This book is  
an important  
text of the

Kerala school  
of astronomy  
and  
mathematics,  
probably  
composed in  
the 16th  
century. In the  
Indian  
astronomical  
tradition, the  
karaṇa texts

are essentially  
computational  
manuals, and  
they often  
display a high  
level of  
ingenuity in  
coming up  
with simplified  
algorithms for  
computing  
planetary

longitudes and other related quantities. Karaṇapaddhati, however, is not a karaṇa text. Rather, it discusses the paddhati or the rationale for arriving at suitable algorithms that are needed while preparing a karaṇa text for a given epoch. Thus the work is addressed not to the almanac maker but to the manual maker. Karaṇapaddhati presents the theoretical basis for the vākya system, where the true

longitudes of the planet are calculated directly by making use of certain auxiliary notions such as the khaṇḍa, maṇḍala and dhruva along with tabulated values of changes in the true longitude over certain regular intervals which are expressed in the form of vākyas or mnemonic phrases. The text also discusses the method of vallyupasaṃhāra, which is essentially a technique of continued

fraction expansion for obtaining optimal approximation to the rates of motion of planets and their anomalies, involving ratios of smaller numbers. It also presents a new fast convergent series for  $\pi$  which is not mentioned in the earlier works of the Kerala school. As this is a unique text presenting the rationale behind the vākya system and the computational procedures

used in the karaṇa texts, it would serve as a useful companion for all those interested in the history of astronomy. The authors have provided a translation of the text followed by detailed notes which explain all the computational procedures, along with their rationale, by means of diagrams and equations.

Pearson Education India  
As stories of Indian dance's renaissance

span almost a full century, there has emerged a globally dispersed community of Indian dancers, scholars and audiences who are deeply committed to keeping these traditions alive and experimenting with traditional dance languages to grapple with contemporary themes and issues.

Scripting Dance in Contemporary India is an edited volume that

contributes to this field of Indian dance studies. The book engages with multiple dance forms of India and their representations. The contributions are eclectic, including writings by both scholars and performers who share their experiential knowledge. There are four sections in the book – section I titled, “Representations” has three chapters that deal with textual representation

s and illustrations of dance and dancers, and the significance of those representation s in the present. Section II titled, "Histories in Process" consists of two chapters that engage with the historiographi es of dance forms and suggest that histories are narratives that are continually created. In the third section, "Negotiations" , the four chapters address the

different ways in which dance is embedded in society, and the different ways in which the aesthetics of a form has to negotiate with social, economic and political imperatives. The final section, "Other Voices/ Other Bodies" brings voices which are outside the mainstream of dance as 'serious' art. **Vajrasūci of Āsvaghoṣa and Concept of Varṇa-jāti Thought the Ages** books catalog Karnatic music

This book focuses on sitar technique and shows how that technique comes into play during the improvisatory music-making

<p>endeavours of master sitarists. A series of systematic descriptions and analyses reveals how instrumental technique acts as a generative structure at the broad level and provides a corpus of factors of variation at the specific level. A unique feature of this study is the inclusion of musical transcriptions detailing not only the line of melody, but also the physical gestures</p>	<p>(techniques) necessary to produce melody. Though technically complex in appearance, these transcriptions and the accompanying analyses provide valuable information to students interested in learning Sitar and to musicologists and ethnomusicologists inquiring into the basic improvisational processes that underlie contemporary styles of Sitar performance. <i>Pitman</i></p>	<p><i>Shorthand Instructor And Key Gateway</i> Gifted Resoures Records publications acquired from Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, by the U.S. Library of Congress Offices in New Delhi, India, and Karachi, Pakistan. <i>The Journal of the Music Academy, Madras</i> Motilal Banarsidass Who were the untouchables in India? depth of research and understanding Dikshitar had on the Sri Vidhya Maha Shodasakshari mantra learnt from Sri. Chidambara Swamiji. So far, there is no clear notation for such difficult songs and a student finds it difficult to learn the song in a proper way. This book brings out the notation to the benefit of music lovers and students. It provides a brief explanation of each sentence of the song for understanding the same. Muthuswami Dikshitar's life incidents in paintings, which are the first of its kind, have been presented in this book. The book has been published in three languages: English, Tamil and Telugu for wide circulation. Karanapaddhati of Putumana Somayāji Oxford University Press One of the foremost Karnatik vocalists today, T.M. Krishna writes lucidly and passionately about the form, its history, its problems and where it stands today T.M. Krishna begins his sweeping exploration of the tradition of Karnatik music with a fundamental question: what is music? Taking nothing for granted and addressing readers from across the spectrum - musicians, musicologists as well as laypeople - Krishna provides a

path-breaking overview of south Indian classical music.

Exhaustive study of Vajrasūcī, Buddhist text by Asvaghosa; includes complete Sanskrit text with English

In one way this work recalls the tradition of Coomaraswamy but seeks to join it to the mainstream of critical history. It argues that the living continuity of Indian Culture is rooted in a unique spiritual vision and social experience.

Indian Culture is neither the result of merely accidental happenings through the centuries, nor a mere palimpsest of migrations and invasions. It is, in its essence, a development of foundational ideas constituting a creative matrix. Behind its changing historical forms lies a deep and persistent source of creativity which is spiritual in character. The Present

volume I deals with the spiritual vision and symbolic forms. Here is has been upheld that the spiritual vision of India had two original aspects, the integral or synoptic vision of the Vedas, and the Sramanic vision of Transcendence. Purnata and Sunyata constituted the two poles round which Indian spirituality revolved. The author not only elucidates this bipolar matrix of Indian

spirituality revolved. The author not only elucidates this bipolar matrix of Indian spiritual praxis or sadhana, but also traces its intricate ancient history. He goes on to trace the great symbolic forms- language, myth, science, literature and art-in which this basic vision expressed itself. In all these areas he brings out the basic general principles expressive of inner consciousness

rather than mere selection of well-known  
present a details.
