This illustrated book that includes tables, charts, and maps primarily discusses the role of USAREUR (US Army Europe) in rearming and training the new German Army which was perhaps the Army's single greatest contribution toward maintaining security in Western Europe. Likewise, the relationship between American soldiers and their French and West German hosts evolved over time and is a critical element in telling the story of the US Army in Europe.

This book examines the use of military force as a coercive tool by the United States, using lessons drawn from the post-Cold War era (1991–2018). The volume reveals that despite its status as sole superpower during the post-Cold War period, US efforts to coerce other states failed as often as they succeeded. In the coming decades, the United States will face states that are more capable and creative, willing to challenge its interests and able to take advantage of missteps and vulnerabilities. By using lessons derived from in-depth case studies and statistical analysis of an

original dataset of more than 100 coercive incidents in the post-Cold War era, this book generates insight into how the US military can be used to achieve policy goals. Specifically, it provides guidance about the ways in which, and the conditions under which, the US armed forces can work in concert with economic and diplomatic elements of US power to create effective coercive strategies. This book will be of interest to students of US national security, US foreign policy, strategic studies and International Relations in general.

"During the American Civil War, Secretary of State William Seward predicted that Russia and the United States would confront one another on the plains of Eastern Asia--and they did in the 1890s. The rivalry of these two great nation-states heightened when the Russian Revolution added a different ideological dimension to the struggle. The Cold War is the result of that past--and the dilemmas of Soviet and American foreign policies today have a half-century of history behind them. America, Russia, and the Cold War, 1945-1966 examines the foreign policies of both countries in this historical setting. Professor LeFeber concentrates on two key periods in the Cold War--the first is the period from 1944-1946 when the situation intensified and the second is the mid-50s when it assumed a new shape. In the events of 1945 and 1946, he finds the background for Stalin's later moves in Germany and Korea as well as for the American policies which resulted in the Truman Doctrine, the Marshall Plan, and NATO. In the mid-50s, both American and Russian foreign policies began to pivot away from their focus on Europe and became concerned with the newly-emerging nations. Professor LaFeber analyzes not only the policies of both the United States and Russia but also domestic sources for these policies. For the United States, he has used extensively the newly-opened papers of John Foster Dulles as well as the papers of Harry S. Truman, Bernard Baruch, William Clayton and others who were actively involved in U.S. policy decisions."--Dust jacket.

In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and, beyond, a trial even greater. Driven to the limits of endurance, Zamperini

The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing repercussions around the world. In *The Cold War*, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers an engaging new history of how today's world was created.

One of the most significant industrial states in the country, with a powerful radical tradition, Pennsylvania was, by the early 1950s, the scene of some of the fiercest anti-Communist activism in the United States. Philip Jenkins examines the political and social impact of the Cold War across the state, tracing the Red Scare's reverberations in party politics, the labor movement, ethnic organizations, schools and universities, and religious organizations. Among Jenkins's most provocative findings is the revelation that, although their absolute numbers were not large, Communists were very well positioned in crucial Pennsylvania regions and constituencies, particularly in labor unions, the educational system, and major ethnic organizations. Instead of focusing on Pennsylvania's right-wing politicians (the sort represented nationally by Senator Joseph McCarthy), Jenkins emphasizes the anti-Communist activities of liberal politicians, labor leaders, and ethnic community figures who were terrified of Communist encroachments on their respective power bases. He also stresses the deep roots of the state's militant anti-Communism, which can be traced back at least into the 1930s.

is understudied, both inside and outside of government. Tactical weapons, although less awesome than their strategic siblings, carry significant security and political risks, and they have not received the attention that is commensurate to their importance. Second, it is clear that whatever the future of these arms, the status quo is unacceptable. It is past the time for NATO to make more resolute decisions, find a coherent strategy, and formulate more definite plans about its nuclear status. Consequently, decisions about the role of nuclear weapons within the Alliance and the associated supporting analysis are fundamental to the future identity of NATO. At the Lisbon Summit in Portugal in November 2010, the Alliance agreed to conduct the Deterrence

and Defense Posture Review (DDPR). This effort is designed to answer these difficult questions prior to the upcoming NATO Summit in May 2012.

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass* *The American Yawp* is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. *The Yawp* highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, *The American Yawp* incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. *The American Yawp* traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Since the end of the Cold War, there have been many competing ideas about how to explain contemporary conflicts, and about how the West should respond to them. This study, newly available in paperback, examines how the media interpret conflicts and international interventions, testing the sometimes contradictory claims that have been made about recent coverage of war. *Framing Post-Cold War Conflicts* takes a comparative approach, examining UK press coverage across six different crises. Through detailed analysis of news content, it seeks to identify the dominant themes in explaining the post-Cold War international order, and to discover how far the patterns established prior to September 11, 2001 have subsequently changed. Based on extensive original research, the book includes case studies of two "humanitarian military interventions" (in Somalia and Kosovo), two instances where Western governments were condemned for not intervening enough (Bosnia and Rwanda), and the post-9/11 interventions in Afghanistan and Iraq.

This collection of essays inverts the way we see the Cold War by looking at the conflict from the perspective of the so-called developing world, rather than of the superpowers, through the birth and first decades of India's life as a postcolonial nation. Contributors draw on a wide array of new material, from recently opened archival sources to literature and film, and meld approaches from diplomatic history to development studies to explain the choices India made and to frame decisions by its policy makers. Together, the essays demonstrate how India became a powerful symbol of decolonization and an advocate of non-alignment, disarmament, and global governance as it stood between the United States and the Soviet Union, actively fostering dialogue and attempting to forge friendships without entering into formal alliances. Sweeping in its scope yet nuanced in its analysis, this is the authoritative account of India and the Cold War. Contributors: Priya Chacko, Anton Harder, Syed Akbar Hyder, Raminder Kaur, Rohan Mukherjee, Swapna Kona Nayudu,

Pallavi Raghavan, Srinath Raghavan, Rahul Sagar, and Waheguru Pal Singh Sidhu.

"Margaret MacMillan has produced another seminal work. . . . She is right that we must, more than ever, think about war. And she has shown us how in this brilliant, elegantly written book."—H.R. McMaster, author of *Dereliction of Duty* and *Battlefields: The Fight to Defend the Free World* The instinct to fight may be innate in human nature, but war—organized violence—comes with organized society. War has shaped humanity's history, its social and political institutions, its values and ideas. Our very language, our public spaces, our private memories, and some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out both the vilest and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has influenced human society and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. *War: How Conflict Shaped Us* explores such much-debated and controversial questions as: When did war first start? Does human nature doom us to fight one another? Why has war been described as the most organized of all human activities? Why are warriors almost always men? Is war ever within our control? Drawing on lessons from wars throughout the past, from classical history to the present day, MacMillan reveals the many faces of war—the way it has determined our past, our future, our views of the world, and our very conception of ourselves.

Acclaimed New York Times journalist and author Chris Hedges offers a critical -- and fascinating -- lesson in the dangerous realities of our age: a stark look at the effects of war on combatants. Utterly lacking in rhetoric or dogma, this manual relies instead on bare fact, frank description, and a spare question-and-answer format. Hedges allows U.S. military documentation of the brutalizing physical and psychological consequences of combat to speak for itself. Hedges poses dozens of questions that young soldiers might ask about combat, and then answers them by quoting from medical and psychological studies. • What are my chances of being wounded or killed if we go to war? • What does it feel like to get shot? • What do artillery shells do to you? • What is the most painful way to get wounded? • Will I be afraid? • What could happen to me in a nuclear attack? • What does it feel like to kill someone? • Can I withstand torture? • What are the long-term consequences of combat stress? • What will happen to my body after I die? This profound and devastating portrayal of the horrors to which we subject our armed forces stands as a ringing indictment of the glorification of war and the concealment of its barbarity.
