Stringent Regulation and its External Implications OECD Publishing
The Federal Trade Commission (FTC or Commission) vigorously promotes competition in the health care industry through enforcement, study, and advocacy. Competition in health care markets benefits consumers by helping to

control costs and prices, improve quality of care, promote innovative products, services, and service delivery models, and expand access to health care services and goods. While state legislators and policymakers addressing health care issues are rightly concerned with patient health and safety, an important goal of competition law and policy is to foster quality competition, which also furthers health and safety objectives. Likewise, to ignore competitive concerns in health policy can impede quality competition,

raise prices, or diminish access to health care - all of which carry their own health and safety risks. This book builds on FTC staff competition advocacy comments that focus on proposed state-level changes to statutes and rules governing the "scope of practice" of Advanced Practice Registered Nurses (APRNs). Scope of practice rules determine the range of health care procedures and services that various health care professionals are licensed to provide under state law.

Trade Policy Perspectives Nova Science

After years of near 'disrepute' in official circles, Industrial Policy has made something of a comeback over the last few years and is now very much back on the agenda at national and EU levels, driven by concerns over globalisation, deindustrialisation, unemployment and perceived poor growth in the EU. Simultaneously, the European Commission's Fourth Report on Economic and Social Cohesion has kicked off the debate over challenges to cohesion, the shape of EU Cohesion policy beyond 2013, and how resources should be managed. This debate will find added momentum with the imminent 'mid-term' review being launched by the Commission. Discussions over the success or not of the Lisbon Agenda, on-going debates over cluster policies, and recent developments in policy evaluation have also contributed to a burgeoning academic literature over the last eighteen months. This edited volume is especially pertinent given such developments and pulls together a diverse range of contributions from leading authorities in the field to add to these debates and to illustrate connections

between them. This book was published as a special issue of Policy Studies.

Oversight of the Antitrust Enforcement Agencies National Academies Press

This publication includes eight papers which address the following issues: the beginning of Canadian competition policy, 1888-1900; the administration and enforcement of competition policy in Canada, 1889 to 1952; Canadian competition law reform, 1919 and 1935; the history of price maintenance legislation in Canada; the evolution of legislation, adjudication and administration; the case of the Competition Act; a comparison of Canada's competitive environment in 1889 and 1989; and 1889-1989 and into the twenty-first century.

The Future of Nursing Kluwer Law International B.V.

The fast-evolving relationship between the promotion of welfare-enhancing competition and the balanced protection of intellectual property (IP) rights has attracted the attention of policymakers, analysts and scholars. This interest is inevitable in an environment that lays ever greater emphasis on the management of

knowledge and innovation and on mechanisms to ensure that the public derives the expected social and economic benefits from this innovation and the spread of knowledge. This book looks at the positive linkage between IP and competition in jurisdictions around the world, surveying developments and policy issues from an international and comparative perspective. It includes analysis of key doctrinal and policy issues by leading academics and practitioners from around the globe and a cutting-edge survey of related developments across both developed and developing economies. It also situates current policy developments at the national level in the context of multilateral developments, at WIPO, WTO and elsewhere.

Health Policy and Politics: A Nurse's Guide, Sixth Edition encompasses the entire health policy process from agenda setting through policy and program evaluation.

The Spectrum of Tests Springer Publishing Company

Increasingly, we conduct our lives online, and in doing so, we grant access to our personal information. The crucial feedstock of the world economy thus generated - the commercialization and exploitation of personal data and the intrusion of digital privacy it entails - has built an imposing edifice of market power. As we enter the third decade of the 21st century, this detailed exploration of the interlinkage between competition and data privacy takes a critical look at competition policy to evaluate whether the system in its current form and with the existing approach is capable of tackling the challenges raised by the role of personal data in the shift from an offline to an online economy. Challenging the commonplace assumption that privacy has little or no role and relevance in competition law, the author's penetrating analysis accomplishes the following and more: provides an in-depth understanding

of the intersection of competition and privacy in the data-driven economy; surveys legal policy developments on the role of privacy in competition law; underlines the importance of non-price parameters in competition, such as consumer choice; clearly explains why and how competition law can protect privacy among its policy objectives; and addresses challenges in measuring the intangible harm of digital privacy violation in assessing abuse of market power. Recent case law in Europe and elsewhere, a revealing comparison between relevant European Union (EU) and United States (US) practice, the expanded role of the EU's Competition Commissioner, and the likely impact of such phenomena as the coronavirus pandemic are all drawn into the book's remit. In her analysis of the growing privacy dimension in competition policy, the author examines the topic from a broad perspective that includes societal, political, economic, historical and cultural elements. Her insightful multidimensional and value-based review will prove of immeasurable value to practitioners, academics, policymakers and enforcers in its identification of implications for

business practice as we go forward.
New Policy Perspectives Edward Elgar Publishing

One of the fundamental challenges currently facing the EU is that of reconciling its economic and environmental policies. Nevertheless, the role of environmental protection in EU competition law and policy has often been overlooked. Recent years have witnessed a shift in environmental regulation from reliance on command and control to an increased use of market-based environmental policy instruments such as environmental taxes, green subsidies, emissions trading and the encouragement of voluntary corporate green initiatives. By bringing the market into environmental policy, such instruments raise a host of issues that competition law must address. This interdisciplinary treatment of the interaction between these key EU policy areas challenges the view that EU competition policy is a special case, insulated from environmental concerns by the overriding efficiency imperative, and puts forward practical proposals for achieving genuine integration.

A Review of Good Practices OECD

Publishing

This book explores the nature of the music industries before and after the digital revolution from the point of view of the consumer, and explores the question of whether there is a role for competition policy intervention in the music industries. Considering the historically consolidated environment of the music industries, and their rapidly evolving business models in the 21st century, the author argues that there is a need for updated competition design to promote consumer welfare and competition in these markets. Opening a much-needed interdisciplinary dialogue across music studies, business, and law, the book applies business model literature to antitrust law in the context of the music industries. It offers a comprehensive history of encounters between the music industry and antitrust and regulatory authorities in the US, UK, and EU, from the payola scandals of the 1950s to the merger of Live Nation and Ticketmaster in 2010, showing how even as business models in the industry have changed, it has repeatedly moved toward consolidation with little regulation. Drawing on this history, it considers how

competition policy can foster innovation and safeguard consumer interests in the music markets of the future. Offering new analytical and methodological tools, this book is relevant to those studying the music industries from business, legal, and cultural perspectives.

Identifying Exclusionary Abuses by Dominant Undertakings under EU Competition Law Cambridge University Press

The book examines whether EU competition policy is applied fairly and consistently to EU and non-EU firms despite persistent political pressure from member states for a relaxation of the rules and deals with the dilemma of regional organisations in the global political economy. Focussing on the EU's desire to achieve balance between the promotion of market competition and the enhancement of international competitiveness, the book explores the validity of its attempts successfully to ensure a 'stringent competition policy' which is nationality-blind and comparatively strict. Finally, it shows that the competition-competitiveness dilemma remains unresolved because the EU's capability to

set global regulatory standards is constrained by competition and the need to engage in multilateral forums, such as the WTO and the International Competition Network. This book will be of key interest to scholars and students of European Union studies, EU competition law and policy, EU external action and more broadly to global governance, international political economy and international relations.

Towards a Privacy Dimension in Competition Policy? OECD Publishing
In the World Library of Educationalists series, international experts themselves compile career-long collections of what they judge to be their finest pieces – extracts from books, key articles, salient research findings, major theoretical and practical contributions – so the world can read them in a single manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. In a collection of her most influential work spanning nearly four decades, Patricia Broadfoot applies her trademark sociological and comparative perspective to empirical studies at every level of the

educational system. From her classic long-term study of the impact of changing national assessment policies on pupils and teachers in the classrooms of England and France to her sustained championship of the need for a better understanding of the impact of assessment on learning, Broadfoot has consistently championed the need for a more developed sociological understanding of assessment. Broadfoot's accessible writing offers insights that are as novel as they are important for the education of future generations. This book allows readers to follow themes and strands across Patricia Broadfoot's career and will be of interest to all followers of her work and any reader interested in the development of teaching, learning and assessment.

OECD Investment Policy Perspectives 2008 Elsevier Health Sciences

The book provides an analysis of the dynamics of the global launch service market associated with small satellites, by placing a particular focus on its unfolding trends and future outlook. From an economic perspective, the emergence of numerous micro launcher initiatives on top of already existing launch solutions for small satellites raises questions about the specific nature and size of the small satellite market that will - or could - be addressed by these emerging launch services offerings. Identifying the specific features of such market by characterizing customers' expectations and providing a competitive analysis of the different launch solutions for small satellites is the second objective of this report. Finally, and from a policy perspective, the book

reflects on whether such market could and should be handled on a purely private basis in the European context, or on the contrary generates relevant stakes that compels European institutional actors to become more actively involved in this domain.

Issues in Telecommunications Regulation and Competition Kluwer Law International B.V.

This Investment Policy Review examines Nigeria's investment policies in light of the OECD Policy Framework for Investment (PFI), a tool to mobilise investment in support of economic growth and sustainable development.

Policy Framework for Investment A Review of Good Practices Routledge

Under Article 102 TFEU, dominant firms are allowed to compete, but only to the extent their market behaviour does not constitute an abuse. Needless to say, the wording of the article neither explains what an abusive restriction of competition is nor how such a practice can be identified. Rather than developing a one-size-fits-all test applicable to all forms of market behaviour by dominant firms, the European Court of Justice (ECJ) and the

General Court (ex; Court of First Instance) have set out a system of tests for separate categories of conduct. Drawing on the full range of the EU Courts' relevant case law, this very useful book analyses the conditions that must be fulfilled for a broad range of business practices to be deemed abusive within the meaning of Article 102 TFEU, and also identifies the criteria that must be fulfilled for a practice to be 'objectively justified'. The potentially abusive practices studied here (as defined in the relevant case law) include the following: predatory pricing; margin squeezing; exclusivity agreements; loyalty rebates; refusals to supply to induce exclusivity; secondary line price discrimination; vexatious litigation; acquisitions of intellectual property rights (IPRs); refusals to supply necessary inputs; provision of storage equipment on the condition of exclusive use; selective above-cost price cuts; tying; technological integration; and refusal to license IPRs. The author also contrasts the Commission's decisional practice with the case law, assesses approaches under U.S. antitrust law to similar forms of conduct, and incorporates insights from economic

theory. This study greatly enhances our understanding of the distinction between abusive conduct and lawful competition. In the course of its clarification of the EU Courts' responses to individual forms of market behaviour, an overall approach to the identification of exclusionary abuses under Article 102 TFEU begins to come into view. Apart from the important new synthesis the work offers legal scholars, there can be little doubt this book will prove a valuable asset and even an inspiration to competition lawyers.

Early Policy Perspectives from the States IRPP

Tourism development is not merely about boosting tourist figures and bringing in more tourist dollars. Undoubtedly, it has to do with developing tourism resources, infrastructure, products, and attractions, but it is also about a society, polity, and economy meeting the challenges of globalization, the new millennium, and nation-building. This book deals with those issues from different perspectives and through the case of Singapore, a city-state highly integrated into the global economy. It addresses specific areas like tourism manpower, theme parks, and beaches, as

well as the broader issues of economic strategy, political economy, and culture. Collectively, the articles in this book provide readers with a sense of where Singapore has gone and where it is in terms of tourism management and policy. Contents: Tourism Plans: Tourism in Singapore: An Overview of Policies and Issues (B S A Yeoh et al.) Singapore's New Economic Initiatives and Implications for Tourism (L Low) Tourism 21 and Singapore's Tourism Satellite Accounts (C Khoo) Regionalisation as a Strategy for Singapore's Tourism Development (E Tham) Gateways, Hubs and Destinations: Transportation Hierarchies in Southeast Asia (N Sriram et al.) Tourism Resources and Infrastructure: Developments in the Air Transport Industry: Implications for Singapore Tourism (A T H Chin) Modelling Competency: An Example from the Singapore Tourism Industry (C L Chong et al.) Students, researchers, and practitioners of the industry in Singapore will definitely find this valuable. Those

from further afield may also find the collection informative and enlightening ... a variety of insights may be gleaned that may prove to be of value to audiences in other countries."Pacific Tourism Review
VA Nurses Tell Their Story Springer
 The stories told in this book reflect the hard work and dedication of the Veterans Affairs nurses who provide care to our nation's heroes. Four key messages outlined in the book help explain the important role of VA nurses. Key Message 1: Nurses should practice to the full extent of their education and training; Key Message 2: Nurses should achieve higher levels of education and training through an improved education system that promotes seamless academic progression; Key Message 3: Nurses should be full partners, with physicians and other health care professionals, in redesigning health care in the United States; Key Message 4: Effective workforce planning and policy making require better data collection and an improved information structure. This book addresses the staffing issues in military healthcare with policy and workforce planning towards an improved information structure between the nurses,

healthcare professionals, and physicians. Keywords: Department of Veterans Affairs nursing program; Veteran Affairs (VA) nursing; nurses; Veterans Affairs nursing education program; VA nursing education program; U.S. Department of Veterans Affairs; u.s. department of veterans affairs; va; VA; staffing issues in military healthcare.

Realizing the Future of Nursing: VA Nurses Tell Their Story West Group

In the run-up to the November 1999 WTO Ministerial in Seattle, this conference proceedings explored the various options towards better coherence between trade and competition policies.

Tourism Management and Policy OECD Publishing

This timely and much-needed Handbook reconsiders an old topic from a fresh perspective, raising a number of new, interesting and worthwhile issues in the wake of ten years of globalization. This comprehensive analysis illustrates that old-style industrial policies whereby the government directly intervened in markets, and was often the producer itself, are no longer relevant. Structural changes occurring in economies summarized in the

term globalization are triggering the definition and implementation of new industrial policies. The contributors, leading experts in their field, unite to evaluate this shift of over a decade ago. Employing various empirical and methodological approaches with a strong theoretical underpinning, this world-wide study of the state-of-the-art of industrial policy issues is an invaluable reference tool. It has been enthusiastically received by a wide-ranging audience including scholars, researchers and policy makers with an interest in industrial economics and policy, business studies and policies for growth, competitiveness and development.

Competition Policy and Intellectual Property in Today's Global Economy World Scientific

Nurses make up the largest segment of the health care profession, with 3 million registered nurses in the United States. Nurses work in a wide variety of settings, including hospitals, public health centers, schools, and homes, and provide a continuum of services, including direct patient care, health promotion, patient education, and coordination of care. They serve in leadership roles, are researchers, and work to improve health care policy. As the health care system undergoes transformation due in part to the Affordable Care Act (ACA), the nursing profession is making a wide-reaching

impact by providing and affecting quality, patient-centered, accessible, and affordable care. In 2010, the Institute of Medicine (IOM) released the report *The Future of Nursing: Leading Change, Advancing Health*, which made a series of recommendations pertaining to roles for nurses in the new health care landscape. This current report assesses progress made by the Robert Wood Johnson Foundation/AARP Future of Nursing: Campaign for Action and others in implementing the recommendations from the 2010 report and identifies areas that should be emphasized over the next 5 years to make further progress toward these goals.
