What You Need to Know If You Are Hit by  
a Tractor-Trailer Transportation Research  
Board

In the almost ten years since the publication of the first edition of Motor Fleet Safety and Security Management, the availability of new methods of transportation has made travel faster, and consequently, safety and security have become more important and more complex. Businesses must now become

proactive in their own security and planning for emergencies. This second edition of a bestselling resource provides a complete understanding of how to develop and manage a comprehensive motor fleet safety and instructional program. It presents the underlying concepts, basic techniques, and principles of motor fleet safety and security management. New, Revised, and Expanded Topics in the Second Edition: Elements of a fleet safety program Accident prevention Consideration for small-fleet driver selection, training, instruction, and

supervision Vehicle inspection How to organize accident data Job safety analysis (JSA) meetings for commercial drivers Fleet transportation publicity School bus safety Shipping and storage of hazardous materials Security in transportation Model of a motor fleet transportation program designed to assist in the implementation of a program To achieve optimum safety, everyone involved in the transportation system should be adequately trained, supervised, and monitored. Proper data and incident reports must be maintained to identify trends and problem areas. Keeping the trademark style that made the previous edition so popular, the author addresses the critical steps for successful driver selection, training, instruction, and supervision. He provides

you with the foundation you need to combat common problems and manage your motor fleet transportation system. *Highway Safety Literature Annual Cumulation ...* Charles C Thomas Pub Limited Offers information on the current practices of transit agencies to reduce injuries to bus occupants during collisions and injuries to passengers while boarding, riding, and leaving the bus.

**Highway Safety Literature** Advantage Media Group  
 "TRB's Commercial Truck and Bus Safety Synthesis Program (CTBSSP) Synthesis 21: Driver Selection Tests and Measurement synthesizes information on the use of tests, measurements, and other assessment methods used by

commercial truck and bus companies in the driver selection process. The report also identifies and describes driver selection methods and instruments and their potential usefulness in predicting driver crash risk."--Publisher's description.

*Driving and Employability* Delmar Pub  
License to Drive 2E provides driving instructors with an integrated learning program. Using a realistic approach, it covers all major driver education issues, with an emphasis on safety and defensive driving that will appeal to all new drivers. All major driving methods are covered, including SIPDE, Smith system and IPDE. The focus is on

practical solutions to everyday situations, with thoughtful coverage of such subjects as driving under the influence, sharing the road, challenging driving conditions and aggressive driving. Thought-provoking scenarios and evaluation questions in each chapter engage the student, provide a wealth of discussion material, and encourage active learning. The entire text has been revised to reflect the most up-to-date driving regulations. Additional content has been inserted throughout, including a section on the dangerous effects of newer club drugs, such as Ecstasy, on driving performance. License to Drive 2E is available in hardcover or soft cover. The student workbook contains illustrations, word-searches, crosswords, plus multiple-choice and critical thinking

questions. The Electronic Classroom Manager replaces the Annotated Teacher's Edition and Computerized Test Bank from the first edition, and provides the answer key to the workbook, computerized test bank, lesson plans, student activities and games, PowerPoint files and transparency masters. The set of 5 VHS video tapes offered with the first edition has been converted to a set of two, high-quality DVDs. State-specific content can be found in the online companion. Components may be used individually, or to complement one another in the classroom, creating a multi-media learning environment. For more information on instructor resources, DVDs, student workbooks and materials, see Supplemental Materials section on the right side bar.

### **NETS Four Seasons Guide for Saving Lives** Bus Occupant Safety

To transport people and materials safely, it is essential that everyone involved in a transportation system be adequately trained, supervised, and monitored.

Detailed data and incident reports must be maintained to identify trends and problem areas, and to implement process and safety improvements. Motor Fleet Safety and Security Management provides

**Commercial Carrier Journal** CRC Press  
TRB's Transit Cooperative Research Program (TCRP) Report 125: Guidebook for Mitigating Fixed-Route Bus-and-Pedestrian Collisions is designed to help assist small, medium, and large transit agencies and their community members in identifying preventative or remedial

strategies for reducing the frequency and severity of bus-and-pedestrian collisions. The report explores strategies to mitigate collisions, includes case studies on the implementation of mitigating strategies, and highlights important considerations associated with improving pedestrian safety around transit buses.

*Catalog of Educational Captioned Films/videos for the Deaf* Transportation Research Board

TRB's Transit Cooperative Research Program (TCRP) Report 127, Employee Compensation Guidelines for Transit Providers in Rural and Small Urban Areas explores salary and benefit characteristics of transit systems in rural and small urban areas. An interactive computer tool, produced as part of this

project, is available online and is designed to allow transit managers to quickly and easily obtain compensation and benefit data from comparable transit systems.

*Law Enforcement Driving* Transportation Research Board

This report presents a directory of effective practices used to prevent bus accidents at small, medium, and large transit systems. Most of the information was obtained from 182 transit systems in the United States and in Canada and from statewide transit insurance pools in six states. The directory is designed to be used by transit management, operations, and safety personnel.

Motor Fleet Safety and Security Management CRC Press

Surviving your collision with a tractor-

trailer is only the beginning “No one in their right mind plans for a collision, let alone one with one of those gargantuan semi-tractor-trailers thundering down the interstates. Yet collisions do happen. When they do, what you do immediately is of critical importance. Attorney Alan LeVar’s *No Accidents—Only Collisions* is a comprehensive guide to protecting yourself and the people you love and delivers essential advice for getting access to the medical attention and other services when they are needed most.” —R.B. Scott journalist and author of *Mitt Romney: An Inside Look at the Man and His Politics* “I was raised in a time when a man’s word was his bond. That’s all I have ever known from the time I could remember until now, here I am at age 66. During those years I have

witnessed men in all professions choose to sell their integrity over doing what is right. I can say without any hesitation that Alan LeVar still stands for what is right. What better words can be said about a man?” —Larry Cole

*a handbook for employers*

One of a 5-volume set, each covering a broad subject, which cumulates annually all citations that appeared during the year in: Highway safety literature. In present volume, annotated entries arranged under emergency services, injuries, investigations and records, and locations. No index.
