What would you play when you see the
chord symbols A7b9-sharp9, F7+5,
Csusb9, or D-flatMaj7+5? What would you
"blow" over a D Locrian #2? The Melodic
Minor Handbook provides musicians of all
levels with these answers in presenting a
concise, practical, easy-to-absorb method

of exposure, study, and practice in the
components of melodic minor harmony,
and its use within the jazz vocabulary.
Although the sound of melodic minor
harmony has been a staple of jazz music
over the last half century, familiarity
among many aspiring musicians with its
derivative modes and chord types still
seems to remain a mystery; and even
though touched upon to a greater or lesser
degree by various books and methods, a
comprehensive study stressing melodic
minor harmony as a unique harmonic
universe of its own has been absent---until

now 176 pages, spiral bound.

According to Larry Teal, the best method of learning to play the saxophone is to study with a competent teacher. Teal's studies were mostly of instruments other than the saxophone, but as a student at a Chautauqua summer session, he came under the influence of Georges Barrère, the eminent French flutist. He played bass clarinet with the Detroit Symphony, but he continued to be absorbed by the saxophone. As a result of his acquired expertise and growing reputation, he was appointed to a full-time faculty position as a saxophone teacher by the University of Michigan -- the first ever to receive such an appointment from a major university. During his 21-year tenure, he attracted students from all over, thus exerting an ever widening influence on saxophone teaching and performing.
