The World Drug Report 2009 presents comprehensive information on the illicit drug situation. It provides detailed estimates and trends on production, trafficking and consumption in the opium/heroin, coca/cocaine, cannabis and amphetamine-type stimulants markets. This year, for the first time, the Report includes special feature sections on the quality of drug data available to the United Nations Office on Drugs and Crime (UNODC), trends in drug use among young people and police-recorded drug offences. It also discusses one the most formidable unintended consequences of drug

control 'the black market for drugs' and how the international community best can tackle it

In 2012, a Forestry Special Interest Group (FSIG) was founded within the Canadian Operational Research Society (CORS).

Besides a general commitment to promoting the application of operational research (OR) to forest management and

forest products

industry problems, the FSIG has two concrete mandates: organizing the forestry cluster at the annual CORS conference, and managing the editorial process for forestry-themed special issues of INFOR. The FSIG has been very successful in the first of these two mandates, with record attendance at the forestry cluster over the last four years, hosting of several special sessions, financial and in-kind support from the NSERC Strategic Network on Value Chain Optimization (VCO), and the inauguration of the David Martell Student Paper Prize in Forestry (DMSPPF). This is the first compilation of forestry-themed papers since the inauguration

of the CORS FSIG. The six pieces selected for the special issue, now published as a book, feature applications of OR to a wide range of forest management and forest products industry contexts, including supply-chain planning, lumber production planning, demand-driven harvest and transportation planning, and fire-aware wood supply planning. This book was originally published as a special issue of the INFOR: Information Systems and Operational Research journal.

This is the first comprehensive book on Argentinian pedology. It discusses the main soil types of Argentina, their

geographical distribution, classification, functions, agricultural use, ecological aspects, and the threats to which they have been subjected during centuries of intensive and extensive management. The description of the soils is accompanied by a complete set of data, pictures and maps, including benchmark profiles and an overview of the country's agricultural production. It also deals with future scenarios of the relationships between soil science and other disciplines and the main challenges that soil science will face in the future. Further, the book explores aspects of the main soil forming factors, such

as climate, vegetation, geology and geomorphology, making use of new, unpublished data and elaborations, and presents a history of pedological research in Argentina.

After many years of severe institutional crisis, Bolivia is changing its development strategy to build a state that is more inclusive and effective. This book contributes to the debate on how to confront the challenges. It is composed of a series of studies that look at the different sectors of society and the economy, identify the problems and propose policy recommendations.

This open access book tells the story of how Sweden is becoming a virtually cashless society. Its goal is to improve readers' understanding of what is driving this transition, and of the factors that are fostering and hampering it. In doing so, the book covers the role of central banks, political factors, needs for innovation, and the stakeholders involved in developing a cashless ecosystem. Adopting a historical standpoint, and drawing on a unique dataset, it presents an academic perspective on Sweden's leading role in this global trend. The global interest in the future of cash payments makes the Swedish case particularly interesting.

As a country that is close to becoming a cashless economy, it offers a role model for many other countries to learn from - whether they want to stimulate or reduce the use of cash. This highly topical book will be of interest to politicians, researchers, businesses, financial service providers and payment service providers, as well as fintech start-ups, regulators and other authorities.

Muchos mercados de drogas ilícitas han alcanzado dimensiones globales y requieren estrategias de control en una escala comparable. En ese contexto, es necesario comprender estos mercados transnacionales y la forma en que operan. El informe anual, producido por la Oficina de las Naciones Unidas contra la Droga y el Delito, es una contribución para ese objetivo. Proporciona una visión general de la situación de las drogas ilícitas en todo el mundo y a nivel regional, discusiones analíticas de los

mercados transnacionales de drogas clave y tendencias estadísticas para todas las categorías principales de drogas.

As lifelong learning grows in popularity, few comprehensive pictures of the phenomenon have emerged. The Routledge International Handbook of Lifelong Learning provides a disciplined and complete overview of lifelong learning internationally. The theoretical structure puts the learner at the centre and the book emanates from there, pointing to the social context beyond the learner. Up-to-the-minute syntheses from

many of the leading international experts in the field give vital snapshots of this rapidly evolving subject from wide-ranging perspectives including: learning throughout life sites of lifelong learning modes of learning policies social movements issues in lifelong learning geographical dimensions. This authoritative volume, essential reading for academics in the field of Lifelong Learning, examines the complexities of the subject within a systematic global framework and places it in its socio-historic context.

The OECD Skills Strategy provides a

strategic and comprehensive approach for ensuring that people and countries have the skills to thrive in a complex, interconnected and rapidly changing world. The updated 2019 OECD Skills Strategy takes account of the lessons learned from applying the original skills strategy in 11 countries since 2012, while also incorporating new OECD evidence about the skills implications of megatrends, such as globalisation, digitalisation, population ageing, and migration. The Strategy also incorporates new learning from across the OECD about skills policies that work in these three broad components:

developing relevant skills over the life course, using skills effectively in work and society, and strengthening the governance of skills systems.

This report discusses the IMF/World Bank Financial Sector Assessment Program (FSAP) exercise for China undertaken

during June–December 2010. The assessment concluded that reforms in China have progressed well in moving toward a more commercially oriented financial system.

Despite success and rapid growth, China's financial sector is confronting several near-term risks, structural challenges, and policy-induced distortions. A properly composed and timely implemented set of reforms would help address these challenges. A framework to resolve weak financial institutions on a timely basis is also needed.

In a world characterized by globalization, governments

increasingly find themselves unable to govern. Corruption is everywhere, natural resources are being exploited, the environment damaged, markets distorted, and the fight against poverty is often ineffective. Certain challenges cannot be addressed by governments alone. Increasingly, collective governance “beyond governments” is seen as part of the solution, with state and non-state actors working together. This book sets out a framework for those wishing to implement collective governance, involving civil society, companies and governments as key actors. Based on over eight years of running the most advanced example of collective

governance at international level, the Head and Deputy Head of the Extractive Industries Transparency Initiative (EITI) outline the practicalities and pitfalls, and draw out the experience of the EITI as a case example. *Beyond Governments* tells a positive story of how this type of innovative governance can make real achievements, but also cautions against those who see collective governance as a silver bullet to solve development challenges. It provides practical guidance from a practitioner’s perspective and is essential reading for those in government, business and academia.

 La riforma 'Quota 100' ha il merito di aver preso in considerazione l'aspetto dell'equità sociale del sistema pensionistico con l'obiettivo di introdurre una maggiore flessibilità in esso; essa nasce per dare una risposta alla necessità di allentare i vincoli posti dalle riforme più recenti, nella convinzione che la 'Riforma Fornero' (Legge n. 214 del 2011) sia stata troppo 'brusca', determinando di fatto l'impossibilità di un ricambio generazionale nel mondo del lavoro, ora resosi improcrastinabile e, quindi, necessario.

 "... a book of striking originality and depth, a brilliant and quite new interpretation of the nature and history of philosophy." -- John Sallis
In Broken Hegemonies, the late distinguished philosopher Reiner SchÄ¼rmann offers a radical rethinking of the history of Western philosophy from the Greeks through Heidegger. SchÄ¼rmann interprets the history of Western thought and action as a series of eras governed by the rise and fall of certain dominating philosophical ideas that contained the seeds of their own destruction. These eras coincided with their dominant languages: Greek, Latin, and vernacular

tongues. Analyzing philosophical texts from Parmenides, Plotinus, and Cicero, through Augustine, Meister Eckhardt, and Kant, to Heidegger, SchÄ1/4rmann traces the arguments by which these ideas gained hegemony and

by which their credibility was ultimately demolished. Recognizing the failure of ultimate norms, Broken Hegemonies questions how humanity today is to think and act in the absence of principles.
