Memoirs of a Millennium is an engaging and unconventional history of the last millennium, told through the lives of ten individuals across ten centuries. The characters and their compatriots are brought vividly to life by eyewitnesses both sympathetic and unsympathetic, and a colourful cast of subsequent commentators. In this insightful and entertaining book, Ted Pockock uncovers complex webs of humanity in a narrative that moves effortlessly from connection to connection across countries and continents, and from the past to the present and back again. The ten chapters explore the lives and times of the following individuals: 1000: Vladimir of Kiev (Russia) 1100: Godfrey of Bouillon (Palestine and the Holy Land) 1200: Jayavarman VII of Angkor (Cambodia) 1300: Devorguilla of Galloway (England and Scotland) 1400: Tamburlaine of Samarkand (Central Asia) 1500: Marcantonio Raimondi of Bologna (Italy) 1600: Toyotomi Hideyoshi of Osaka (Japan) 1700: Sophie Charlotte of Prussia (Germany) 1800: John Ledyard of Connecticut (USA) 1900: Yuan Shikai of Beijing (China) The scholarship is dazzling, the prose elegant and witty, the rich digressions into related themes irresistible. The successive eras come alive and the compelling text keeps the reader in thrall.' Dr Helen Ibbitson Jessup

Contemporary North and South Korea are nations of radical contrasts: one a bellicose totalitarian state with a failing economy; the other a peaceful democracy with a strong economy. Yet their people share a common history that extends back more than 3,000 years. In this comprehensive new history of Korea from the prehistoric era to the present day, Jinwung Kim recounts the rich and fascinating story of the political, social, cultural, economic, and diplomatic developments in Korea's long march to the present. He provides a detailed account of the origins of the Korean people and language and the founding of the first walled-town states, along with the advanced civilization that existed in the ancient land of "Unified Silla." Clarifying the often complex history of the Three Kingdoms Period, Kim chronicles the five-century long history of the Choson dynasty, which left a deep impression on Korean culture. From the beginning, China has loomed large in the history of Korea, from the earliest times when the tribes that would eventually make up the Korean nation roamed the vast plains of Manchuria and against whom Korea would soon define itself. Japan, too,

has played an important role in Korean history, particularly in the 20th century; Kim tells this story as well, including the conflicts that led to the current divided state. The first detailed overview of Korean history in nearly a quarter century, this volume will enlighten a new generation of students eager to understand this contested region of Asia.

Stephen Turnbull, a renowned expert on the history of Japan, examines the samurai invasion of Korea, the first step in an ambitious Japanese plan to conquer China. Examining the various stages of the war, from the pitched battles of the early war years, to the great naval encounters, the dramatic sieges and the bitter trench warfare that characterized the end of the war, Turnbull provides a concise analysis of the conflict. Highly illustrated with contemporary photographs, full colour battlescene artwork, detailed maps and bird's-eye views, this is a concise history of a unique and exciting campaign, which not only involved huge numbers of men, differing terrain and tactics but was also the only time that the legendary samurai were pitched against a foreign nation.

Diplomacy and Ideology in Japanese-Korean Relations: From the Fifteenth to the Eighteenth Century Cornell University Press

In May of 1592, Japanese dictator Toyotomi Hideyoshi sent a 158,800-man army of invasion from Kyushu to Pusan on Korea's southern tip. His objective: to conquer Korea, then China, then the whole of Asia. The resulting seven years of fighting, known in Korea as "imjin waeran," the "Imjin invasion," after the year of the water dragon in which it began, dwarfed contemporary conflicts in Europe and was one of the most devastating wars to grip East Asia in the past thousand years. THE IMJIN WAR is the most comprehensive account ever published in English of this cataclysmic event, so little known in the West. It begins with the political and cultural background of Korea, Japan and China, explores the diplomatic impasse that led to the war, describes every major incident and battle from 1592 to 1598 and introduces a fascinating cast of characters along the way. There is Hideyoshi, hosting garden parties as his armies march toward Beijing; Korean admiral Yi Sun-sin, emerging from a prison cell to take on the Japanese navy with just thirteen ships; Chinese commander Zhao Chengxun, suffering defeat after promising to "scatter the Japanese to the four winds"; the courtesan Chu Non-gae, luring a samurai warrior into her arms and jumping into the Nam River with him locked in her embrace. One nation fighting to expand, another to survive. Shockwaves extending across China and beyond. THE IMJIN WAR is an epic tale of grand perspective and intimate detail of an upheaval that would shape East Asia for centuries to come.

A thorough study of significant wars throughout history and their influence on world affairs—from the Egyptian Pharaoh Thutmose III's Campaigns during 1479–1459 BCE through the Iraq War of 2003–2011. For hundreds of years, wars have played a determining role in history and have decided the rise and fall of civilizations. Many believe that understanding the causes and consequences of warfare may move humankind towards world peace. This selection of the 50 most consequential wars, compiled by award-winning military historian Spencer C. Tucker, presents each conflict in chronological order and discusses its causes, its course, and its significance in world history. Through thoughtful essays

and supporting visual evidence, this reference work examines the types of weapons systems employed and their effects in the field; the roles played by individual leaders such as Alexander the Great, Julius Caesar, Abraham Lincoln, and Adolf Hitler; and the impact of geography and economics on the battlefield. The work includes fascinating information about warfare, addressing subjects such as how transportation and logistics changed the face of war over time, what invention marked the ascendancy of infantry over cavalry, why World War I remains the most important war in the 20th century, and which war killed nearly half of the population of Germany. Each essay includes the latest interpretations of strategy, agendas, and consequences of the featured event.

The invasion of Korea by Japanese troops in May of 1592 was no ordinary military expedition: it was one of the decisive events in Asian history and the most tragic for the Korean peninsula until the mid-twentieth century. Japanese overlord Toyotomi Hideyoshi envisioned conquering Korea, Ming China, and eventually all of Asia; but Korea's appeal to China's Emperor Wanli for assistance triggered a six-year war involving hundreds of thousands of soldiers and encompassing the whole region. For Japan, the war was "a dragon's head followed by a serpent's tail": an impressive beginning with no real ending. Kenneth M. Swope has undertaken the first full-length scholarly study in English of this important conflict. Drawing on Korean, Japanese, and especially Chinese sources, he corrects the Japan-centered perspective of previous accounts and depicts Wanli not as the self-indulgent ruler of received interpretations but rather one actively engaged in military affairs—and concerned especially with rescuing China's client state of Korea. He puts the Ming in a more vigorous light, detailing Chinese siege warfare, the development and deployment of innovative military technologies, and the naval battles that marked the climax of the war. He also explains the war's repercussions outside the military sphere—particularly the dynamics of intraregional diplomacy within the shadow of the Chinese tributary system. What Swope calls the First Great East Asian War marked both the emergence of Japan's desire to extend its sphere of influence to the Chinese mainland and a military revival of China's commitment to defending its interests in Northeast Asia. Swope's account offers new insight not only into the history of warfare in Asia but also into a conflict that reverberates in international relations to this day.

In this sweeping intellectual and cultural history of the minjung ("common people's") movement in South Korea, Namhee Lee shows how the movement arose in the 1970s and 1980s in response to the repressive authoritarian regime and grew out of a widespread sense that the nation's "failed history" left Korean identity profoundly incomplete. *The Making of Minjung* captures the movement in its many dimensions, presenting its intellectual trajectory as a discourse and its impact as a political movement, as well as raising questions about how intellectuals represented the minjung. Lee's portrait is based on a wide range of sources: underground pamphlets, diaries, court documents, contemporary newspaper reports, and interviews with participants. Thousands of students and intellectuals left universities during this period and became factory workers, forging an intellectual-labor alliance perhaps unique in world history. At the same time, minjung cultural activists reinvigorated traditional folk theater, created a new "minjung literature," and influenced religious practices and academic disciplines. In its transformative scope, the minjung phenomenon is

comparable to better-known contemporaneous movements in South Africa, Latin America, and Eastern Europe. Understanding the minjung movement is essential to understanding South Korea's recent resistance to U.S. influence. Along with its well-known economic transformation, South Korea has also had a profound social and political transformation. The minjung movement drove this transformation, and this book tells its story comprehensively and critically.

In this witty historical fiction middle grade novel set at the turn of the century, an 11-year-old girl explores the natural world, learns about science and animals, and grows up. A Newbery Honor Book. "The most delightful historical novel for tweens in many, many years. . . . Callie's struggles to find a place in the world where she'll be encouraged in the gawky joys of intellectual curiosity are fresh, funny, and poignant today." —The New Yorker Calpurnia Virginia Tate is eleven years old in 1899 when she wonders why the yellow grasshoppers in her Texas backyard are so much bigger than the green ones. With a little help from her notoriously cantankerous grandfather, an avid naturalist, she figures out that the green grasshoppers are easier to see against the yellow grass, so they are eaten before they can get any larger. As Callie explores the natural world around her, she develops a close relationship with her grandfather, navigates the dangers of living with six brothers, and comes up against just what it means to be a girl at the turn of the century. Author Jacqueline Kelly deftly brings Callie and her family to life, capturing a year of growing up with unique sensitivity and a wry wit. *The Evolution of Calpurnia Tate* by Jacqueline Kelly was a 2010 Newbery Honor Book and the winner of the 2010 Bank Street - Josette Frank Award. This title has Common Core connections. This is perfect for young readers who like historical fiction, STEM topics, animal stories, and feminist middle grade novels. The United States has the most expensive and seemingly unstoppable military in the world. Yet, since World War II the nation's military success rate has been meager. The Korean War was a draw, while Vietnam, Mogadishu, Afghanistan, and Iraq were clear losses. Successes include Iraq in 1991, the Balkans (Croatia and Kosovo), Panama, the initial takedowns of Afghanistan in 2001 and Iraq in 2003, and Libya. What differentiates the failures from the successes? Failures have been marked by the introduction of large numbers of conventional American ground troops, while successes have been characterized by the use of airpower, special operations forces, robust intelligence and sensor platforms, and the use of indigenous ground troops. Phillip S. Meilinger's new book advocates strategies that limit risks in war as well as achieve measurable goals. Instead of large numbers of conventional ground troops, the author argues in favor of a focus on asymmetric capabilities—a combination of airpower, special operation forces, intelligence, and indigenous ground troops—to achieve the desired political outcomes.

During the premodern period, Japan had significant political, economic and cultural relations with

Korea. This book purports that this period, from the fifteenth to the eighteenth century, was the formative stage of the East Asian diplomacy and ideology which laid the foundations for foreign relations between these two countries in the modern period. The book also investigates how Japan's and Korea's political and diplomatic ideologies emerged as a nascent form of nationalism which scholars have not previously clarified.

This user-friendly reference systematically covers the entire intellectual history of strategy and war, in all cultures and all times. Each culture has had its Machiavelli, its Sun Tzu; its own Mohammed-like or Napoleonic figure. This encyclopedia ranges across the world to provide entries on every significant military and strategic thinker in human history as well as a number of military cultures, covering Chinese, Western, Indian, Islamic, and other cultures. Each entry supplies a brief biography, a synopsis of the writer's theories, their success or failure, and their impact on other thinkers and military practitioners. The unique coverage allows readers to cross cultural barriers and gain access to sources in languages as diverse as Arabic and German, and to note key similarities and contrasts. The relative importance and contribution of each individual to intellectual progress is noted, as is the greater significance of specific schools of thought and debates.

The Making of Minjung Little, Brown Books for Young Readers

As East Asia regains its historical position as a world centre, information on the history of regional relations becomes ever more critical. Astonishingly, Northeast Asia enjoyed five centuries of international peace from 1400 to 1894, broken only by one major international war - the invasion of Korea in the 1590s by Japan's ruler Hideyoshi. This war involved Koreans, Japanese, Chinese, Southeast Asians, and Europeans; it saw the largest overseas landing in world history up to that time and devastated Korea. It also highlighted the nature of the strategic balance in the region, presenting China's Ming dynasty with a serious threat that perhaps foreshadowed the dynasty's subsequent overthrow by the Manchus, played a major part in the establishment of the Tokugawa regime with its policy of peace and controlled access to seventeenth- and eighteenth-century Japan, and demonstrated the importance for regional stability of the subtle relationship of Korea to both China and Japan. This book presents a comprehensive analysis of the war and its aftermath in all its aspects - military, political, social, economic, and cultural. As such it deepens understanding of East Asian international relations and provides important insights into the strategic concerns that continue to operate in the region at present.

The Japanese invasion and occupation of Korea, which lasted from 1592 to 1598, was the only occasion in Japanese history when samurai aggression was turned against a foreign country. During the occupation of Korea the Japanese built 25 wajo or castles. Unlike the castles built in Japan, these fortifications were never developed or modernized after the Japanese departure. The details of late 16th-century castle construction are therefore better preserved than at many other sites. Written by Stephen Turnbull, an expert in the subject, this book examines the castles built by the Japanese in Korea, as well as the use made of existing Korean fortifications, particularly city walls. This resulted in curious hybrid fortifications that dominated the landscape until the Japanese were pushed out of the peninsula by a furious onslaught from huge Chinese armies.
