This book is a design handbook and provides skills to successfully design, implement, and optimize business processes on top of SOA. Starting with business process modeling, it shows design principles to architect sound process architectures. It presents best practices for modeling business processes using BPMN, together with design principles for services and composite applications. It provides detailed coverage of how to prepare business processes for execution. An in-depth explanation of human interactions is given and also principles and best practices for using rules. Moving on, Adaptive Case Management principles are explained, along with the reach of business processes to mobile devices and ensuring multichannel interactions. Business activity monitoring, event-driven architectures, complex event processing in relation to business processes, and enabling integration with events and IoT devices are explained. The design principles and best practices are demonstrated in a practical way on a rental car use case.

Computerworld "O'Reilly Media, Inc." InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

Becoming a Salesforce Certified Technical Architect Graphic

Communications Group
Design and build high-performance, secure, and scalable Salesforce solutions to meet business demands and gain practical experience using real-world scenarios by creating engaging end-to-end solution presentations Key Features
Learn common integration, data migration, and security patterns for

designing scalable and reliable solutions on the Salesforce Lightning platform
Build an end-to-end delivery framework pipeline for delivering successful projects within specified timelines Gain access to an exclusive book club of skilled Salesforce professionals, to discuss ideas, best practices, and share experiences of designing modern solutions using Salesforce Book Description
Salesforce Certified Technical Architect (CTA) is the ultimate certification to validate your knowledge and skills when it comes to designing and building high-performance technical solutions on the Salesforce platform. The CTA certificate is granted after successfully passing the CTA review board exam, which tests your platform expertise and soft skills for communicating your solutions and vision. You'll start with the core concepts that every architect should master, including data lifecycle, integration, and security, and build your aptitude for creating high-level technical solutions. Using real-world examples, you'll explore essential topics such as selecting systems or components for your solutions, designing scalable and secure Salesforce architecture, and planning the development lifecycle and deployments. Finally, you'll work on two full mock scenarios that simulate the review board exam, helping you learn how to identify requirements, create a draft solution, and combine all the elements together to create an engaging story to present in front of the board or to a client in real life. By the end of this Salesforce book, you'll have gained the knowledge and skills required to pass the review board exam and implement architectural best practices and strategies in your day-to-day work. What you will learn Explore data lifecycle management and apply it

effectively in the Salesforce ecosystem
 Design appropriate enterprise
 integration interfaces to build your
 connected solution Understand the
 essential concepts of identity and access
 management Develop scalable
 Salesforce data and system architecture
 Design the project environment and
 release strategy for your solution
 Articulate the benefits, limitations, and
 design considerations relating to your
 solution Discover tips, tricks, and
 strategies to prepare for the Salesforce
 CTA review board exam Who this book is
 for This book is for Salesforce architects
 who want to become certified technical
 architects by learning how to design
 secure and scalable technical solutions
 for their organizations. A solid
 understanding of the Salesforce platform
 is required, ideally combined with 3 to 5
 years of practical experience as an
 application architect, system architect,
 enterprise architect, or solution
 architect.

Overview You not only will learn the theory but the international applications as well. Content - Quality and Service Management Perspectives - Understanding and Managing Customer Satisfaction with Wildlife-based Tourism Experiences - Management of Tourism - Development and Growth - Co-branding in the Restaurant Industry - Service System - Marketing Tourism Online - Quality Management for Events - Effective Management of Hotel Revenue - And much more Duration 3 months Assessment The assessment will take place on the basis of one assignment at the end of the course. Tell us when you feel ready to take the exam and we'll send you the assignment questions. Study material The study material will be provided in separate files by email / download link.

Model-Driven Architecture in Practice
This book addresses how best to make build vs. buy decisions, and what effect such decisions have on the software development life cycle (SDLC). Offering an integrated approach that includes important management and decision

practices, the text explains how to create successful solutions that fit user and customer needs, by mixing different SDLC methodologies. Features: provides concrete examples and effective case studies; focuses on the skills and insights that distinguish successful software implementations; covers management issues as well as technical considerations, including how to deal with political and cultural realities in organizations; identifies many new alternatives for how to manage and model a system using sophisticated analysis tools and advanced management practices; emphasizes how and when professionals can best apply these tools and practices, and what benefits can be derived from their application; discusses searching for vendor solutions, and vendor contract considerations.

Design Principles for Process-driven Architectures Using Oracle BPM and SOA Suite 12c

The aim of this book is to enhance theoretical and practical understanding of quality management in tourism and hospitality. It provides a benchmark of current knowledge, and examines the range of research methods being applied to further develop tourism and hospitality service management research. It is hoped that this book will stimulate new research questions by highlighting tensions and challenges in the area.
