World History is the only course offering students an overview of the entire history of humankind. The major emphasis will be on the study of significant people, events, and issues from the earliest times to the present. Traditional historical points of reference in World History will be identified as students analyze important events and issues in western civilization as well as in civilizations in other parts of the world. Students will evaluate the causes and effects of political and economic imperialism and of major political revolutions since the 17th century. Students will examine the impact of geographic factors on major historic events and identify the historic origins of contemporary economic systems. Students will analyze the process by

which democratic-republican governments evolved as well as ideas from historic documents that influenced that process. Students will trace the historical development of important legal and political concepts. Students will examine the history and impact of major religious and philosophical traditions. Students will analyze the connections between major developments in science and technology and the growth of industrial economics. They will use the process of historical inquiry to research, interpret, and use multiple sources of evidence.

In *Beyond Chutzpah*, Norman Finkelstein moves from an iconoclastic interrogation of the new anti-Semitism to a meticulously researched exposé of the corruption of scholarship on the Israel-Palestine conflict, especially in the work of Alan Dershowitz. Pointing to a consensus among historians and human rights organizations on the factual record, Finkelstein argues that so much controversy continues to swirl around the conflict because apologists for Israel contrive it. This paperback edition includes a new preface examining recent developments in the Israel-Palestine conflict and the misuse of anti-Semitism, and a new chapter analysing the controversy surrounding Israel's construction of the West Bank wall.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
