When Charles Darwin published *The Origin of Species* in 1859, he forever altered the way people looked at their place in the world: humans were just another animal species that evolved from more primitive life forms. After graduating college, Charles was hired as a naturalist aboard the HMS Beagle where he would collect the specimens he would use to make the case for biologic evolution through natural selection. By the time he returned to England in 1836 he was a celebrity, but it would be more than 20 years before he published his groundbreaking work. Darwin's theory ultimately helped Richard Owen solve the riddle of the enormous fossils found all over the world: they were not dragon bones of lore, but the remnants of extinct species that once inhabited the earth. *Darwin and the True Story of the Dinosaurs* is a fast-paced, entertaining biography of the naturalist who changed humankind's understanding of its origins. In addition to its lively story, it includes 220 illustrations, a glossary, and sidebars covering related topics, from fossils to continental drift to medicine in the 19th century."

Jan Kozma's translation of Marianna Sirca is the near-literal rendering of a novel written by Grazia Deledda (1871-1936), the celebrated Italian author from Sardinia who won the Nobel Prize for Literature in 1926. Almost all of Deledda's stories treat the lives, loves, tragedies, and triumphs of the author's native land - the remote, isolated, and often forbidding island of Sardinia. This new translation includes an introduction that highlights the salient episodes of Grazia Deledda's life and which situates Marianna Sirca both literarily within the author's opera omnia and as part of the general literary trends of the early European twentieth century. Jan Kozma presents the homonymous protagonist,

Marianna Sirca, as one of the great literary precursors of the liberated, independent, modern woman - an ironic twist, given the repressive culture in which Marianna lives. The translator also provides numerous explanatory foot-notes that elucidate particular arcane aspects of Sardinian life in the late nineteenth century. Marianna Sirca is a 30-year-old woman of inherited wealth who lives in Nuoro, Sardinia. Because of her strong will and sense of independence, Marianna is the family "black sheep" - refusing to be married off to a distant relative in a social arrangement of convenience. Instead Marianna becomes involved with Simone Sole, a younger man who was a servant in the Sirca household in his youth and who is now an outlaw - wanted for banditry. Against the will of her entire family, the lovers plan to marry, but at Marianna's insistence only after Simone "gets right with the law." The novel traces the story of these two emarginated lovers through various twists and turns, ending with a typical Deleddan flourish that leaves the reader with a real awareness of Sardinian, social mores, values, attitudes, and tradition.

Hedda Gabler is a play written by Norwegian playwright Henrik Ibsen. Ibsen was present at the world premiere, which took place on 31 January 1891 at the Residenztheater in Munich. It is recognized as a classic of realism, nineteenth century theatre, and world drama. The title character, Hedda, is considered one of the great dramatic roles in theatre. Hedda's married name is Hedda Tesman; Gabler is her maiden name. On the subject of the title, Ibsen wrote: "My intention in giving it this name was to indicate that Hedda as a personality is to be regarded rather as her father's daughter than her husband's wife."

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The First World War was the first "total war". Its industrial weaponry damaged millions of men and drove whole armies underground into dangerously unhealthy trenches. Many were killed. Many more suffered terrible, life-threatening injuries: wound infections such as gas gangrene and tetanus, exposure to extremes of temperature, emotional trauma and systemic disease. In an effort to alleviate this suffering, tens of thousands of women volunteered to serve as nurses. Of these, some were experienced professionals, while others had undergone only minimal training. But regardless of their preparation, they would all gain a unique understanding of the conditions of industrial warfare. Until recently their contributions, both to the saving of lives and to our understanding

of warfare, have remained largely hidden from view. By combining biographical research with textual analysis, *Nurse Writers of the Great War* opens a window onto their insights into the nature of nursing and the impact of warfare.

Low growth, low investment, insufficient spend on infrastructure, weak bank lending to the corporate sector, and funding deficiencies of small and medium-sized enterprises are all causes of concern in Europe. To many, they point to fundamental problems in the financing of European companies and in Europe's financial systems. Are these concerns valid and do the structure and performance of the financial system lie at their heart? If so, what should be done to address them, and have the right policy prescriptions been identified to date? A product of the Restarting European Investment Finance research programme, *Finance and Investment: The European Case* brings together leading researchers to consider the causes of the persistently low level of investment in Europe. It examines the extent to which the financial system is a contributory factor and identifies possible remedies, considering the relation of finance to corporate sector investment, the lending behaviour of banks, the provision of equity financing, and the role of public sector institutions, regulation, and taxation. *Finance and Investment* provides one of the most comprehensive and thorough analyses of any financial system undertaken to date. It reflects a large body of research using new and existing data sets, employing advanced empirical tools, and exploiting the unique insights provided by the tumultuous events of financial and sovereign debt crises. Together, they comprise an exceptional body of knowledge to advance academic thinking and guide policy formulation.

Dante brings the legendary author—and the medieval Italy of his era—to vivid life, describing the political intrigue, battles, culture, and society that shaped his writing. Dante Alighieri's *Divine Comedy* has defined how people imagine and depict heaven and hell for over seven centuries. However, outside of Italy, his other works are not well known, and less still is generally known about the context he wrote them in. In *Dante*, Barbero brings the legendary author's Italy to life, describing the political intrigue, battles, city and society that shaped his life and work. The son of a shylock who dreams of belonging to the world of writers and nobles, we follow Dante into the dark corridors of politics where ideals are shattered by rampant corruption, and then into exile as he travels Italy and discovers the extraordinary color and variety of the countryside, the metropolises, and the knightly courts. This is a book by a serious scholar with real popular appeal, as evidenced by its bestseller ranking in Italy. It is a remarkable piece of forensic investigation into medieval Italian life.

Albert Einstein wasn't afraid to think for himself. And as a young man, he had little choice--after barely passing his final exams in college, he couldn't find a job in physics and had to take a job reviewing inventors' patent applications at an office in Bern, Switzerland. But in his free time he wrote papers with fantastical theories. That light is both a wave and a particle. That matter can become energy, and energy can become matter. That space can "bend" and time is relative. Other scientists ignored him at first, but in time would realize he was absolutely correct about nearly everything, and it turned the world of physics upside down. *Einstein and the Time Machine* is a fast-paced, entertaining biography of the greatest thinkers of the twentieth century. In addition to its lively story, it includes 190 illustrations, a glossary, and sidebars covering related topics, from time travel to the Nobel Prize to the origin of the universe--the Big Bang.

The animals of the forest have assembled to discuss what is the most important thing: to have a trunk like an elephant, quills like a porcupine, or a long neck like a giraffe? Naturally, every animal is convinced that its particular trait is the most important one and that everyone should have it. But when the double pages open to show all the animals with the quills of a porcupine, the long neck of a giraffe, or the trunk or the elephant, everyone must agree that the true importance lies precisely in their collective 'diversity'. It is that which makes them all unique and essential to life of the forest. The Most Important Thing received a UNESCO honorable mention for peace and collaboration. An important message of diversity and inclusion delivered in the form of a charming modern fable.
