LEARN TO EARN "Public companies are everywhere, and they surround you from morning to night. . . . Nearly everything you eat, wear, read, listen to, ride in, lie on, or gargle with is made by one. Perfume to penknives, hot tubs to hot dogs, nuts to nail polish are made by businesses that you can own." —from the Introduction. McDonald's, The Gap, Circuit City, Gillette, CBS, and thousands more . . . anybody can own part of big and small companies. As companies grow and prosper, you can too. Whenever burgers are eaten, sweaters are purchased, batteries are used, and faces are shaved, you've got a piece of the action. From Alexander Hamilton to Warren Buffett, people have been making big money by investing in the corporations and institutions around them. Mutual-fund superstar Peter Lynch and author John Rothchild explain what's not normally taught in high school —how the stock market helps you and how it helps the country. By understanding how and why

the stock market works when you buy a share of a company or purchase a mutual fund, you can make informed —and profitable —decisions. Whether you're saving for college, a house, a trip, or retirement, there is no better method to secure a sound financial future than to invest. Young or old, there is no better time to start investing than now. "Investing is fun. It's interesting. It can put you on the road to prosperity for the rest of your life. . . ." Learn to Earn gives you the expert guidance you need to make the right start. Lynch and Rothchild cover the gamut on investment fundamentals and principles, from choosing stocks, to picking a broker, to reading an annual report. Learn to Earn reveals how to decipher the stock pages and how to evaluate the pros and cons of the five basic investment vehicles —savings accounts, collectibles, houses or apartments, stocks, and bonds. Yet, there is much more to investing than just the principles, and there is much more to Learn to Earn than just the fundamentals. Opportunity comes in many forms, from many sources, with many histories. Brimming with stories and parables, Lynch and Rothchild also

explain: Why the world as we know it would collapse without investors . . . How capitalism, from the time of the American Revolution on, has shaped the past, and how that affects us today . . . How Coke, Campbell's Soup, Ben & Jerry's, Microsoft, and other big companies got started, who gets rich from them, and how they got that way . . . How to know the real story behind the price of a stock

[Learn You a Haskell for Great Good!](#) Independently Published "Beginners is ultimately about more than learning. It's about the possibilities that reside in all of us." --Daniel H. Pink, New York Times best-selling author of *When, Drive, and To Sell is Human* The best-selling author of *Traffic* and *You May Also Like* gives us an inspirational journey into the transformative joys that come with starting something new, no matter your age Why do so many of us stop learning new skills as adults? Are we afraid to fail? Have we forgotten the sheer pleasure of being a beginner? Or is it simply a fact that you can't teach an old dog new tricks? Inspired by his young daughter's insatiable need to know how to do almost everything, and stymied by his own rut of

mid-career competence, Tom Vanderbilt begins a year of learning purely for the sake of learning. He tackles five main skills (and picks up a few more along the way), choosing them for their difficulty to master and their distinct lack of career marketability--chess, singing, surfing, drawing, and juggling. What he doesn't expect is finding himself having rapturous

experiences singing Spice Girls songs in an amateur choir, losing games of chess to eight-year-olds, and dodging scorpions at a surf camp in Costa Rica. Along the way, he interviews dozens of experts to explore the fascinating psychology and science behind the benefits of becoming an adult beginner. Weaving comprehensive research and surprising insight gained from his year of learning dangerously,

Vanderbilt shows how anyone can begin again--and, more important, why they should take those first awkward steps. Ultimately, he shares how a refreshed sense of curiosity opened him up to a profound happiness and a deeper connection to the people around him--and how small acts of reinvention, at any age, can make life seem magical.
