The existing Cargo Management Portal system requires a lot of paperwork. In most cases shipping companies maintain offices in many countries so as to be able to conduct the shipping formalities locally. Consignors and consignees also require a local representative to ensure that all the documents are in order before and after shipping.

**Cargo Management Portal PHP Project - ProjectsGeek**

Project codes are used to distinguish requisitions and related documentation and shipments, and to accumulate Service/Agency (S/A) performance and cost data related to exercises, maneuvers, and other distinct programs, projects, and operations. If no project code is applicable, leave blank in

the applicable transaction.

AP2.13.2.Appendix 2.13 - Project Codes  
The Transportation Management System (TMS) built for our customer takes the shipment request from cradle to proof of delivery, including spot quotes, contract rates and detention requests. Our customer loves the system because it segmented that specific business portfolio of information without having to go through years of effort and surplus ...
