*Collection Of 6250+ Questions* European Alliance for Innovation This book offers a comprehensive reinterpretation of Shafi's "Risala" and shows how Shafi sought to formulate an all-embracing hermeneutic that portrays the law as a tightly interlocking structure organized around defined interactions of the Qur'an and the Sunna. Questions and Answers for Physicians Baker Books This book places context at the core of the Islamic

mechanism of iftā' to better understand the process of issuing fatwās in Muslim and non-Muslim countries, thus highlighting the connection between context and contemporaneity, on one hand, and the adaptable perception of Islamic law, on the other. The practice of iftā' is one of the most important mechanisms of Islamic law that keeps Islamic thought about ethical and legal issues in harmony with the demands, exigencies and developments of time.

This book builds upon the existing body of work related to the practice of iftā', but takes the discussion beyond the current debates with the intent of unveiling the interaction between Islamic legal methodologies and different environmental contexts. The book specifically addresses the three institutions (Saudi Arabia's Dār al-Iftā', Turkey's Diyanet and America's FCNA) and their Islamic legal opinions (fatwās) in a comparative framework. This

demonstrates the existence of complex and diverse ideas around similar issues within contemporary Islamic legal opinions that is further complicated by the influence of international, social, political, cultural and ideological contexts. The book thus unveils a more complicated range of interactive constituents in the process of the practice of iftā' and its outputs, fatwās. The work will be of interest to academics and researchers working in

the areas of Islamic law, Middle Eastern studies, religion and politics.

Very occasionally a book appears which provides a perfect bridge between amateurs and professionals. This event is usually less likely to happen in the somewhat arcane field of philosophy and almost beyond concept in the English speaking world when the subject is entwined with the history of Islam. The finer points of philosophical issues are also discussed and presented to enable anyone, whether a scholar or not, Arabic or Westerner, to understand

the truths these ancients sought.

The indiscriminate exportation of Western psychology to Muslim and third world countries can pose serious cultural and ideological dilemmas.

When the exported commodity from North to South is physical in nature, the harm done can easily be identified;

for example the quick detection of the life threatening birth defects caused by the drug thalidomide when taken during pregnancy or the flaws in the breaking system of a Japanese car. However, when the exported product is ideas and beliefs and ways of life, the indirect and sneaky damage, is often much more malevolent and long-lasting because it attacks the worldview of the recipients and it shakes their cherished beliefs. Because of its technological supremacy

Islamic and developing countries got used to wholeheartedly accepting any information coming from the West if it is under the tag of “science”. By presenting itself under this prestigious ‘mantra’ of science, students in Muslim countries swallow the kernel of psychology with its nutshell; the baby with its filthy water. The danger of this approach is greatly augmented by the shortcomings of our educational systems that discourages critical thinking and encourages

the submissive acceptance of the words of the teacher and that of printed material.

in the Muslim world between the forces of religion and law and those of violence and lawlessness as Noah Feldman. His scholarship has defined the stakes in the Middle East today. Now, in this incisive book, Feldman tells the story behind the increasingly popular call for the establishment of the shari'a--the law of the traditional Islamic state--in the modern Muslim world. Western powers call it a threat to democracy. Islamist movements are winning

elections on it. Terrorists use it to justify their crimes. What, then, is the shari'a? Given the severity of some of its provisions, why is it popular among Muslims? Can the Islamic state succeed--should it? Feldman reveals how the classical Islamic constitution governed through and was legitimated by law. He shows how executive power was balanced by the scholars who interpreted and administered the shari'a, and how this balance of

power was finally destroyed by the tragically incomplete reforms of the modern era. The result has been the unchecked executive dominance that now distorts politics in so many Muslim states. Feldman argues that a modern Islamic state could provide political and legal justice to today's Muslims, but only if new institutions emerge that restore this constitutional balance of power. The Fall and Rise of the Islamic State gives us the sweeping history of the

traditional Islamic constitution--its noble beginnings, its downfall, and the renewed promise it could hold for Muslims and Westerners alike. In a new introduction, Feldman discusses developments in Egypt, Tunisia, Libya, and other Muslim-majority countries since the Arab Spring and describes how Islamists must meet the challenge of balance if the new Islamic states are to succeed.

What is so unique about

Islam's scripture, the Quran? Who wrote it, and when? Can we trust its statements to be from Muhammad? Why was it written in Arabic? Does it command Muslims to fight Christians? These are a few of the thirty questions answered in this clear and concise guide to the history and contents of the Quran. Ayman Ibrahim grew up in the Muslim world and has spent many years teaching various courses on Islam. Using a question-and-answer format, Ibrahim covers critical questions about

the most sacred book for Muslims. He examines Muslim and non-Muslim views concerning the Quran, shows how the Quran is used in contemporary expressions of Islam, answers many of

the key questions non-Muslims have about the Quran and Islam, and reveals the importance of understanding the Quran for Christian-Muslim and Jewish-Muslim interfaith

relations. This introductory guide is written for anyone with little to no knowledge of Islam who wants to learn about Muslims, their beliefs, and their scripture.
