Building Online Learning Communities

Bloomsbury Publishing
This volume represents the first attempt in the field of language pedagogy to apply a systems approach to issues in English language education. In the literature of language education, or more specifically, second or foreign language learning and teaching, each topic or issue has often been dealt with independently, and been treated as an isolated item. Taking

grammar instruction as an example, grammatical items are often taught in a sequential, step-by-step manner; there has been no “road map” in which the interrelations between the various items are demonstrated. This may be one factor that makes it more difficult for students to learn the language organically. The topics covered in this volume, including language acquisition, pedagogical grammar, and teacher collaboration, are viewed from a holistic perspective. In other words, language pedagogy is approached as a dynamic system of interrelations. In this way, “emergent properties” are expected to manifest. This book is recommended for anyone involved in language pedagogy, including researchers, teachers, and teacher trainers, as well as learners.

FORESTS for KIDS

Disha Publications
A Treatment Manual for Justice Involved Persons with Mental Illness comprises a comprehensive and structured treatment

manual that provides clinicians a guide for treating justice involved persons with mental illness. The manual includes a treatment plan for each session with specific structured exercises (for both in-group and out of group work) designed to teach objectives each session. The program incorporates a psychosocial rehabilitation model, social learning paradigm and cognitive-behavioral model for change, although cognitive behavioral theory is more prevalent and apparent throughout the manual. Additional training on Changing Lives and Changing Outcomes: A Treatment Program for Justice-Involved Persons with Mental Illness is available at <https://www.gifrinc.com/clco>.

What exactly is a forest? Why are forests important for us? What role do they play in giving us the water that we use to drink, cook and water our crops? What are the many products that forests give us? Who can use forests and who do they belong to? Should we worry about their future? The modules in this booklet will help you to answer these questions and many more. They will give you useful background information as you explore and learn about forests with the guidance of your teacher.

LEARNING GUIDE (age 8-13) Lulu.com

The Courseware package consist out of two publications, VeriSMTM – Foundation Courseware and VeriSM™ – Foundation

Study guide. This training material covers the syllabus for the VeriSM™ Foundation qualification. The training can be delivered over two days. This courseware is accredited to prepare the student for the VeriSM™ Foundation certification. VeriSM™ Foundation consists of two parts: VeriSM™ Essentials and VeriSM™ Plus, each covering one day of training. Students who already have an (IT) Service Management certificate can benefit from the knowledge they already have. They are the audience for a VeriSM™ Plus training only. When they pass the VeriSM™ Plus exam they receive the VeriSM™ Foundation certificate. Training Providers who want to offer a one day training on service management principles can decide to offer the VeriSM™ Essentials training only. Students who pass the VeriSM™ Essentials exam, receive the VeriSM™ Essentials certificate. If they pass the VeriSM™ Plus exam later, they will automatically receive the VeriSM™ Foundation certificate. The courseware covers the following topics:

- The Service Organization (Essentials)
- Service culture (Essentials)
- People and organizational structure (Essentials)
- The VeriSM™ model (both)
- Progressive practices (Plus)
- Innovative technologies (Plus)

VeriSM™ is a holistic, business-oriented approach to Service Management, which helps to make sense of the growing landscape of best practices and how to integrate them to offer value to the consumer. It is an evolution in Service Management thinking, and provides an up-to-date approach, including the latest practices and technological developments, to help organizations in transforming their business to the new reality of the digital age. VeriSM™ is Value-driven, Evolving, Responsive and Integrated Service Management. VeriSM™ is a registered

trademark of and owned by IFDC, the International Foundation of Digital Competences.

Today's critical care nurse needs a variety of skills and the ability to work with very different types of patients. The Basic Critical Care Training Program is designed for any nurse who wishes to obtain the solid foundation of skills and knowledge needed to safely and effectively care for the critically ill patient. Nurses who are just beginning their careers, nurses currently working with critically ill patients, and nurses who wish to change their clinical emphasis and begin working in critical care units are excellent candidates for this program. This program allows you to study when you want to and to practice valuable critical thinking skills prior to taking care of patients. This 75-contact-hour program is

accredited by the American Nurses Credentialing Center (ANCC) Commission on Accreditation and is designed to be coordinated with a well-designed preceptor/mentor training program in a critical care unit. The program is based on the textbook recommended! by the American Association of Critical Care Nurses: AACN Clinical Reference for Critical Care Nursing. That textbook is required for the course and must be purchased separately. The course consists of 28 modules, as follows: Cardiac (5 modules), Respiratory (6 modules), Neurological (5 modules), Gastrointestinal (3 modules), Hematology (2 modules), Endocrine (2 modules), Renal (2 modules), Special (3 modules). Each module consists of questions referring to material presented in the text. Upon completion of this course, you will be able to provide safe, entry-level critical care nursing practice as you begin working with a preceptor/mentor in a critical care unit. Completing the Basic Critical Care Training Program will distinguish you as a knowledgeable, skilled, and committed professional.

Recent Developments in Curriculum, Assessment and Practice Building Online Learning Communities Effective

Strategies for the Virtual Classroom

Faculty in higher education are disciplinary experts, but they seldom receive formal training in teaching. Higher Education by Design uses the principles of design thinking to bridge this gap through practical examples and step-by-step instructions based on educational theory and best practices in pedagogical and curricular development. This book offers practical advice for effective teaching and instruction, interdisciplinary curricular collaborations, writing course syllabi, creating course outcomes

and objectives, planning assessments, and building curricular content. Whether you are a seasoned professor or new instructor, the strategies in this book can improve your practice as an educator.

Cracking IAS Prelims Revision Files – Geography (Vol. 4/9) SAGE

Depression is experienced in epidemic proportions in many Western societies. There is concern over the number of young people who are suffering, sometimes to the extent of committing suicide. This book will help prevent stress and depression by taking a positive approach to the promotion of health and wellbeing in young people, giving them the skills to cope with the problems of everyday life. Erica Frydenberg introduces the theory behind a cognitive behavioural approach to coping skills and offers a program of modules that can be used with young people to train them in coping skills. The principle that underscores this program is that we can all do what we do better. If we do not like how we cope in certain contexts we can learn new strategies. It is possible to enhance one's coping if we have a framework within which to do so. The program is universally applicable and can be taught in any group setting, although instructors will be able to bring their own experience to adapt the sessions.

A Treatment Manual for Justice Involved Persons with Mental Illness A. B. Lawal

The world's fresh water supplies are dwindling rapidly—even wastewater is now considered an asset. By 2025, most of the world's population will be facing serious water stresses and shortages. Aquananotechnology: Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of

contaminated water for drinking and industrial use. It provides a comprehensive overview, from a global perspective, of the latest research and developments in the use of nanotechnology for water purification and desalination methods. The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species, UV treatment of pathogens, and regeneration of saturated media with applications in municipal water supplies, produced water from fracking, ballast water, and more. It also discusses membranes, desalination, sensing, engineered polymers, magnetic nanomaterials, electrospun nanofibers, photocatalysis, endocrine disruptors, and Al13 clusters. It explores physics-based phenomena such as subcritical water and cavitation-induced sonoluminescence, and fog harvesting. With contributions from experts in developed and developing countries, including those with severe contamination, such as China, India, and Pakistan, the book's content spans a wide range of the subject areas that fall under the aquanotechnology banner, either squarely or tangentially. The book strongly emphasizes sorption media, with broad application to a myriad of contaminants—both geogenic and anthropogenic—keeping in mind that it is not enough for water to be potable, it must also be palatable.

Modules for Basic Nursing Skills CRC Press

Research shows that internships are the dominant form of experiential learning used in business schools worldwide, providing practical insight into a job role for students and enhancing their employability. This book provides practical resources that practitioners and students can use to maximize the overall internship experience by explaining business

education, internships, skill development, and employment outcomes. It also includes material to assist in the development or enhancement of internship programs to create a high-quality internship course while providing guidance on reflecting and evaluating the learning gained from the experience. Including quizzes and short activities, this book can be used as a companion text for any student participating in an internship, or as a guide that practitioners in this field can use to help design their own internship program and course content. Business schools are increasing their focus on experiential learning and are encouraging faculty to incorporate internships into their existing curriculum. Linking theory, history, and practice, this book is ideal reading for students participating in an internship for academic credit and as a guidebook for business school practitioners who wish to start or improve their existing academic internship program.

Changing Lives and Changing Outcomes Springer

This is not just another Python programming book. It is an intensive and practical Python programming course. It is part 1 of a 3-part series which serves as my exhaustive collection of step-by-step tutorials on the latest version 3 of Python programming language. It is a self-paced course that is excellent for beginners and accomplished experts alike. If you want to have fun learning or revising your Python programming with ease, this is the right course for you. You will find this book indispensable if you are a computer programmer, an automation engineer or professional, a system administrator working in an IT firm, a data analyst/journalist, an educator, a computer science student or just anyone looking to acquire Python programming skills they need to succeed in their job or career. Yes, this course is exactly what you need to become a Pythoneer or Pythonista. This course has 6 modules spread out over 25 chapters of both rich text and visual tutorials. You're not in this alone. I'm going to help you through it. Watching people coding is very different from learning how to code. So you will not only be learning Python in this course, you will also be doing. As you complete the tutorials, you're going to get tested a lot on the materials we are covering by following Python best practices. Although this is a self-paced course, I strongly recommend that you complete it in not more than 6 weeks. For example, if you can complete one module every week, you can finish the course in 6 weeks. To fully

understand the basics of Python 3 programming, I strongly recommend you watch all the 53 in-depth HD videos which are available in the course resources folder that you can download. The link for download is in Chapter 25 of this book. These video tutorials simplify everything you need to understand, and help you speed up your learning. Important terms and definitions discussed in this book are printed in bold texts, like this. Practice quizzes and answers are included at the end of each chapter to help you test how much you have improved. Go to Chapter 25 right now. You will find the link to the course resources folder. Once you open this link, you will be able to download all the course videos, graded assessments and their solutions, projects and handy cheat sheets that give you all the information you need at a glance.

Higher Education by Design Routledge

This book constitutes the refereed proceedings of the 8th International Workshop on Learning Technology for Education Challenges, LTEC 2019, held in Zamora, Spain, in July 2019. The 41 revised full papers presented were carefully reviewed and selected from 83 submissions. The papers are organized in the following topical sections: learning technologies; learning tools and environment; e-learning and MOOCs; learning practices; social media learning tools; machine learning and evaluation support programs. LTEC 2019 examines how these technologies and pedagogical advances can be used to change the way teachers teach and students learn, while giving special emphasis to the pedagogically effective ways we can harness these new technologies in education.

Teacher's Guide for Understanding Taxes Disha Publications

Blended Learning combines the conventional face-to-face course delivery with an online component. The synergetic effect of the two modalities has proved to be of superior didactic value to each modality on its own. The highly improved interaction it offers to students, as well as direct accessibility to the lecturer, adds to the hitherto unparalleled learning outcomes. "Blended Learning in Engineering Education: Recent Developments in Curriculum, Assessment and Practice" highlights current trends in Engineering Education involving face-to-face and online curriculum delivery. This book will be especially useful to lecturers and postgraduate/undergraduate students as well as university administrators who would like to not only get an up-to-date overview of contemporary developments in this field, but also help enhance academic performance at all levels.
