Professor Robert Rennie

has been one of the most influential voices in Scots private law over the past thirty years. Highly respected as both an academic and a practitioner, his contribution to the development of property law and practice has been substantial and unique. This volume celebrates his retirement from the Chair of Conveyancing at the University of Glasgow in 2014 with a selection of essays written by his peers and colleagues from the judiciary, academia and legal practice. Each

chapter covers a topic of particular interest to Professor Rennie during his career, from the historical development of property law rules through to the latest developments in conveyancing practice and the evolution of the rules of professional negligence. Although primarily Scottish in focus, the contributions will have much of interest to lawyers in any jurisdiction struggling with similar practical problems, particularly those with similar legal roots

including the Netherlands and South Africa. As a whole, the collection is highly recommended to students, practitioners and academics.

Its main aims include to maintain and develop a stable and effective land registration system throughout England and Wales, and to guarantee title to registered estates and interests in land. This annual report and accounts reviews the Registry's activities, objectives and performance during the

A Guide to the 18th Century Land Records in the Irish Registry of Deeds Brian Nugent

The history of Ireland is one that was long dominated by the question of land ownership, with complex

and often distressing tales over the centuries of dispossession and colonisation, religious tensions, absentee landlordism, subsistence farming, and considerably more to sadden the heart. Yet with the destruction of much of Ireland's historic record during the Irish Civil War, and with the discriminatory Penal Laws in place in earlier times, it is often within land records that we can find evidence of our ancestors' existence, in some cases the only evidence, where the relevant vital records

for an area may never have been kept or may not have survived. In *Tracing Your Irish Ancestors Through Land Records*, genealogist and best-selling author Chris Paton explores how the surviving records can help with our ancestral research, but also tell the stories of the communities from within which our ancestors emerged. He explores the often controversial history of ownership of land across the island, the rights granted to those who held estates and the

plights of the dispossessed, and identifies the various surviving records which can help to tease out the stories of many of Ireland's forgotten generations. Along the way Chris Paton identifies the various ways to access the records, whether in Ireland's many archives, local and national, and increasingly through a variety of online platforms.

Key provisions of the Land Registration Act 2002 provide the legal framework for electronic conveyancing. This book will explain the legislative framework and the current proposals – including the key issues of security and authorisation – and will highlight the points that need to be addressed by practitioners in order to qualify for access to the new system. Electronic conveyancing will not be

with us until 2006 and this book will take a thematic approach, highlighting the main practical issues arising from the new law and providing precedents and checklists to help busy conveyancers to manage the risks. This book will seek to highlight – and to give practical advice on – the day to day requirements of the new regime, and to promote sensible and cost-effective management of the risks.

The Registry of Deeds in Dublin contains a vast repository of summaries of Irish land transactions for the 18th century. This collection is particularly important, to genealogists among others, because of

the destruction of other historical records in Ireland for the same period, especially since the Four Courts fire of 1922. In this guide you will find a description of the records held there, an explanation of the different Irish land and currency units used, and a wide ranging discussion of Irish land transactions and registries of the period and somewhat later. This includes the influence of the Penal Laws, the nature of Irish marriage settlements and the economic climate and

prices prevailing in Ireland in that century. Chapter 8 consists of a detailed case study that traces the history of an Irish family, the Nugent branch of Ballina Co. Meath, in order to illustrate the value of the information in the Registry of Deeds. *New Horizons for Torrens* Springer Science & Business Media
This book presents a clear and precise overview of the key aspects of German business law. It was written by attorneys involved in the daily practice of business law in

Germany and is aimed at people who wish to orient themselves quickly with the German legal system and the manner in which it impacts business purchases, establishment, operations and liquidations. The first section of the book is devoted to an explanation of the major issues to be considered in acquiring or establishing a business in Germany. The second section focuses on areas of commercial law that are important for an operating business. In comparison to the last

edition four new areas (transportation law, customs regulations, insurance law and state liability law) are treated. The following sections deal with labor law as an independent part of German business law and with computer law. Furthermore, procedural law and European law are addressed. Finally, the last two sections of the book are devoted to an overview over the German tax law, which has an enormous impact on business decisions, and IP law. In all sections

special attention has been paid to highlighting and explaining the differences between the German legal system and that of the United States. Nevertheless, the intention is to provide information that will prove valuable to all foreigners, particularly business men and women and lawyers advising clients with an interest in doing business in Germany. Oxford University Press
Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of property in

Hungary deals with the issues related to rights and interests in all kinds of property and assets – immovable, movable, and personal property; how property rights are acquired; fiduciary mechanisms; and security considerations. Lawyers who handle transnational disputes and other matters concerning property will appreciate the explanation of specific terminology, application, and procedure. An introduction outlining the essential legal, cultural, and historical

considerations affecting property is followed by a discussion of the various types of property. Further analysis describes how and to what extent legal subjects can have or obtain rights and interests in each type. The coverage includes tangible and intangible property, varying degrees of interest, and the various ways in which property is transferred, including the ramifications of appropriation, expropriation, and insolvency. Facts are presented in such a way

that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. The book includes ample references to doctrine and cases, as well as to relevant international treaties and conventions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for any practitioner faced with a property-related matter. Lawyers representing

parties with interests in Hungary will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative property law.

Routledge

This book is an examination of the law of land registration in England and Wales, in the light of the Land Registration Act 2002, and in particular at the way land registration is

influenced by, and in turn influences, the evolution of land law as a whole. It examines the legal problems that have arisen in connection with land registration and considers the effect of the 2002 statute, drawing extensively upon the law in other jurisdictions and considering possibilities for future development. This is a book which will be essential reading for students, their teachers, and practitioners who will have to grapple with the intricacies of the new Act when it comes into force.

'A formidable, brave and important book' Robert Macfarlane Who owns England? Behind this simple question lies this country's oldest and best-

kept secret. This is the history of how England's elite came to own our land, and an inspiring manifesto for how to open up our countryside once more. This book has been a long time coming. Since 1086, in fact. For centuries, England's elite have covered up how they got their hands on millions of acres of our land, by constructing walls, burying surveys and more recently, sheltering behind offshore shell companies. But with the dawn of digital mapping and the Freedom of

Information Act, it's becoming increasingly difficult for them to hide. Trespassing through tightly-guarded country estates, ecologically ravaged grouse moors and empty Mayfair mansions, writer and activist Guy Shrubsole has used these 21st century tools to uncover a wealth of never-before-seen information about the people who own our land, to create the most comprehensive map of land ownership in England that has ever been made public. From secret

military islands to tunnels deep beneath London, Shrubsole unearths truths concealed since the Domesday Book about who is really in charge of this country - at a time when Brexit is meant to be returning sovereignty to the people. Melding history, politics and polemic, he vividly demonstrates how taking control of land ownership is key to tackling everything from the housing crisis to climate change - and even halting the erosion of our very democracy. It's time to

expose the truth about who owns England - and finally take back our green and pleasant land. Practitioner's Guide to the Land Registration Act 2002 Bloomsbury Publishing

This book examines the current state of, and emerging issues in relation to, the Torrens and other systems of land registration, and the process of automation of land registration systems in jurisdictions where this is occurring worldwide. It analyses the impacts of advances in digital

technology in this area and includes contributions from of a number of experts and leaders in this subject from a number of jurisdictions. While it has an Australasian bias, there are important chapters outlining current challenges and developments in Scotland, England and Wales, Ireland, and the Netherlands. The book will be relevant to those engaged in land registration and conveyancing processes, including, but not limited to, property law

practitioners and conveyancers, academics in this field, government and public policy experts, law and property students, and IT and IP experts, especially those working on developing automated land registration systems. Land Registration and Cadastral Systems Council of Europe
The Land Registration Act 2002 has been in force for almost fifteen years. When enacted, the legislation, which replaced the Land Registration Act 1925, was intended to

offer a clear and lasting framework for the registration of title to land in England and Wales. However, perhaps confounding the hopes of its drafters, the legislation's interpretation and application has since generated many unanticipated problems which demand attention. In this book's twenty chapters, leading land law scholars, Law Commissioners past and present, judges, and Registry lawyers unpick key technical controversies, and expose

underlying theoretical and policy concerns. Core issues addressed in these chapters include: the legitimate ambitions of registration regimes; the nature and security of title afforded by registration; the resolution of priority disputes affecting registered titles; the relationship between the general law and the registration regime; and new challenges presented by modern technological developments.
