In this comprehensive examination of international law, you'll find in-depth, substantive discussion supported by expert analysis and commentary, case citations, statutes, and court rules. You'll also reap the benefits of the authors' experience and insights. Representative topics include human rights, law of the sea, airspace and outer space, and sovereign immunity.

Diagnostic Pathology of Infectious Disease E-Book BoD - Books on Demand

Psychology has influence in almost every walk of life. Originally

published in 1997, *A Century of Psychology* is a review of where the discipline came from, where it had reached and where the editors anticipated it may go. Ray Fuller, Patricia Noonan Walsh and Patrick McGinley assembled an internationally recognised team of mainly European experts from the major applications and research areas of psychology. They begin with a critical review of methodology and its limitations and plot the course of gender and developmental psychology. They go on to include discussion of learning, intellectual disability, clinical psychology and the emergence of psychotherapy, educational psychology, organizational psychology, cognitive psychology, neuropsychology and many other topics, in particular community psychology, perception and alternative medicine. Enlightening, reflective and sometimes provocative, *A Century of Psychology* is required reading for anyone involved in psychology as a

practitioner, researcher or teacher. It is also a lively introduction for those new to the discipline.

**Wildlife Review** The International Legal System In this comprehensive examination of international law, you'll find in-depth, substantive discussion supported by expert analysis and commentary, case citations, statutes, and court rules. You'll also reap the benefits of the authors' experience and insights.

Representative topics include human rights, law of the sea, airspace and outer space, and sovereign immunity. Current Law Index Recueil Des Cours, Collected Courses 1993

Theorising within the American 'discipline' of International Relations has been plagued by a rather severe intellectual crisis. Theorists have meant that they need to emulate the natural sciences of the eighteenth and nineteenth centuries in outlook and argumentative style. But this has destroyed much awareness for the 'nature' of modern international relations as a dynamically evolving historical process. This book seeks to overcome the vicissitudes of mainstream theorising by abandoning the discipline's scientism and by adopting a stance that is more in tune with the standards of modern social science.

Current Law OUP Oxford

Quantitative finance is a combination of economics, accounting, statistics, econometrics, mathematics, stochastic process, and computer science and technology. Increasingly, the tools of financial analysis are being applied to assess, monitor, and mitigate risk, especially in the context of globalization, market volatility, and economic crisis. This two-volume handbook, comprised of over 100 chapters, is the most comprehensive resource in the field to date, integrating the most current theory,

methodology, policy, and practical applications. Showcasing contributions from an international array of experts, the Handbook of Quantitative Finance and Risk Management is unparalleled in the breadth and depth of its coverage. Volume 1 presents an overview of quantitative finance and risk management research, covering the essential theories, policies, and empirical methodologies used in the field. Chapters provide in-depth discussion of portfolio theory and investment analysis. Volume 2 covers options and option pricing theory and risk management. Volume 3 presents a wide variety of models and analytical tools. Throughout, the handbook offers illustrative case examples, worked equations, and extensive references; additional features include chapter abstracts, keywords, and author and subject indices. From "arbitrage" to "yield spreads," the Handbook of Quantitative Finance and Risk Management will serve as an essential resource for academics, educators, students, policymakers, and practitioners.

*Recueil Des Cours, Collected Courses 1993* Edwin Mellen Press  
The Academy is an institution for the study and teaching of public and private international law and related subjects. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the Collected Courses of the "Hague Academy of International Law." This volume contains: Fairness in the International Legal and Institutional System. General Course on Public International Law by T.M. FRANCK, Professor at

New York University. To access the abstract texts for this volume please click [here](#)

*Organized Crime* Springer Science & Business Media

Hidden Markov Models (HMMs), although known for decades, have made a big career nowadays and are still in state of development. This book presents theoretical issues and a variety of HMMs applications in speech recognition and synthesis, medicine, neurosciences, computational biology, bioinformatics, seismology, environment protection and engineering. I hope that the reader will find this book useful and helpful for their own research.

The Death Penalty Martinus Nijhoff Publishers

Comprehensive and up to date, the Second Edition of *Diagnostic Pathology: Infectious Disease*, by Dr. Richard Kradin, is an invaluable tool for the accurate diagnosis of any infectious disease—from the common to the most challenging. The organ-based format makes it an especially useful tool for surgical pathologists' daily diagnostic and management issues. High-quality, full-color illustrations and differential diagnosis tables accompany each lesion, clearly depicting how to recognize the morphology of organisms and the spectrum of histological responses that they may cause. Addresses the most difficult diagnostic issues that practicing or trainee surgical pathologists face when handling infectious disease tissue specimens. Highlights morphological characteristics and landmarks of tissue samples for easy access to information necessary for signing out a specimen. Emphasizes the host responses critical in differential diagnosis to serve as a second opinion when non-infectious diagnoses mimic and confound the diagnosis of infection.

Completely revised with the latest diagnostic support and hot topics in the field: A new chapter on novel techniques in microbiology A new chapter on eye infections New coverage of immunohistochemical staining and other molecular diagnostic techniques New discussions of human papillomavirus, a critical tool in predictive cancer screening New information on infections in the immunocompromised host and related special considerations

**Current Law Index** CRC Press

When Mehmet O or any of New York's leading doctors have a patient whose life depends on losing weight, they call on Joel Fuhrman, M.D. In *EAT TO LIVE*, Dr. Fuhrman offers his healthy, effective, and scientifically proven plan for shedding radical amounts of weight quickly, and keeping it off. Losing weight under Dr. Fuhrman's plan is not about will power, it is about knowledge. The key to this revolutionary diet is the idea of nutrient density, as expressed by the simple formula, Health = Nutrients/Calories. When the ratio of nutrients to calories is high, fat melts away and health is restored. Losing 20 pounds in two to three weeks is just the beginning. The more high-nutrient food Dr. Fuhrman's patients consume, the more they are satisfied with fewer calories, and the less they crave fat and high-calorie foods. Designed for people who must lose 50 pounds or more in a hurry, *EAT TO LIVE* works for every dieter, even those who want to lose as little as 10 pounds quickly. No willpower required—just knowledge!

**Political Science Abstracts** Cornell University Press

*Organized Crime: Analyzing Illegal Activities, Criminal Structures, and Extra-legal Governance* provides a systematic overview of

the processes and structures commonly labeled “organized crime,” drawing on the pertinent empirical and theoretical literature primarily from North America, Europe, and Australia. The main emphasis is placed on a comprehensive classificatory scheme that highlights underlying patterns and dynamics, rather than particular historical manifestations of organized crime. Esteemed author Klaus von Lampe strategically breaks the book down into three key dimensions: (1) illegal activities, (2) patterns of interpersonal relations that are directly or indirectly supporting these illegal activities, and (3) overarching illegal power structures that regulate and control these illegal activities and also extend their influence into the legal spheres of society. Within this framework, numerous case studies and topical issues from a variety of countries illustrate meaningful application of the conceptual and theoretical discussion.

**A Century of Psychology (Psychology Revivals)** Cambridge University Press

"Formal Languages and Applications" provides an overall course-aid and self-study material for graduates students and researchers in formal language theory and its applications. The main results and techniques are presented in an easily accessible way accompanied with many references and directions for further research. This carefully edited monograph is intended to be the gate to formal language theory and its applications and is very useful as a general source of information in formal language theory.

Spatial Neglect Springer Science & Business Media

This handbook provides the researcher and clinician with comprehensive coverage of the state of the art in

neuropsychology. Throughout the text, discussion of theoretical models is framed in a clinical context with case studies.

*Usability Engineering* Bloomsbury Publishing

The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

*Results of the Magnetical and Meteorological Observations Made at the Royal Observatory, Greenwich, in the Year ...* Springer Science & Business Media

Because of limited access to medical libraries and medical journals, the majority of clinicians may find it difficult to keep informed on the latest developments in drug manufacture and

treatment of infectious diseases in immunocompromised patients. This new handbook strives to fulfill the need for information in this area of medicine. This is the first book on drug development and treatment of infectious diseases in immunocompromised hosts. It integrates both results from large-scale clinical trials and single cases as well as small groups of patients. It covers bacterial, viral, parasitic, and fungal infections, including a wide array of diseases. *Infectious Diseases in Immunocompromised Hosts* encompasses not only opportunistic infections associated exclusively with immunocompromised patients, but also common infections that become life-threatening for immunosuppressed individuals.

*Handbook of Quantitative Finance and Risk Management*  
Psychology Press

This is the second volume arising from the 1994–2003 excavations of the Triconch Palace at Butrint (Albania), which charted the history of a major Mediterranean waterfront site from the 2nd to the 15th centuries AD. The sequence (Butrint 3: *Excavations at the Triconch Palace: Oxbow 2011*) included the development of a palatial late Roman house, followed by intensive activity between the 5th and 7th centuries involving domestic occupation, metal-working, fishing and burial. The site saw renewed activity from the 10th century, coinciding with the revival of the town of Butrint, and for the following 300 years continued in intermittent use associated with its channel-side location. This volume reports on the finds from the site (excluding the pottery), which demonstrate the ways in which the lives, diet and material culture of a Mediterranean population changed across the arc of the late Roman and Medieval periods. It includes

discussion of the environmental evidence, the human and faunal remains, metal-working evidence, and the major assemblages of glass, coins and small finds, giving an insight into the health, subsistence base and material culture of the population of a Mediterranean site across more than 1000 years. The findings raise important questions regarding the ways in which changes in the circumstances of the town affected the population between Late Antiquity and the Middle Ages. They illustrate in particular how an urban Roman center became more rural during the 6th century with a population that faced major challenges in their health and living conditions.

*Butrint 5: Life and Death at a Mediterranean Port* SAGE Publications

Arteriovenous malformations (AVM) and arteriovenous fistulas (AVF) differ from all other pathology affecting the central nervous system by their high-flow arteriovenous shunts. Permanent occlusion of these shunts is the essence and the challenge of therapy. Endovascular therapy and radiosurgery became accepted alternatives or adjuncts to surgery. In many instances the choice of the primary therapeutic modality is not clear and arguments can be found for several options. However, microsurgery, endovascular therapy and radiosurgery differ very much with regard to invasiveness, length of stay at the hospital but also residual risk after therapy. The emerging treatment concepts are the object of this book. The result is a unique structured presentation of AVM and AVF therapy.

**A Selected Socio-legal Bibliography on Ethnic Cleansing, Wartime Rape, and Genocide in the Former Yugoslavia and Rwanda** World Bank Publications

The fifth edition of this highly praised study charts and explains the progress that continues to be made towards the goal of worldwide abolition of the death penalty. The majority of nations have now abolished the death penalty and the number of executions has dropped in almost all countries where abolition has not yet taken place. Emphasising the impact of international human rights principles and evidence of abuse, the authors examine how this has fuelled challenges to the death penalty and they analyse and appraise the likely obstacles, political and cultural, to further abolition. They discuss the cruel realities of the death penalty and the failure of international standards always to ensure fair trials and to avoid arbitrariness, discrimination and conviction of the innocent: all violations of the right to life. They provide further evidence of the lack of a general deterrent effect; shed new light on the influence and limits of public opinion; and argue that substituting for the death penalty life imprisonment without parole raises many similar human rights concerns. This edition provides a strong intellectual and evidential basis for regarding capital punishment as undeniably cruel, inhuman and degrading. Widely relied upon and fully updated to reflect the current state of affairs worldwide, this is an invaluable resource for all those who study the death penalty and work towards its removal as an international goal.

**International Society and the Making of International Order** Elsevier

Whose Ideas Matter? is the first book to explore the diffusion of ideas and norms in the international system from the perspective of local actors, with Asian regional institutions as its main focus.

The 1996 Supplement of Political Science Abstracts contains 10,000 carefully prepared abstracts of materials from public affairs magazines, major newspapers, professional journals, and books devoted to politics and political analysis. The organization of the proceeding volumes has been retained intact, as has the recently added list of subdisciplinary descriptors. Users of earlier volumes will be on familiar ground, while those new to Political Science Abstracts will find the instructions on page ix easy to master. CONTENTS Volume 1 (This Volume) How to Use This Supplement . ix Political Science Subdisciplinary Descriptors xi Index of Terms ..... . xiii Abstracts of Documents in This Supplement. Volume 2 Bibliographic Index to the Abstracts (ABILITY-MINNESOTA) . 821 Volume 3 Bibliographic Index to the Abstracts (MINORITY-ZULU) 1565 Author Index. . . . . 2119 List of Periodicals Abstracted in This Supplement. 2121 HOW TO USE THIS SUPPLEMENT Three simple steps are all that are needed to introduce the user to this easily accessible indexing system. STEP 1: Turn to the Index of Terms and locate as many terms as possible that deal with your subject. If you are interested in coverage of a more generic nature, you may instead turn to the next page, where key descriptors are listed that are associated with the major subject areas in political science and with their subdivisions. Note that the index includes methodological as well as topical terms. Numerical listings (e.g., 24TH/PAR/C) are located at the end of the alphabetical listing. *Formal Languages and Applications* Elsevier Health Sciences The definitive and authoritative international law text, updated to reflect key case law, international practice and treaty

developments.

*Abridged Index Medicus* Frontiers Media SA

Public accountability is a hallmark of modern democratic governance and the foundation of the popular performance management movement. Democracy is just an empty exercise if those in power cannot be held accountable in public for their acts and omissions, for their decisions, their policies, and their expenditures. This book offers a finely detailed and richly informed consideration of accountability in both government and the contemporary world of governance. Twenty-five leading

experts cover varying aspects of the accountability movement, including multiple and competing accountabilities, measuring accountability, accountability and democratic legitimacy, and accountability and information technology, and apply them to governments, quasi-governments, non-government organizations, governance organizations, and voluntary organizations. Together they provide the most comprehensive consideration of accountability currently available, with a blend of theoretical, empirical, and applied approaches.
