Accurate diagnosis is the foundation of medical practice, but at the start of the diagnostic process, uncertainty is inevitable. The clinician's skills and cognitive attributes determine the quality of the initial differential diagnosis and thus the crucial first phases of investigation and treatment; mistakes are often self-propagating. Diagnostic error is a major cause of avoidable morbidity and mortality, and is the commonest reason for successful litigation. Risk and Reasoning in Clinical Diagnosis is an accessible and readable look at the diagnostic process. Dr. Cym Ryle presents the insights and concepts developed in cognitive psychology which have led to the consensus that in all domains human reasoning is primarily driven by unconscious, intuitive mechanisms; the contribution of structured, analytical thinking is variable and inconsistent. He notes that the risk of error is inseparable from these mechanisms. Dr. Ryle then develops a description of the diagnostic process which encompasses its form, strengths and fallibility, and illustrates this description with examples from his work as a general practitioner. He argues that improving diagnostic accuracy should be a priority, and that there is sufficient evidence to guide changes in medical training, in clinical practice, and in the culture and organisation of our

institutions. He identifies specific, practical steps that can be taken by individual clinicians and by clinical teams, suggests priorities for action in our institutions, and considers the obstacles to progress.

Abundance from the Desert provides a comprehensive introduction to classical Arabic poetry, one of the richest of poetic traditions. Covering the period roughly of 500-1250 c.e., it features original translations and illuminating discussions of a number of major classical Arabic poems from a variety of genres. The poems are presented chronologically, each situated within a specific historical and literary context. Together, the selected poems suggest the range and depth of classical Arabic poetic expression; read in sequence, they suggest the gradual evolution of a tradition. Moving beyond a mere chronicle, Farrin outlines a new approach to appreciating classical Arabic poetry based on an awareness of concentric symmetry, in which the poem's unity is viewed not as a linear progression but as an elaborate symmetrical plot. In doing so, the author presents these works in a broader, comparative light, revealing connections with other literatures. The reader is invited to examine these classical Arabic works not as isolated phenomena—notwithstanding their uniqueness and their association with a discrete tradition—but rather as part of a great multicultural heritage. This pioneering book marks an important step forward in the study of Arabic poetry. At the same time, it opens the

door to this rich tradition for the general reader.

The second edition of Evidence-Based Practice in Clinical Social Work continues to bridge the gap between social work research and clinical practice, presenting EBP as both an effective approach to social work and a broader social movement. Building on the models and insights outlined in the first edition, this new edition provides updated research and additional case studies addressing relevant issues such as trauma treatment and opioid dependence. Drawing on their multidisciplinary experience as practitioners, researchers, and educators, the authors guide readers through the steps of the EBP decision-making process in assessment, treatment planning, and evaluation. The book places special emphasis on balancing clinical expertise, research results, and client needs, and analyzes both the strengths and limitations of the EBP model in order to give readers a more complete idea of how the method will shape their own practice. In addition, this practice-building reference:

- Introduces core principles of EBP and details its processes in social work
- Features guidelines for engaging clients in EBP and transmitting research findings
- Offers a range of case examples demonstrating EBP with diverse clients
- Addresses education and supervision issues and related controversies
