Embezzlement, graft, fraud and money laundering are among the hardest crimes to prosecute. Investigation is impossible without an understanding of the law, accounting, finance, and banking procedures. Law enforcement must have the proper weapons to combat the evolving sophistication of financial crimes. Financial Investigation and Forensic Accounting offers a thorough examination of current methods and legal concerns for the detection and prosecution of economic crime. The author is an I.R.S. agent with 15 years experience in fraud investigation. The book guides law enforcement and prosecutors from detection through indictment and conviction. The author explains the mechanics of gambling, fraud and money laundering. He illustrates how prosecutors present the tax codes, off-

shore banking laws, and the Racketeer-Influenced and Corrupt Organization (RICO) statutes to judges and juries.

Financial Investigation and Forensic Accounting details the exacting legal standards for the successful execution of warrants, seizures and forfeitures.

Manning's work is a guidebook for error-free prosecution. His multidisciplinary concept, integrating accounting, law enforcement, and financial savvy, is an invaluable approach to the detection and prosecution of economic crime.

This volume examines some of the major factors—social, demographic, and environmental—that account for the

success of communal irrigation in Ilocos Norte and, by implication, its absence in adjacent areas, other parts of the Philippines, and, more widely, in other parts of insular Southeast Asia. However, whether this explanation accounts for all the factors involved, or even adequately weighs those that are here discussed, is secondary to the main concern of this volume: corporate groups. What zanjeras [irrigation societies] show are repeated examples of how individual farmers, working in concert, developed and employed corporate principles to the solution of a common goal or problem. It is a kind of "solution" that has been widely and effectively employed in much of human history.
