Implementing Practices for Effective Reputation Management MIT Press

'Solid and elegantly written introduction to its subject, up to speed with the current movements in the field, this is an excellent textbook for first-year students. The layout is well-conceived, and interspersed with Berger's own whimsical cartoons' - Sight and Sound

The Interpersonal Communication Book Pearson

Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on

different mammalian and non-mammalian species and includes chapters on insects, Drosophila, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

Communication Essentials for Financial Planners Essentials of Human Communication

The essentials of communication for professionals, educators, students, and entrepreneurs, from organizing your thoughts to inspiring your audience. Do you give presentations at meetings? Do you ever have to explain a complicated subject to audiences unfamiliar with your field? Do you make pitches for ideas or products? Do you want to interest a lecture hall of restless students in subjects that you find fascinating? Then you need this book. Make It Clear explains how to communicate—how to speak and write to get your ideas across. Written by an MIT professor who taught his students these techniques for more than forty years, the book starts with the basics—finding your voice, organizing your ideas, making sure what you say is remembered, and receiving critiques (“do not ask for brutal honesty”)—and goes on to cover such specifics as preparing slides, writing and rewriting, and even choosing a type family. The book explains why you should start with an empowerment promise and conclude by noting you delivered on that promise. It describes how a well-crafted, explicitly identified slogan, symbol, salient idea, surprise, and story combine to make you and your work memorable. The book lays out the VSN-C (Vision, Steps, News-Contributions) framework as an organizing structure and then describes how to create organize your ideas with a “broken-glass” outline, how to write to be understood, how to inspire, how to defeat writer's block—and much more. Learning how to speak and write well will empower you and make you smarter. Effective communication can be life-changing—making use of just one principle in this book can get you the job, make the sale, convince your boss, inspire a student, or even start a revolution.

The Basic Course Pearson

Supplement: Essentials of Human Communication, Unbound (for Books a la Carte Plus) - Essentials of Human Communication: Internatio Harcourt School

For those who wish to learn or teach the tools of skillful communication, this book provides concrete insight into what makes a person a successful communicator and guides readers in ways to improve their own communication skills and those of others. Predicated on four simple notions - that communication can be done well or poorly, that communication skills matter, that people differ in those skills, and that those skills can be improved - the book helps readers identify and enhance

their own communication strengths and address weaknesses, assess the communication skills of others, and coach others to improvement. Written in an accessible style, chapter highlights include an engaging review of the research on the practical implications of communication skills in our professional and personal lives. Particular attention is given to understanding sources of communication-skill deficits and the design of effective communication-skill training programs. A final chapter examines the roles of technology, cross-cultural interaction, and aging as they relate to communication skill. This book is written for students and professionals in fields such as human resources, sales, training, counseling, customer relations, education, health-care, and the ministry, with application for courses in professional communication, applied communication, and communication skills at the undergraduate, advanced professional degree, and continuing education levels.
