One in every seven children is disabled. Children with disabilities are among the most likely to be marginalized, poor and vulnerable. UNICEF is committed to improving the lives of children, particularly those who face the greatest disadvantages. The report will investigate the web of barriers disabled children face: discrimination, harmful norms and the lack of accurate information. The report will analyse and provide good-practice guidance on: inclusive health and education; prevention; nutrition; protection from violence, exploitation and abuse; emergency response; institutionalization; and the role of appropriate technology and infrastructure

Current Trends in Psychology Cambridge University Press

New York Times–bestselling author Tilly Bagshawe continues the enduring legacy of beloved suspense author Sidney Sheldon with a new tale of glamour, suspense, and unexpected twists A young American au pair, Charlotte Clancy, vanishes without a trace in Mexico City. The case is left cold, but its legacy will be devastating. A decade later, LA is shaken by a spate of violent murders. Psychologist Nikki Roberts is the common link between the victims, her patients at the heart of this treacherous web.

When someone makes an attempt on Nikki's life, it's clear she is a marked woman. Nikki makes a living out of reading people, drawing out their secrets, but the key to this shocking pattern eludes her. With the police at a dead end Nikki drafts in Derek Williams, a PI who isn't afraid to put his hand into the hornet's nest. Williams was thwarted in the notorious Charlotte Clancy case all those years ago, but what he unearths in LA—and the mention of one name in particular—leaves him cold, and takes him on a dangerous path into the past. A shadowy manipulator has brought his deadly game to the streets of LA. In a crime spanning generations, it seems Nikki Roberts knows all too much—and a ruthless killer knows the price of her silence. In this crooked city, where enemies and friends are one and the same, Nikki must be the master of her own escape...

Body Language for Competent Teachers Routledge

"College Learning for the New Global Century, published through the LEAP (Liberal Education and America's Promise) initiative, spells out the essential aims, learning outcomes, and guiding principles for a 21st century college education. It reports on the promises American society needs to make - and keep - to all who seek a college education and to the society that will depend on graduates' future leadership and capabilities." -- Foreword (p. vii).

Meet Hedgemond the Hunter - a brave and stubborn little hedgehog. Down in the wild woods he proudly tends his beloved house, but there are some animals who just can't understand what the fuss is about. Find out just how Hedgemond proves to

the grumpy bear and the greedy boar that there is no place like home. Hedgehog's Home is a story about caring for the place you call home. Set in the unspoilt environment of the 'wild woods', we find the wild creatures arguing about what home means: is it simply a place we should take for granted or is it something to be cherished and protected? Despite the persuasions of charming Miss Fox and the jeers of the angry wolf, Hedgemond steadfastly proves that his home is his castle, reminding us all to be true to ourselves and safeguard what we care for.

[The Unauthorized Story of McDonald's](#) BoD - Books on Demand

"During World War II every psychologist had a job to do. His contributions sometimes were made in uniform and sometimes in whatever vestless and cuffless suit was available. Whether in uniform or not, the psychologist's work was related to the war effort or to the essential war functions of the nation. When the war ended, the psychologist found that his responsibilities were no less urgent. For the future his prospects seem to be even heavier burdens and a neverending path. Since the years 1940 and 1941, the psychologist has shown himself capable of performing duties not previously allotted to him, or, for that matter, not previously delegated to anyone else. There has grown up a better understanding of the potential functions of the psychologist, an understanding which creates new assignments for him. Instead of a reluctance to intrust to him problems in human behavior, there is today an insistence that he attempt problems with which perhaps he is not yet prepared to deal. Clearly these past few years have been an era of great change in psychology, as they have in many other fields. It is unfortunate that during these dramatic and eventful times, there were few professional meetings and little time or opportunity for the discussion of professional problems. With the return of the possibility of holding professional meetings, it occurred to us that a symposium on current trends in psychology would be most timely and desirable. With the cordial support of the administrative officials of the University, we were able to hold at the University of Pittsburgh, on March 5 and 6, 1947, a conference on current trends in psychology. The present volume contains the papers delivered then. In planning our program we attempted to include in it discussions of recent advances and of

probable future developments in several fields of psychology. There necessarily was a limit to the number of fields which could be included. In each chosen area of psychology we selected a speaker who is now active in that field"--Preface. (PsycINFO Database Record (c) 2012 APA, all rights reserved).

Big Mac CRC Press

The internet as a platform for facilitating human organization without the need for organizations has, through social media, created new challenges for cultural heritage institutions. Challenges include but are not limited to: how to manage copyright, ownership, orphan works, open data access to heritage representations and artefacts, crowdsourcing, cultural heritage amateurs, information as a commodity or information as public domain, sustainable preservation, attitudes towards openness and much more. Participatory Heritage uses a selection of international case studies to explore these issues and demonstrates that in order for personal and community-based documentation and artefacts to be preserved and included in social and collective histories, individuals and community groups need the technical and knowledge infrastructures of support that formal cultural institutions can provide. In other words, both groups need each other. Divided into three core sections, this book explores: - Participants in the preservation of cultural heritage; exploring heritage institutions and organizations, community archives and group - Challenges; including discussion of giving voices to communities, social inequality, digital archives, data and online sharing - Solutions; discussing open access and APIs, digital postcards, the case for collaboration, digital storytelling and co-designing heritage practice. Readership: This book will be useful reading for individuals working in cultural institutions such as libraries, museums, archives and historical societies. It will also be of interest to students taking library, archive and cultural heritage courses.

Judith Teachers College Press

The EU and the US responded to the global financial crisis by changing the rules for the functioning of financial services and markets and by establishing new oversight bodies. With the US Dodd-Frank Act and numerous EU regulations and directives now in place, this book provides a timely and thoughtful explanation of the key elements of the new regimes in both regions, of the political processes which shaped their content and of their

practical impact. Insights from areas such as economics, political science and financial history elucidate the significance of the reforms. Australia's resilience during the financial crisis, which contrasted sharply with the severe problems that were experienced in the EU and the US, is also examined. The comparison between the performances of these major economies in a period of such extreme stress tells us much about the complex regulatory and economic ecosystems of which financial markets are a part.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Description and Theory McGraw-Hill Education (UK)

From Dawn till Dusk embraces the conceptual challenges often associated with Bioethics by taking the reader on a journey that embodies the circle of life and what it means to be human. The beginning and the end of life have always been an impossible riddle to humans. Bioethics does not aspire to unveil utter truths regarding the purpose of our existence; on the contrary, its task is to settle controversial issues that arise within this finite, very fragile and vulnerable life, yet a life we still have to live. This book discusses thorny ethical issues that transcend time and are related to the dawn and the dusk of life: abortion and infanticide, genetic engineering, human reproductive cloning, the fear of death, rational suicide, and the right to die. The book's highest aspiration, though, is to both provide the reader with an opportunity to see the world from different perspectives and to showcase the irresistible charms of bioethical debates. ``This

book brings contemporary issues in bioethics into conversation with different philosophical views, both ancient and modern. The result is a rewarding and very readable discussion on a range of important questions about life and death." Peter Singer, Princeton University & University of Melbourne ``Evangelos D.

Protopapadakis' book is a philosophically rich discussion of major topics in bioethics about issues of life and death. The work is original and important. I believe the author is correct to argue that the central issues of bioethics at its core in these areas should be understood as moral in nature and should not be framed as principally legal or scientific." Tom L. Beauchamp, Georgetown University ``Bioethics is - in philosophical terms - a new field. But it builds on centuries of thought on the human condition, the meaning of life, and the fundamental ethical question: What should we do? Evangelos D. Protopapadakis' masterful volume traces modern bioethical debates, with all their increasing scientific complexity, back through ancient and modern philosophical thought. The result is a sparkling and engaging journey through the history of ideas and the current ethical challenges at the beginning and end of life." Julian Savulescu, Uehiro Chair in Practical Ethics, University of Oxford ``As the Head of the Greek Unit of the Chair, but also as an ethicist and a bioethicist, Professor Protopapadakis has never been weary to contribute to philosophically nuanced bioethical debates. This inspiring book is the manifestation of his attitude towards Bioethics." Amnon Carmi, Holder of the UNESCO Chair in Bioethics (Haifa) ``This book presents important connections between current positions and classical approaches in ethics, written in a lively way." Hans-Werner Ingensiep, Universität Duisburg-Essen ``Evangelos Protopapadakis' book provides nuanced insights describing the complex ethical problems which clinicians and society must address. This creative analysis incorporates ancient and contemporary historical examples to illuminate the disparate arguments used to justify conflicting philosophical responses." Susan M. Miller MD, MPH

The Thief Lord Chicken House

These lecture notes from the 1985 AMS Short Course examine a variety of topics from the contemporary theory of actuarial mathematics. Recent clarification in the concepts of probability and statistics has laid a much richer foundation for this theory. Other factors that have shaped the theory include the continuing

advances in computer science, the flourishing mathematical theory of risk, developments in stochastic processes, and recent growth in the theory of finance. In turn, actuarial concepts have been applied to other areas such as biostatistics, demography, economic, and reliability engineering.

Tried and tested teaching tips for language teachers. This practical ebook, with its clear and accessible style, will be useful to many teachers, whether trainee, novice or experienced, in a variety of contexts. It provides a set of 100 hands-on tips on 19 different areas of classroom teaching, including using a coursebook, giving and checking homework, classroom discipline, testing and assessment. The clear and concise advice is accompanied by brief explanatory notes based on the author's extensive teaching experience.

State of the World's Children 2013 Cambridge University Press
The Macmillan Interdisciplinary Handbooks: Gender series serves

undergraduate college students who have had little or no exposure to Gender Studies, as well as the curious lay reader. Following the Primer, which introduces the field of study, as well as the topics of the remaining 9 volumes plus a selection of subjects that will not receive full volume treatment (e.g., new media, music, disability), each handbook ushers the reader into a subfield of Gender Studies (see the list of titles, below) and explores twenty to thirty topics in that subfield. Every chapter in each volume, all newly commissioned studies prepared by academic experts, offers an annotated bibliography/research guide to encourage students to explore the topics further, using vehicles such as film or the arts to facilitate understanding of issues at the heart of the discipline, for example, fashion, health, masculinities. Each chapter ends with a summary of the concepts discussed. Each volume is edited by an academic subject specialist.

Concise Advice for New Action Researchers Longman

Non-verbal skills are invaluable for teachers in getting their own messages across to classes and understanding the messages pupils are sending them. Here an educational psychologist and a classroom teacher join forces to show new teachers in particular how to use gesture, posture, facial expression and tone of voice effectively to establish a good relationship with the classes that they teach. Each chapter is illustrated with clear drawings of pupils and teachers in common classroom situations and accompanied by training exercises aimed at improving the new teacher's ability to observe both her class and her own practice. A section at the end of the book gives suggested solutions to some of the exercises and the final chapter, addressed to staff responsible for their colleagues' professional development, provides suggestions for half and whole day courses.
