Charles. “Rather than an unchanging monolith, Goodall creates a narrative filled with dynamic movement and exchange between the characters, setting, conflict, and resolution of her story. Goodall positioned this narrative to be successful on different levels.”

An ancient darkness A powerful family And five friends bound by incredible magic The Breakfast Creek five survived the attack of the Red General and their jaunt through the many worlds. Now, forever joined by magic beyond their understanding, they begin their new lives in very different magical worlds. But now Julia is missing, taken by an old power that yearns, that seeks, that's growing. The Power of the Allure. Enthralled by a world of

wealth, luxury and notoriety, Julia has no idea what she's gotten herself into. The story continues in this whirlwind tale, Book 2 of the epic adventure of five friends: The Travellers.

 Due to the ever increasing requirements to be met by gasoline and diesel engines in terms of CO2 reduction, emission behavior, weight, and service life, a comprehensive understanding of combustion engine components is essential today. It is no longer possible for a professional in automotive engineering to manage without the corresponding know-how, whether that is in the field of design, development, testing, or maintenance. This technical book provides in-depth answers to questions about design, production, and machining of cylinder components. Content  
 ; Piston rings ; Piston pins and piston pin circlips ; Bearings ; Connecting rods ; Crankcase and cylinder liners Target audience ; Engineers in engine development and maintenance ; Lecturers and students in the areas of mechanical

engineering, engine technology, and vehicle construction ; Anyone interested in technology Publisher The MAHLE Group is one of the top 30 automotive suppliers and the globally leading manufacturer of components and systems for the internal combustion engine and its peripherals.

 Handbook of Cosmetic Science: An Introduction to Principles and Applications is a guidebook that aids in addressing several areas of concerns in cosmetic science. The book is comprised of 24 chapters that cover the wide spectrum of issues in cosmetics, from application of products up to the proper handling and packaging of cosmetic products. The text first discusses the importance of the body surfaces to which perfumes and cosmetics are applied such as the skin, hair, and teeth. Next the book deals with the chemistry of the raw materials that are processed in the cosmetics industry. The next chapters cover the

formulation, production, and packaging of cosmetic products, along with product evaluation and measures to prevent damage to the goods. The text will be of great use to individuals involved in the research, development, production, and application of cosmetic products.

Pirates of the Chesapeake Bay Arcadia Publishing

The purpose of the 10th US North American Mine Ventilation Symposium in Anchorage 2004 was to bring together practitioners involved in the planning and operation of underground ventilation systems, to provide a forum for debate and exchange of ideas, and to share information on the advances which have been made and consider problems which remain in the broad field of mine ventilation. The Mine Ventilation Symposium series has always been a premier forum for ventilation experts, practitioners, educators, students, regulators and manufacturers from around the world to exchange knowledge, ideas and opinions. This volume features over sixty selected technical papers from fifteen countries around the

world including topics such as mine fires and explosions, case studies, diesel in underground mines, face ventilation, ventilation systems design, strata gas and control, ventilation and control systems, modeling and software development, dust generation, transport and control.

MotorBoating Read Books Ltd

This book collects sixteen essays that provide clarification to issues pertinent to contemporary cooperatives. Twenty three internationally recognized scholars of agricultural cooperatives from a variety of disciplines such as industrial organization, finance, sociology, networks, and political theory contributed theoretical work and empirical observations from different countries.

Safety of Lithium Batteries describes how best to assure safety during all phases of the life of Lithium ion batteries (production, transport, use, and disposal). About 5 billion Li-ion cells are produced each year, predominantly for use in consumer

electronics. This book describes how the high-energy density and outstanding performance of Li-ion batteries will result in a large increase in the production of Li-ion cells for electric drive train vehicle (xEV) and battery energy storage (BES or EES) purposes.

The high-energy density of Li battery systems comes with special hazards related to the materials employed in these systems. The manufacturers of cells and batteries have strongly reduced the hazard probability by a number of measures. However, absolute safety of the Li system is not given as multiple incidents in consumer electronics have shown. - Presents the relationship between chemical and structure material properties and cell safety - Relates cell and battery design to safety as well as system operation parameters to safety - Outlines the influences of abuses on safety and the relationship to battery testing - Explores the limitations for transport and storage of cells and batteries - Includes recycling, disposal and second use of lithium ion batteries
