Recent decades have
seen a major expansion in
our understanding of how
early Greek lyric
functioned in its social,
political, and ritual
contexts, and the

fundamental role song
played in the day-to-day
lives of communities,
groups, and individuals
has been the object of
intense study. This
volume places its focus
elsewhere, and attempts
to illuminate poetic
effects that cannot be
captured in functional
terms alone. Employing a
range of interpretative
methods, it explores the
idea of lyric performances

as 'textual events'. Some
chapters investigate the
pragmatic relationship
between real performance
contexts and imaginative
settings, while others
consider how lyric poems
position themselves in
relation to earlier texts
and textual traditions, or
discuss the distinctive
encounters lyric poems
create between listeners,
authors, and performers.
Individual lyric texts and

authors, such as Sappho, Alcaeus, and Pindar, are analysed in detail, alongside treatments of the relationship between lyric and the Homeric Hymns. Building on the renewed concern with the aesthetic in the study of Greek lyric and beyond, Textual Events aims to re-examine the relationship between the poems' formal features and their historical contexts. Lyric poems are a type of socio-political discourse, but they are also objects of attention in themselves. They enable reflection on

social and ritual practices as much as they are embedded within in them, but as well as expressing cultural norms, lyric challenges listeners to think about and experience the world afresh.

By exploring various ways to assimilate recent progressive developments and to renew its vital links with its radical roots, *Re-Visioning Person-Centred Therapy: Theory and Practice of a Radical Paradigm* takes a fresh look at this revolutionary therapeutic approach. Bringing together leading figures in PCT and new

writers from around the world, the essays in this book create fertile links with phenomenology, meditation and spirituality, critical theory, contemporary thought and culture, and philosophy of science. In doing so, they create an outline that renews and re-vision person-centred therapy's radical paradigm, providing fertile material in both theory and practice. Shot through with clinical studies, vignettes and in-depth discussions on aspects of theory, Re-

Visioning Person-Centred Therapy will be stimulating reading for therapists in training and practice, as well as those interested in the development of PCT. Re-Visioning Person-Centred Therapy

The increasing advances in electronics allows smaller and more powerful devices, bringing wearable computing closer to reality. However, most wearable computers are very distinguished and placed on clothes and accessories. This book

tries to tackle this phenomenon by introducing a new wearable computing subfield called beauty technology. By using the body's surface as an interactive platform, the integration of technology into beauty products is explored and can be applied directly to ones skin, fingernails, and hair adding new functionality to beauty products using technology in a personal, seamless and fashionable way. An interdisciplinary approach is taken, exploring the design of

Beauty Technologies such as Conductive Makeup, Tech Nails, Hairware and FX e-makeup in order to create novel interfaces for Human Computer Interaction.

Sometimes you can't get by on charm alone. Prince Henry is used to fielding the pitfalls of fame, even when he has to dodge threats on his life. With the political climate growing dangerously

volatile, everyone he comes near is suspect for trying to take down the throne. When Henry stumbles upon a woman who makes him view the world in a whole new light, he knows he can't ignore the tug Ella has on his heart. When Ella finally helps Henry see that the kingdom might be headed in the wrong direction, political rivals begin to attack. Caught between his desire to be a good leader and his need for more of her, Henry must decide if the path he's chosen will lead to a

stronger future, or if following his heart will be the ruin of a kingdom. This is book three in the "Cursed Beauty" trilogy by USA Today Bestselling Author Mary E. Twomey. [Performance and the Lyric in Early Greece](#) Springer In the second edition of The Idea of Nature in Disney Animation, David Whitley updates his 2008 book to reflect recent developments in Disney and Disney-Pixar animation such as the apocalyptic tale of earth's failed ecosystem, WALL-E.

As Whitley has shown, and Disney's newest films continue to demonstrate, the messages animated films convey about the natural world are of crucial importance to their child viewers. Beginning with *Snow White*, Whitley examines a wide range of Disney's feature animations, in which images of wild nature are central to the narrative. He challenges the notion that the sentimentality of the Disney aesthetic, an oft-criticized aspect of such films as *Bambi*, *The Jungle Book*, *Pocahontas*,

Beauty and the Beast, and *Finding Nemo*, necessarily prevents audiences from developing a critical awareness of contested environmental issues. On the contrary, even as the films communicate the central ideologies of the times in which they were produced, they also express the ambiguities and tensions that underlie these dominant values. In distinguishing among the effects produced by each film and revealing the diverse ways in which images of nature are mediated, Whitley urges

us towards a more complex interpretation of the classic Disney canon and makes an important contribution to our understanding of the role popular art plays in shaping the emotions and ideas that are central to contemporary experience. **Beauty's Cursed Prince**

This volume explores the relationship among beauty, violence, and representation in a broad range of artistic and cultural texts, including literature, visual art, theatre, film, and music. Charting diversifying

interests in the subject of violence and beauty, dealing with the multiple inflections of these questions and representing a spectrum of voices, the volume takes its place in a growing body of recent critical work that takes violence and representation as its object. This collection offers a unique opportunity, however, to address a significant gap in the critical field, for it seeks to interrogate specifically the nexus or interface between beauty

and violence. While other texts on violence make use of regimes of representation as their subject matter and consider the effects of aestheticization, beauty as a critical category is conspicuously absent. Furthermore, the book aims to "rehabilitate" beauty, implicitly conceptualized as politically or ethically regressive by postmodern anti-aesthetics cultural positions, and further facilitate its come-back into critical discourse. *Robotic Heart* Cornell

Human Judgement and the Pursuit of New Beauties in Post-Digital Architecture Cinco Puntos Press

From the wooden teeth of George Washington to the Bly prosthesis, popular in the 1860s and boasting

easy uniform motions of the limb, to today's lifelike approximations, prosthetic devices reveal the extent to which the evolution and design of technologies of the body are intertwined with both the practical and subjective needs of human beings. The peculiar history of prosthetic devices sheds light on the relationship between technological change and the civilizing process of modernity, and analyzes the concrete materials of prosthetics which carry with them

ideologies of body, ideals, body politics, and culture. Simultaneously critiquing, historicizing, and theorizing prosthetics, Artificial Parts, Practical Lives lays out a balanced and complex picture of its subject, neither vilifying nor celebrating the merger of flesh and machine.

From images of Eve to Cindy Sherman's self-portraits, from Cleopatra to Madonna, from ancient goddesses to modern celebrities, this work offers an overview of the most revered icons of female beauty in world art from pre-history to the present. What gives beauty such fascinating power? Why is beauty so easy to recognize but so hard to define? Across cultures and continents and over the centuries the standards of beauty have

changed but the desire to portray beauty, to praise beauty, and to possess beauty has never diminished. This set offers insight as to how we can use perceptions of beauty to learn about world cultures, both past and present. Each chapter looks at an individual work of art to pose a question about the power of beauty. What makes beauty modern? What is the influence of celebrities? How do women portray their own beauty in a different manner than men? In-

depth profiles of the icons reveal how specific ideas about beauty were developed and expressed, offering a full analysis of their history, cultural significance, and lasting influence. In addition to renowned works of art, it also looks at icons in literature, film, politics, and contemporary entertainment. Interdisciplinary and multicultural in its approach, chapters inside this set also feature sidebars on provocative topics and issues, such as foot binding and body

adornment; myths and practices; opinions and interpretations; and even related films, songs, and even comic book characters.

 Visualizing Beauty examines the intersections between feminine ideals and changing socio-political circumstances in China, Japan, and Korea during the first half of the twentieth century. Eight essays present a broad range of visual products that informed concepts of beauty and womanhood, including fashion, interior design magazines, newspaper illustrations, and paintings of and by women. Studying

"Traditional Woman" and "New Woman" as historical categories, this anthology contemplates the complex relations between feminine subjectivity and the promotion of modernity, commerce, and colonialism.
