Dancing with Butterflies uses the alternating voices of four very different women whose lives interconnect through a common passion for their Mexican heritage and a dance company called Alegría. Yesenia, who founded Alegría with her husband, Eduardo, sabotages her own efforts to remain a vital, vibrant woman when she travels back and forth across the Mexican border for cheap plastic surgery. Elena, grief stricken by the death of her only child and the end of her marriage, finds herself falling dangerously in love with one of her underage students. Elena's sister, Adriana, wears the wounds of abandonment by a dys-functional family and becomes unable to discern love from abuse. Soledad, the sweet-tempered illegal immigrant who designs costumes for Alegría, finds herself stuck back in Mexico, where she returns to see her dying grandmother. Reyna Grande has brought these fictional characters so convincingly to life that readers will imagine they know them.

This exciting and groundbreaking fiction anthology showcases a number of new and emerging 2SQ (Two-Spirit and queer Indigenous) writers from across Turtle Island. These visionary authors show how queer Indigenous communities can bloom and thrive through utopian narratives that detail the

vivacity and strength of 2SQness throughout its plight in the maw of settler colonialism's histories. Here, readers will discover bio-engineered AI rats, transplanted trees in space, the rise of a 2SQ resistance camp, a primer on how to survive Indigiqueerly, virtual reality applications, motherships at sea, and the very bending of space-time continuums queered through NDN time. Contributors include Darcie Little Badger, Mari Kurisato, Kai Minosh Pyle, David Alexander Robertson, and jaye simpson.

In this revolutionary book, a renowned computer scientist explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world. Computers have completely changed the way we teach children. We have *Mindstorms* to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like de-bugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and between students and teachers. Technology changes every day, but the basic ways that computers can help us learn remain. For thousands of teachers and parents who have sought creative ways to help children learn with computers, *Mindstorms* is their bible.

Indigenous Wisdom, Scientific Knowledge and the Teachings of Plants Simon and Schuster By combining provocative prose with photo-essay, *Time and the Suburbs* explores the disappearance of cities in North America under the weight of suburban, exurban, and other forms of development that are changing the way we live and do politics. Drawing on social theory from Henri Lefebvre and Guy Debord to Antonio Negri, this book reconceptualizes the tasks facing activists and social movements. This is both a provocative essay and introduction to important social theory for anyone interested in cities and urban development.

A true classic with a timeless message! All the other bulls run, jump, and butt their heads together in fights. Ferdinand, on the other hand, would rather sit and smell the flowers. So what will happen when Ferdinand is picked for the bullfights in Madrid? The Story of Ferdinand has inspired, enchanted, and provoked readers ever since it was first published in 1936 for its message of nonviolence and pacifism. In WWII times, Adolf Hitler ordered the book burned in Nazi Germany, while Joseph Stalin, the leader of the Soviet Union, granted it privileged status as the only non-communist children's book allowed in Poland. The preeminent leader of Indian nationalism and civil rights, Mahatma Gandhi—whose nonviolent and pacifistic practices went on to inspire Civil Rights leader Martin Luther King, Jr.—even called it his favorite book. The story was adapted by Walt Disney into a short animated film entitled Ferdinand the Bull in 1938. Ferdinand the Bull won the 1938 Academy Award for Best Short Subject (Cartoons).

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

1968 looks like it'll be a pretty good year for Jaynell Lambert. The town's going to pave the dirt road she lives on, her girly-girl sister, Racine, isn't driving her completely crazy, and Grandpap has just moved in with his new emerald green Cadillac convertible. Jaynell and Grandpap have something special. But why won't Grandpap tell her the reason he visits with the dirt-poor Pickens family on the other side of town? When Jaynell finds out Grandpap's secret, the legacy of an old man transforms a family, and a town. "At once gritty and poetic, stark and sentimental . . . a solid page turner. Holt once again displays her remarkable gift." (School Library Journal, starred review)

Across North America, Indigenous acts of resistance have in recent years opposed the removal of federal protections for forests and waterways in Indigenous lands, halted the expansion of tar sands extraction and the pipeline construction at Standing Rock, and demanded justice for murdered and missing Indigenous women. In *As We Have Always Done*, Leanne Betasamosake Simpson locates Indigenous political resurgence as a practice rooted in uniquely Indigenous theorizing, writing, organizing, and thinking. Indigenous resistance is a radical rejection of contemporary colonialism focused around the refusal of the dispossession of both Indigenous bodies and land. Simpson makes clear that its goal can no longer be cultural resurgence as a mechanism for inclusion in a multicultural mosaic. Instead, she calls for unapologetic, place-based Indigenous alternatives to the destructive logics of the settler colonial state, including heteropatriarchy, white supremacy, and capitalist exploitation.

Aboriginal rights do not belong to the broader category of universal human rights because they are grounded in the particular practices of aboriginal people. So argues Peter Kulchyski in this provocative book from the front lines of indigenous people's struggles to defend their culture from the ongoing conquest of their traditional lands. Kulchyski shows that some differences are more different than others, and he draws a border between bush culture and mall culture, between indigenous people's mode of production and the totalizing push of state-led capitalism. *Aboriginal Rights Are Not Human Rights* provides much needed conceptual and historical analysis of aboriginal and treaty rights in Canada, and offers concrete suggestions to transform the current policy paradigm into one that supports and invigorates indigenous cultures in a contemporary context.

This remarkable collection of essays by leading Indigenous scholars focuses on the themes of freedom, liberation and Indigenous resurgence as they relate to the land. They analyze treaties, political culture, governance, environmental issues, economy, and radical social movements from an anti-colonial Indigenous perspective in a Canadian context. Editor Leanne Simpson (Nishnaabekwe) has solicited Indigenous writers that place Indigenous freedom as their highest political goal, while turning to the knowledge, traditions, and culture of specific Indigenous nations to achieve that goal. The authors offer frank and political analysis and commentary of the kind not normally found in mainstream books, journals, and magazines.
